INC.**

ANNUAL REPORT

2011

**UNITED STATES
SECURITIES AND EXCHANGE COMMISSION
Washington, D.C. 20549**

FORM 10-K

(Mark One)

ANNUAL REPORT UNDER SECTION 13 OR 15(d) OF THE
SECURITIES EXCHANGE ACT OF 1934.

For the fiscal year ended June 30, 2011

OR

TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE
SECURITIES EXCHANGE ACT OF 1934.

For the transition period from _____ to _____

Commission file number: **001-31326**

SENESCO TECHNOLOGIES, INC.

(Exact name of registrant as specified in its charter)

Delaware

(State or other jurisdiction of
incorporation or organization)

84-1368850

(I.R.S. Employer Identification No.)

721 Route 202/206, Suite 130, Bridgewater, New Jersey

(Address of principal executive offices)

08807

(Zip Code)

(908) 864-4444

(Registrant's telephone number,
including area code)

Securities registered under Section 12(b) of the Act:

Title of each class

Name of each exchange on which registered

**Common Stock, \$0.01 par value per
share.**

NYSE Amex

Securities registered under Section 12(g) of the Act:

None.

Indicate by check mark if the registrant is a well-known seasoned issuer, as defined in Rule 405 of the Securities Act. Yes No

Indicate by check mark if the registrant is not required to file reports pursuant to Section 13 or 15(d) of the Exchange Act. Yes No

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes No

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T (§232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files). Yes No

Indicate by check mark if disclosure of delinquent filers pursuant to Item 405 of Regulation S-K is not contained herein, and will not be contained, to the best of registrant's knowledge, in definitive proxy or information statements incorporated by reference in Part III of this Form 10-K or any amendment to this Form 10-K. []

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer or a smaller reporting company. See definitions of "accelerated filer", "large accelerated filer" and "smaller reporting company" in Rule 12b-2 of the Exchange Act.

Large accelerated filer Accelerated filer

Non-accelerated filer Smaller reporting company

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act). Yes No

As of December 31, 2010, the aggregate market value of the registrant's common stock held by non-affiliates of the registrant was \$15,016,520, based on the closing sales price as reported on the NYSE Amex on that date.

The number of shares outstanding of each of the registrant's classes of common stock, as of September 26, 2011:

<u>Class</u>	<u>Number of Shares</u>
Common Stock, \$0.01 par value	79,626,675
Preferred Stock, \$0.01 par value	4,860

PART I

Item 1. Business.

Our Business

The primary business of Senesco Technologies, Inc., a Delaware corporation incorporated in 1999, and its wholly-owned subsidiary, Senesco, Inc., a New Jersey corporation incorporated in 1998, collectively referred to as “Senesco,” “we,” “us” or “our,” is to utilize our patented and patent-pending technology related to certain genes, primarily eukaryotic translation initiation Factor 5A, or Factor 5A, and deoxyhypusine synthase, or DHS, and related technologies for human therapeutic applications to develop novel approaches to treat cancer and inflammatory diseases.

For agricultural applications, we have licensed applications of the Factor 5A, DHS and Lipase platforms to enhance the quality, productivity and stress resistance of fruits, flowers, vegetables, agronomic and biofuel feedstock crops through the control of cell death, referred to herein as senescence, and growth in plants.

Human Therapeutic Applications

We believe that our Factor 5A gene regulatory technology could have broad applicability in the human therapeutic field, by either inducing or inhibiting programmed cell death, also known as apoptosis, which is the natural process the human body goes through in order to eliminate redundant or defective cells. Inducing apoptosis is useful in treating cancer where the defective cancer cells have failed to respond to the body’s natural apoptotic signals. Conversely, inhibiting apoptosis may be useful in preventing, ameliorating or treating an exaggerated, acute immune response in a wide range of inflammatory and ischemic diseases attributable to or aggravated by premature apoptosis.

SNS01-T for Multiple Myeloma

We have developed a therapeutic candidate, SNS01-T, an improved formulation of SNS01, for the potential treatment of multiple myeloma. SNS01-T utilizes our Factor 5A technology and comprises two active components: a DNA plasmid, or pDNA, expressing human eIF5A containing a lysine to arginine substitution at amino acid position 50, or eIF5A^{K50R}, and a short inhibitory RNA, or siRNA. These two components are combined in a fixed ratio with a polymer, polyethyleneimine, or PEI, which enables self-assembly of the DNA and RNA into nanoparticles with demonstrated enhanced delivery to tissues and protection from degradation in the blood stream. Under the control of a B cell selective promoter, SNS01-T’s DNA plasmid up-regulates the apoptotic pathways within cancer cells by preferentially expressing the stable arginine form of the Factor 5A death message in target cells. The siRNA reduces expression of the hypusine form of Factor 5A that supports cell survival and proliferation. The siRNA also down-regulates anti-apoptotic proteins, such as NFkB, ICAM and pro-inflammatory cytokines, which protect malignant cells from apoptosis and promote cell growth in multiple myeloma. The PEI, a cationic polymer, promotes auto-assembly of a nanoparticle with the other two components for intravenous delivery and protects the combination from degradation in the bloodstream until it is taken up by the tumor cell, where the siRNA and DNA plasmid are

released.

We have performed efficacy, toxicological and dose-finding studies *in vitro* in non-human and human cells and *in-vivo* in mice for SNS01. Our efficacy studies in severe combined immune-deficient, or SCID, mice with subcutaneous human multiple myeloma tumors tested SNS01 dose ranging from 0.15 mg/kg to 1.5 mg/kg. In these studies, mice treated with a dose of either 0.75 mg/kg or 1.5 mg/kg both showed, compared to relevant controls, a 91% reduction in tumor volume and a decrease in tumor weight of 87% and 95%, respectively. For mice that received smaller doses of either 0.38 mg/kg or 0.15 mg/kg, there was also a reduction in tumor volume of 73% and 61%, respectively, and weight of 74% and 36%, respectively. All SNS01-T treated mice survived. This therapeutic dose range study provided the basis for a non-good laboratory practices, or GLP, 8-day maximum tolerated dose study in which normal mice received two intravenous doses of increasing amounts of SNS01 (from 2.2 mg/kg). Body weight, organ weight and serum levels of liver enzymes were used as clinical indices to assess toxicity. A dose between 2.2 mg/kg and 2.9 mg/kg was well tolerated with respect to these clinical indices, and the survival rate at 2.9 mg/kg was 80%. Mice receiving above 2.9 mg/kg of SNS01 showed evidence of morbidity and up to 80% mortality. The 2.9 mg/kg threshold was therefore determined to be the maximum tolerated dose in mice in this study. We have also completed our pivotal GLP toxicology studies in mice and dogs, employing SNS01-T, a slightly modified formulation of SNS01, and have an open investigational new drug application, or IND, with the United States Food and Drug Administration, or FDA. We have also been granted orphan drug status for SNS01-T by the FDA for the potential treatment of multiple myeloma.

We have initiated a Phase 1b/2a clinical study with SNS01-T in multiple myeloma patients. We recently met with our contract research organization, or CRO, Criterium, to finalize the operational plans for the conduct and analysis of this open-label, multiple-dose, dose-escalation study, which will evaluate the safety and tolerability of SNS01-T when administered by intravenous infusion to relapsed or refractory multiple myeloma patients. The study design calls for four cohorts of three to six patients each. Patients in each cohort will receive twice-weekly dosing for six weeks followed by a four-week safety data review period before escalating to a higher dose level in the next cohort. While the primary objective of the initial study is to evaluate safety and tolerability, the effect of SNS01-T on tumor response will also be evaluated using multiple, well-established criteria including measurement of the monoclonal protein, or M-protein. We have selected Mayo Clinic as a clinical site and are considering adding an additional site. The study is open and we are in the process of screening patients.

We may consider other human diseases in order to determine the role of Factor 5A and SNS01-T.

We may further expand our research and development program beyond the initiatives listed above to include other diseases and research centers.

Human Therapeutic Target Markets

We believe that our eIF5A platform technology may have broad applicability in the human therapeutic field, by either inducing or inhibiting apoptosis. Inducing apoptosis may be useful in treating certain forms of cancer because the body's immune system is not able to force cancerous cells to undergo apoptosis. Inhibiting apoptosis may be useful in preventing or

treating a wide range of inflammatory and ischemic diseases attributed to premature apoptosis, including diabetes, diabetic retinopathy and lung inflammation, among others.

We have advanced our research in multiple myeloma and have initiated a Phase 1b/2a clinical trial during the quarter ended September 30, 2011, and may select additional human therapeutic indications to investigate in clinical trials. We believe that the success of our future operations will likely depend on our ability to transform our research and development activities into commercial applications.

Human Therapeutic Research Program

Our human therapeutic research program, which consists of pre-clinical *in-vitro* and *in-vivo* experiments designed to assess the role and mode of action of Factor 5A in human diseases and a clinical trial, is being performed by approximately nine (9) third party researchers, at our direction, at Criterium and the University of Waterloo. Additionally, we outsource certain projects, such as our clinical trial, to other third party research organizations.

Our research and development expenses incurred on human therapeutic applications were approximately \$3,253,253, or 87%, of our total research and development expenses for the year ended June 30, 2011.

Our research and development expenses incurred on human therapeutic applications were approximately \$2,083,787, or 79%, of our total research and development expenses for the year ended June 30, 2010.

Our research and development expenses incurred on human therapeutic applications were approximately \$1,736,179, or 74%, of our total research and development expenses for the year ended June 30, 2009.

Since inception, the proportion of our research and development expenses on human therapeutic applications has increased, as compared to our research and development expenses on agricultural applications. This change is primarily due to the fact that our research focus on human therapeutics has increased and some of our research costs for plant applications have shifted to our license partners.

Our planned future research and development initiatives for human therapeutics include:

- Multiple Myeloma. Continue a Phase 1b/2a clinical trial. In connection with the potential clinical trial, we have engaged Criterium to manage the operational aspects of the Phase 1b/2a clinical study. We have also entered into an agreement with Mayo Clinic to be a clinical site and plan on adding an additional site. The study opened in September 2011 and we are currently screening patients. We estimate that it will take approximately one year to complete this study.
- Other B cell cancers.
- Other cancers.
- Other. We may consider other human diseases in which Factor 5A, siRNA against Factor 5A and SNS01-T may have a therapeutic effect.

In order to pursue the above research initiatives, as well as other research initiatives that may arise, we completed private placements of convertible preferred stock and warrants on April 1, 2010 and June 2, 2010. In December 2010, we initiated an at-the-market, or ATM, offering for the issuance of up to \$5,500,000 of common stock. However, it will be necessary for us to raise a significant amount of additional working capital in the future. If we are unable to raise the necessary funds, we may be required to significantly curtail the future development of some of our research initiatives and we will be unable to pursue other possible research initiatives.

We may further expand our research and development program beyond the initiatives listed above to include other diseases and research centers.

Human Therapeutic Suppliers

The materials for our lead therapeutic candidate, SNS01-T, for multiple myeloma consists of three parts: a pDNA expressing human eIF5A^{K50R}; a siRNA, whose sequence corresponds to an untranslated region of native eIF5A mRNA; and linear PEI which enables self-assembly of the nucleic acids into nanoparticles. We have entered into supply agreements for the components as follows:

On June 27, 2008, the Company entered into a supply agreement with VGXI, Inc., or VGXI, under which VGXI will supply the Company with the plasmid portion of the Company's combination therapy, hereinafter referred to as the VGXI Product. The agreement has an initial term that commences on the date of the agreement and runs for a period of five (5) years. The agreement shall, upon mutual agreement, renew for consecutive one (1) year periods thereafter. The Company's financial obligation under the agreement is dependent upon the amount of VGXI Product ordered by the Company.

On June 30, 2008, the Company entered into a supply agreement with Polyplus-transfection, or POLYPLUS, under which POLYPLUS will supply the Company with its "in vivo-jetPEI", hereinafter referred to as the POLYPLUS Product, which is used in the formulation and systemic delivery of the Company's combination therapy. The agreement has an initial term which commences on the date of the agreement and runs until the eighth anniversary of the first sale of our product containing the POLYPLUS Product. The agreement shall automatically renew for consecutive one (1) year periods thereafter, except if terminated by either party upon six (6) months written notice prior to the initial or any subsequent renewal term. The Company's financial obligation under the agreement is dependent upon the amount of POLYPLUS Product ordered by the Company.

On September 4, 2008, the Company entered into a supply agreement with Avecia Biotechnology, Inc., or AVECIA, under which AVECIA will supply the Company with the siRNA portion of the Company's combination therapy consisting of the Factor 5A gene and siRNA against Factor 5A, hereinafter referred to as the Plasmid Product. The agreement has a term which commences on the date of the agreement and terminates on the later of the completion of all services to be provided under the agreement or 30 days following delivery of the final shipment of the Plasmid Product.

Human Therapeutic Competition

Our competitors in human therapeutics that are presently attempting to distribute their technology have generally utilized one of the following distribution channels:

- Entering into strategic alliances, including licensing technology to major marketing and distribution partners; or
- Developing in-house production and marketing capabilities.

In addition, some competitors are established distribution companies, which alleviates the need for strategic alliances, while others are attempting to create their own distribution and marketing channels.

There are many large companies and development stage companies working in the field of apoptosis and multiple myeloma research including: Celgene, Inc., Takeda/Millennium, ONYX Pharmaceuticals, Inc., Amgen Inc., Centocor, Inc., Novartis AG, and Genta Incorporated, among others.

We do not currently have any commercialized products, and therefore, it is difficult to assess our competitive position in the market. However, we believe that if we are able to develop and commercialize a product or products under our patents to our Factor 5A platform technology, we will have a competitive position in the markets in which we will operate.

Agricultural Applications

Our agricultural research focuses on the discovery and development of certain gene technologies, which are designed to confer positive traits on fruits, flowers, vegetables, forestry species and agronomic crops.

We have licensed this technology to various strategic partners and have entered into a joint collaboration. We may continue to license this technology, as opportunities present themselves, to additional strategic partners and/or enter into additional joint collaborations or ventures.

Our ongoing research and development initiatives for agriculture include assisting our license and joint collaboration partners to:

- further develop and implement the DHS and Factor 5A gene technology in banana, canola, cotton, turfgrass, rice, alfalfa, corn, soybean and trees; and
- test the resultant crops for new beneficial traits such as increased yield, increased tolerance to environmental stress, disease resistance and more efficient use of fertilizer.

Agricultural Target Markets

In order to address the complexities associated with marketing and distribution in the worldwide market, we have adopted a multi-faceted commercialization strategy, in which we have entered into and plan to enter into, as the opportunities present themselves, additional licensing agreements or other strategic relationships with a variety of companies or other entities on a crop-by-crop basis. We anticipate revenues from these relationships in the form of licensing fees, royalties, usage fees, or the sharing of gross profits. In addition, we anticipate payments from certain of our partners upon their achievement of certain research and development benchmarks. This commercialization strategy allows us to generate revenue at various stages of product development, while ensuring that our technology is incorporated into a wide variety of crops. Our optimal partners combine the technological expertise to incorporate our technology into their product line along with the ability to successfully market the enhanced final product, thereby eliminating the need for us to develop and maintain a sales force.

Because the agricultural market is dominated by privately held companies or subsidiaries of foreign owned companies, market size and market share data for the crops under our license and development agreements is not readily available. Additionally, because we have entered into confidentiality agreements with our license and development partners, we are unable to report the specific financial terms of the agreements as well as any market size and market share data that our partners may have disclosed to us regarding their companies.

Agricultural Development and License Agreements

Through June 30, 2011, we have seven (7) active license agreements and one (1) joint collaboration with established agricultural biotechnology companies.

Agricultural Research Program

Our agricultural research and development is performed by one (1) researcher, at our direction, at the University of Waterloo, where the technology was developed. Additional agricultural research and development is performed by our license or joint collaboration partners.

The discoverer of our technology, John E. Thompson, Ph.D., is the Associate Vice President, Research and former Dean of Science at the University of Waterloo in Ontario, Canada, and is our Executive Vice President and Chief Scientific Officer. Dr. Thompson is also one of our directors and owns 1.2% of the outstanding shares of our common stock, \$0.01 par value, as of June 30, 2011.

On September 1, 1998, we entered into, and have extended through August 31, 2012, a research and development agreement with the University of Waterloo and Dr. Thompson as the principal inventor. The Research and Development Agreement provides that the University of Waterloo will perform research and development under our direction, and we will pay for the cost of this work and make certain payments to the University of Waterloo. In return for payments made under the Research and Development Agreements, we have all rights to the intellectual property derived from the research.

Agricultural Competition

Our competitors in agriculture that are presently attempting to distribute their technology have generally utilized one of the following distribution channels:

- licensing technology to major marketing and distribution partners;
- entering into strategic alliances; or
- developing in-house production and marketing capabilities.

In addition, some competitors are established distribution companies, which alleviates the need for strategic alliances, while others are attempting to create their own distribution and marketing channels.

Our competitors in the field of delaying plant senescence are companies that develop and produce transformed plants with a variety of enhanced traits. Such companies include: Mendel Biotechnology; Renessen LLC; Exelixis Plant Sciences, Inc.; and Syngenta International AG; among others.

We do not currently have any commercialized products, and therefore, it is difficult to assess our competitive position in the market. However, we believe that if we or our licensees are able to develop and commercialize a product or products using our technology, we will have a competitive position in the markets in which we or our licensees operate.

Agricultural Development Program

Generally, projects with our licensees and joint collaboration partner begin by transforming seed or germplasm to incorporate our technology. Those seeds or germplasm are then grown in our partners' greenhouses. After successful greenhouse trials, our partners will transfer the plants to the field for field trials. After completion of successful field trials, our partners may have to apply for and receive regulatory approval prior to initiation of any commercialization activities.

Generally, the approximate time to complete each sequential development step is as follows:

Seed Transformation	approximately 1 to 2 years
Greenhouse	approximately 1 to 2 years
Field Trials	approximately 2 to 5 years

The actual amount of time spent on each development phase depends on the crop, its growth cycle and the success of the transformation achieving the desired results. As such, the amount of time for each phase of development could vary, or the time frames may change.

The status of each of our projects with our partners is as follows:

<u>Project</u>	<u>Partner</u>	<u>Status</u>
Banana	Rahan Meristem	
- Shelf Life		Field trials
- Disease Resistance		Field trials
Trees	Arborgen	
- Growth		Field trials
Alfalfa	Cal/West	Field trials
Corn	Monsanto	Field trials
Cotton	Bayer	Greenhouse
Canola	Bayer	Field trials
Rice	Bayer	Greenhouse
Soybean	Monsanto	Field trials
Turfgrass	The Scotts Company	Greenhouse
Ethanol	Poet	Discontinued

The license agreement with Poet called for modifying certain inputs in the production of ethanol in order to increase the yield of ethanol in Poet's optimized production system. While we have been able to modify those inputs, to date, we have not been successful in increasing the yield from Poet's optimized production system. As such, we have discontinued our efforts to modify those inputs.

Commercialization by our partners may require a combination of traits in a crop, such as both shelf life and disease resistance, or other traits.

Based upon our commercialization strategy, we anticipate that there may be a significant period of time before plants enhanced using our technology reach consumers.

Consistent with our commercialization strategy, we may attract other companies interested in strategic partnerships or licensing our technology, which may result in additional license fees, revenues from contract research, royalty fees and other related revenues. Successful future operations will depend on our ability to transform our research and development activities into a commercially feasible technology.

Intellectual Property

We have twenty-three (23) issued patents from the United States Patent and Trademark Office, or PTO, and seventy-six (76) issued patents from foreign countries. Of our ninety-nine (99) domestic and foreign issued patents, sixty-four (64) are for the use of our technology in agricultural applications and thirty-five (35) relate to human therapeutics applications.

In addition to our ninety-nine (99) patents, we have a wide variety of patent applications, including divisional applications and continuations-in-part, in process with the PTO and internationally. We intend to continue our strategy of enhancing these new patent applications through the addition of data as it is collected.

Our agricultural patents are generally set to expire in 2019 in the United States and 2025 outside the United States. Our core human therapeutic technology patents are set to expire in 2021 in the United States and 2025 outside the United States, and our patents related to multiple

myeloma are set to expire, both in and outside the United States in 2029. To the extent our patents have different expiration dates abroad than in the United States, we are currently developing a strategy to extend the United States expiration dates to the foreign expiration dates.

During Fiscal 2011, we reviewed our patent portfolio in order to determine if we could reduce our cost of patent prosecution and maintenance. We identified several patents and patents pending that we believe we no longer need to maintain without having a material impact on the portfolio. We determined that we would no longer incur the cost to prosecute or maintain those patents or patents pending and may allow them to lapse when the next payment was due. Therefore, some of the issued patents may be allowed to lapse in the future.

Government Regulation

At present, the U.S. federal government regulation of biotechnology is divided among three agencies: (i) the U.S. Department of Agriculture regulates the import, field-testing and interstate movement of specific types of genetic engineering that may be used in the creation of transformed plants; (ii) the Environmental Protection Agency regulates activity related to the invention of plant pesticides and herbicides, which may include certain kinds of transformed plants; and (iii) the FDA regulates foods derived from new plant varieties. The FDA requires that transformed plants meet the same standards for safety that are required for all other plants and foods in general. Except in the case of additives that significantly alter a food's structure, the FDA does not require any additional standards or specific approval for genetically engineered foods but expects transformed plant developers to consult the FDA before introducing a new food into the market place.

In addition, our ongoing preclinical research with cell lines and lab animal models of human disease is not currently subject to the FDA requirements that govern clinical trials. However, use of our technology, SNS01-T, for human therapeutic applications, is subject to FDA regulation. Generally, the FDA must approve any drug or biologic product before it can be marketed in the United States. In addition, prior to being sold outside of the U.S., any products resulting from the application of our human therapeutic technology must be approved by the regulatory agencies of foreign governments. Prior to filing a new drug application or biologics license application with the FDA, we would have to perform extensive clinical trials, and prior to beginning any clinical trial, we need to perform extensive preclinical testing which could take several years and may require substantial expenditures.

Our current activities in human therapeutics related to our clinical trial in multiple myeloma, requires approval by the FDA. We have an open IND with the FDA for use of SNS01-T for the treatment of multiple myeloma and are subject to additional reporting to and monitoring by the FDA. Additionally, federal, state and foreign regulations relating to crop protection products and human therapeutic applications developed through biotechnology are subject to public concerns and political circumstances, and, as a result, regulations have changed and may change substantially in the future. Accordingly, we may become subject to governmental regulations or approvals or become subject to licensing requirements in connection with our research and development efforts. We may also be required to obtain such licensing or approval from the governmental regulatory agencies described above, or from state agencies, prior to the commercialization of our genetically transformed plants and human therapeutic technology. In addition, our marketing partners who utilize our technology or sell products grown with our technology may be subject to government regulations. If unfavorable

governmental regulations are imposed on our technology or if we fail to obtain licenses or approvals in a timely manner, we may not be able to continue our operations.

Employees

In addition to the twelve (12) scientists and monitors performing funded research for us at our CRO, the University of Waterloo, and other commercial research facilities, we have four (4) employees and two (2) consultants, four (4) of whom are executive officers and who are involved in our management. We do not anticipate hiring any additional employees over the next 12 months.

The officers are assisted by a Scientific Advisory Board that consists of prominent experts in the fields of plant and human cell biology as follows:

- Alan Bennett, Ph.D., who serves as the Chairman of the Scientific Advisory Board, is the Associate Vice Chancellor of the Office of Technology Transfer at the University of California. His research interests include the molecular biology of tomato fruit development and ripening, the molecular basis of membrane transport, and cell wall disassembly.
- Charles A. Dinarello, M.D., who serves as a member of the Scientific Advisory Board, is a Professor of Medicine at the University of Colorado School of Medicine, a member of the U.S. National Academy of Sciences and the author of over 500 published research articles. In addition to his active academic research career, Dr. Dinarello has held advisory positions with two branches of the National Institutes of Health and positions on the Board of Governors of both the Weizmann Institute and Ben Gurion University.
- James E. Mier, M.D., who serves as a member of the Scientific Advisory Board, is an Associate Professor of Medicine at Beth Israel Deaconess Medical Center, a teaching hospital of Harvard Medical School. He is also a practicing physician in the Division of Hematology-Oncology at Beth Israel. Dr. Mier's research is funded by the NIH and he is a member of numerous professional societies.

Furthermore, pursuant to the Research and Development Agreements, a substantial amount of our research and development activities are conducted at the University of Waterloo under the supervision of Dr. Thompson, our Executive Vice President and Chief Scientific Officer. We utilize the University's research staff including graduate and post-graduate researchers.

We may also contract research to additional university laboratories or to other companies in order to advance the development of our technology.

Safe Harbor Statement

The statements contained in this Annual Report on Form 10-K that are not historical facts are forward-looking statements within the meaning of Section 21E of the Securities Exchange Act of 1934, as amended, and the Private Securities Litigation Reform Act of 1995. Such forward-looking statements may be identified by, among other things, the use of forward-looking terminology such as “believes,” “expects,” “may,” “will,” “should,” or “anticipates” or the negative thereof or other variations thereon or comparable terminology, or by discussions of strategy that involve risks and uncertainties. In particular, our statements regarding the anticipated growth in the markets for our technologies, the continued advancement of our research, the approval of our patent applications, the possibility of governmental approval in order to sell or offer for sale to the general public a genetically engineered plant or plant product, the successful implementation of our commercialization strategy, including the success of our agricultural partners and the successful implementation of the Rahan Joint Collaboration, statements relating to our patent applications, the anticipated long term growth of our business, the results of our preclinical or clinical studies, if any, our ability to comply with the continued listing standards of the NYSE Amex, and the timing of the projects and trends in future operating performance are examples of such forward-looking statements. The forward-looking statements include risks and uncertainties, including, but not limited to, our limited operating history, our need for additional capital to fund our operations until we are able to generate a profit, the current economic environment, our dependence on a single principal technology, our outsourcing of our research and development activities, our significant future capital needs, our dependence on our patents and proprietary rights and the enforcement of these rights, the potential for our competitors or third parties to allege that we are infringing upon their intellectual property rights, the potential that our security measures may not adequately protect our unpatented technology, potential difficulty in managing our growth and expanding our operations, our lack of marketing or sales history and dependence on third-party marketing partners, our potential future dependence on joint ventures and strategic alliances to develop and market our technology, the intense competition in the human therapeutic and agricultural biotechnology industries, the various government regulations that our business is subject to, the potential that our preclinical studies and clinical trials of our human therapeutic applications may be unsuccessful, any inability to license from third parties their proprietary technologies or processes which we use in connection with the development of our technology, the length, expense and uncertainty associated with clinical trials for our human therapeutic technology, the potential that, even if we receive regulatory approval, consumers may not accept products containing our technology, our dependence on key personnel, the potential that certain provisions of our charter, by-laws and Delaware law could make a takeover difficult, increasing political and social turmoil, the potential that our management and other affiliates, due to their significant control of our common stock have the ability to significantly influence our actions, the potential that a significant portion of our total outstanding shares of common stock may be sold in the market in the near future, the limited trading market of our common stock, the potential that our common stock may be delisted from the NYSE Amex Exchange, fluctuations in the market price of our common stock, our dividend policy and potential for our stockholders to be diluted.

ITEM 1A: Factors That May Affect Our Business, Future Operating Results and Financial Condition

The more prominent risks and uncertainties inherent in our business are described below. However, additional risks and uncertainties may also impair our business operations. If any of the following risks actually occur, our business, financial condition or results of operations may suffer.

Risks Related to Our Business

We have a limited operating history and have incurred substantial losses and expect to incur future losses.

We are a development stage biotechnology company with a limited operating history and limited assets and capital. We have incurred losses each year since inception and had an accumulated deficit of \$60,748,435 at June 30, 2011. We have generated minimal revenues by licensing our technology for certain crops to companies willing to share in our development costs. In addition, our technology may not be ready for commercialization for several years. We expect to continue to incur losses for the next several years because we anticipate that our expenditures on research and development and administrative activities will significantly exceed our revenues during that period. We cannot predict when, if ever, we will become profitable.

We will need additional capital to fund our operations until we are able to generate a profit.

Our operations to date have required significant cash expenditures. Our future capital requirements will depend on the results of our research and development activities, preclinical and clinical studies, and competitive and technological advances.

We will need to obtain more funding in the future through collaborations or other arrangements with research institutions and corporate partners, or public and private offerings of our securities, including debt or equity financing. We may not be able to obtain adequate funds for our operations from these sources when needed or on acceptable terms. Future collaborations or similar arrangements may require us to license valuable intellectual property to, or to share substantial economic benefits with, our collaborators. If we raise additional capital by issuing additional equity or securities convertible into equity, our stockholders may experience dilution and our share price may decline. Any debt financing may result in restrictions on our spending.

If we are unable to raise additional funds, we will need to do one or more of the following:

- delay, scale-back or eliminate some or all of our research and product development programs;
- provide licenses to third parties to develop and commercialize products or technologies that we would otherwise seek to develop and commercialize ourselves;
- seek strategic alliances or business combinations;
- attempt to sell our company;
- cease operations; or
- declare bankruptcy.

We believe that at the projected rate of spending we should have sufficient cash to maintain our present operations through March 2012. However, we have the ability to raise

additional capital through our ATM facility, utilize our unused line of credit and, if necessary, delay certain costs which will provide us with enough cash to fund our operations at least through June 30, 2012.

We may be adversely affected by the current economic environment.

Our ability to obtain financing, invest in and grow our business, and meet our financial obligations depends on our operating and financial performance, which in turn is subject to numerous factors. In addition to factors specific to our business, prevailing economic conditions and financial, business and other factors beyond our control can also affect our business and ability to raise capital. We cannot anticipate all of the ways in which the current economic climate and financial market conditions could adversely impact our business.

Materials necessary to manufacture some of our compounds currently under development may not be available on commercially reasonable terms, or at all, which may delay our development and commercialization of these compounds.

Some of the materials necessary for the manufacture of our compounds under development may, from time to time, be available either in limited quantities, or from a limited number of manufacturers, or both. Our contract manufacturers need to obtain these materials for our clinical trials and, potentially, for commercial distribution when and if we obtain marketing approval for these compounds. Suppliers may not sell us these materials at the time we need them or on commercially reasonable terms. If we are unable to obtain the materials needed to conduct our clinical trials, product testing and potential regulatory approval could be delayed, adversely affecting our ability to develop the product candidates. Similarly, if we are unable to obtain critical manufacturing materials after regulatory approval has been obtained for a product candidate, the commercial launch of that product candidate could be delayed or there could be a shortage in supply, which could materially affect our ability to generate revenues from that product candidate. If suppliers increase the price of manufacturing materials, the price for one or more of our products may increase, which may make our products less competitive in the marketplace. If it becomes necessary to change suppliers for any of these materials or if any of our suppliers experience a shutdown or disruption at the facilities used to produce these materials, due to technical, regulatory or other reasons, it could harm our ability to manufacture our products.

We depend on a single principal technology and, if our technology is not commercially successful, we will have no alternative source of revenue.

Our primary business is the development and licensing of technology to identify, isolate, characterize and promote or silence genes which control the death of cells in humans and plants. Our future revenue and profitability critically depend upon our ability, or our licensees' ability, to successfully develop apoptosis and senescence gene technology and later license or market such technology. We have conducted experiments on certain crops with favorable results and have conducted certain preliminary cell-line and animal experiments, which have provided us with data upon which we have designed additional research programs. However, we cannot give any assurance that our technology will be commercially successful or economically viable for any crops or human therapeutic applications.

In addition, no assurance can be given that adverse consequences might not result from the use of our technology such as the development of negative effects on humans or plants or reduced benefits in terms of crop yield or protection. Our failure to obtain market acceptance of our technology or the failure of our current or potential licensees to successfully commercialize such technology would have a material adverse effect on our business.

We outsource all of our research and development activities and, if we are unsuccessful in maintaining our alliances with these third parties, our research and development efforts may be delayed or curtailed.

We rely on third parties to perform all of our research and development activities. Our research and development efforts take place at the University of Waterloo in Ontario, Canada, where our technology was discovered, at other commercial research facilities and with our commercial partners. At this time, we do not have the internal capabilities to perform our own research and development activities. Accordingly, the failure of third party research partners to perform under agreements entered into with us, or our failure to renew important research agreements with these third parties, may delay or curtail our research and development efforts.

We have significant future capital needs and may be unable to raise capital when needed, which could force us to delay or reduce our research and development efforts.

As of June 30, 2011, we had a cash balance of \$3,609,954 and working capital of \$1,787,579. Using our available reserves as of June 30, 2011, and the net proceeds from the ATM facility, we believe that we can operate according to our current business plan through March 2012. However, we have the ability to raise additional capital through our ATM facility, utilize our unused line of credit and, if necessary, delay certain costs which will provide us with enough cash to fund our operations at least through June 30, 2012.

To date, we have generated minimal revenues and anticipate that our operating costs will exceed any revenues generated over the next several years. Therefore, we will be required to raise additional capital in the future in order to operate in accordance with our current business plan, and this funding may not be available on favorable terms, if at all. If we are unable to raise additional funds, we will need to do one or more of the following:

- delay, scale back or eliminate some or all of our research and development programs;
- provide a license to third parties to develop and commercialize our technology that we would otherwise seek to develop and commercialize ourselves;
- seek strategic alliances or business combinations;
- attempt to sell our company;
- cease operations; or
- declare bankruptcy.

In addition, in connection with any funding, if we need to issue more equity securities than our certificate of incorporation currently authorizes, or more than 20% of the shares of our common stock outstanding, we may need stockholder approval. If stockholder approval is not obtained or if adequate funds are not available, we may be required to curtail operations significantly or to obtain funds through arrangements with collaborative partners or others that may require us to relinquish rights to certain of our technologies, product candidates, products or

potential markets. Investors may experience dilution in their investment from future offerings of our common stock. For example, if we raise additional capital by issuing equity securities, such an issuance would reduce the percentage ownership of existing stockholders. In addition, assuming the exercise of all options and warrants outstanding and the conversion of the preferred stock into common stock, as of June 30, 2011, we had 52,815,335 shares of common stock authorized but unissued and unreserved, which may be issued from time to time by our board of directors. Furthermore, we may need to issue securities that have rights, preferences and privileges senior to our common stock. Failure to obtain financing on acceptable terms would have a material adverse effect on our liquidity.

Since our inception, we have financed all of our operations through private equity and debt financings. Our future capital requirements depend on numerous factors, including:

- the scope of our research and development;
- our ability to attract business partners willing to share in our development costs;
- our ability to successfully commercialize our technology;
- competing technological and market developments;
- our ability to enter into collaborative arrangements for the development, regulatory approval and commercialization of other products; and
- the cost of filing, prosecuting, defending and enforcing patent claims and other intellectual property rights.

Our business depends upon our patents and proprietary rights and the enforcement of these rights. Our failure to obtain and maintain patent protection may increase competition and reduce demand for our technology.

As a result of the substantial length of time and expense associated with developing products and bringing them to the marketplace in the biotechnology and agricultural industries, obtaining and maintaining patent and trade secret protection for technologies, products and processes is of vital importance. Our success will depend in part on several factors, including, without limitation:

- our ability to obtain patent protection for our technologies and processes;
- our ability to preserve our trade secrets; and
- our ability to operate without infringing the proprietary rights of other parties both in the United States and in foreign countries.

As of June 30, 2011, we have been issued twenty-three (23) patents by the PTO and seventy-six (76) patents from foreign countries. We have also filed numerous patent applications for our technology in the United States and in several foreign countries, which technology is vital to our primary business, as well as several continuations in part on these patent applications. Our success depends in part upon the grant of patents from our pending patent applications.

Although we believe that our technology is unique and that it will not violate or infringe upon the proprietary rights of any third party, we cannot assure you that these claims will not be made or if made, could be successfully defended against. If we do not obtain and maintain patent protection, we may face increased competition in the United States and internationally, which would have a material adverse effect on our business.

Since patent applications in the United States are maintained in secrecy until patents are issued, and since publication of discoveries in the scientific and patent literature tend to lag behind actual discoveries by several months, we cannot be certain that we were the first creator of the inventions covered by our pending patent applications or that we were the first to file patent applications for these inventions.

In addition, among other things, we cannot assure you that:

- our patent applications will result in the issuance of patents;
- any patents issued or licensed to us will be free from challenge and if challenged, would be held to be valid;
- any patents issued or licensed to us will provide commercially significant protection for our technology, products and processes;
- other companies will not independently develop substantially equivalent proprietary information which is not covered by our patent rights;
- other companies will not obtain access to our know-how;
- other companies will not be granted patents that may prevent the commercialization of our technology; or
- we will not incur licensing fees and the payment of significant other fees or royalties to third parties for the use of their intellectual property in order to enable us to conduct our business.

Our competitors may allege that we are infringing upon their intellectual property rights, forcing us to incur substantial costs and expenses in resulting litigation, the outcome of which would be uncertain.

Patent law is still evolving relative to the scope and enforceability of claims in the fields in which we operate. We are like most biotechnology companies in that our patent protection is highly uncertain and involves complex legal and technical questions for which legal principles are not yet firmly established. In addition, if issued, our patents may not contain claims sufficiently broad to protect us against third parties with similar technologies or products, or provide us with any competitive advantage.

The PTO and the courts have not established a consistent policy regarding the breadth of claims allowed in biotechnology patents. The allowance of broader claims may increase the incidence and cost of patent interference proceedings and the risk of infringement litigation. On the other hand, the allowance of narrower claims may limit the scope and value of our proprietary rights.

The laws of some foreign countries do not protect proprietary rights to the same extent as the laws of the United States, and many companies have encountered significant problems and costs in protecting their proprietary rights in these foreign countries.

We could become involved in infringement actions to enforce and/or protect our patents. Regardless of the outcome, patent litigation is expensive and time consuming and would distract our management from other activities. Some of our competitors may be able to sustain the costs of complex patent litigation more effectively than we could because they have substantially greater resources. Uncertainties resulting from the initiation and continuation of any patent litigation could limit our ability to continue our operations.

If our technology infringes the intellectual property of our competitors or other third parties, we may be required to pay license fees or damages.

If any relevant claims of third party patents that are adverse to us are upheld as valid and enforceable, we could be prevented from commercializing our technology or could be required to obtain licenses from the owners of such patents. We cannot assure you that such licenses would be available or, if available, would be on acceptable terms. Some licenses may be non-exclusive and, therefore, our competitors may have access to the same technology licensed to us. In addition, if any parties successfully claim that the creation or use of our technology infringes upon their intellectual property rights, we may be forced to pay damages, including treble damages.

Our security measures may not adequately protect our unpatented technology and, if we are unable to protect the confidentiality of our proprietary information and know-how, the value of our technology may be adversely affected.

Our success depends upon know-how, unpatentable trade secrets, and the skills, knowledge and experience of our scientific and technical personnel. As a result, all employees agreed to a confidentiality provision in their employment agreement that prohibited the disclosure of confidential information to anyone outside of our company, during the term of employment and for five (5) years thereafter. The employment agreements have since been terminated, but the period of confidentiality is still in effect. We also require all employees to disclose and assign to us the rights to their ideas, developments, discoveries and inventions. We also attempt to enter into similar agreements with our consultants, advisors and research collaborators. We cannot assure you that adequate protection for our trade secrets, know-how or other proprietary information against unauthorized use or disclosure will be available.

We occasionally provide information to research collaborators in academic institutions and request that the collaborators conduct certain tests. We cannot assure you that the academic institutions will not assert intellectual property rights in the results of the tests conducted by the research collaborators, or that the academic institutions will grant licenses under such intellectual property rights to us on acceptable terms, if at all. If the assertion of intellectual property rights by an academic institution is substantiated, and the academic institution does not grant intellectual property rights to us, these events could limit our ability to commercialize our technology.

As we evolve from a company primarily involved in the research and development of our technology into one that is also involved in the commercialization of our technology, we may have difficulty managing our growth and expanding our operations.

As our business grows, we may need to add employees and enhance our management, systems and procedures. We may need to successfully integrate our internal operations with the operations of our marketing partners, manufacturers, distributors and suppliers to produce and market commercially viable products. We may also need to manage additional relationships with various collaborative partners, suppliers and other organizations. Although we do not presently conduct research and development activities in-house, we may undertake those activities in the future. Expanding our business may place a significant burden on our management and operations. We may not be able to implement improvements to our

management information and control systems in an efficient and timely manner and we may discover deficiencies in our existing systems and controls. Our failure to effectively respond to such changes may make it difficult for us to manage our growth and expand our operations.

We have no marketing or sales history and depend on third party marketing partners. Any failure of these parties to perform would delay or limit our commercialization efforts.

We have no history of marketing, distributing or selling biotechnology products, and we are relying on our ability to successfully establish marketing partners or other arrangements with third parties to market, distribute and sell a commercially viable product both here and abroad. Our business plan envisions creating strategic alliances to access needed commercialization and marketing expertise. We may not be able to attract qualified sub-licensees, distributors or marketing partners, and even if qualified, these marketing partners may not be able to successfully market agricultural products or human therapeutic applications developed with our technology. If our current or potential future marketing partners fail to provide adequate levels of sales, our commercialization efforts will be delayed or limited and we may not be able to generate revenue.

We will depend on joint ventures and strategic alliances to develop and market our technology and, if these arrangements are not successful, our technology may not be developed and the expenses to commercialize our technology will increase.

In its current state of development, our technology is not ready to be marketed to consumers. We intend to follow a multi-faceted commercialization strategy that involves the licensing of our technology to business partners for the purpose of further technological development, marketing and distribution. We have and are seeking business partners who will share the burden of our development costs while our technology is still being developed, and who will pay us royalties when they market and distribute products incorporating our technology upon commercialization. The establishment of joint ventures and strategic alliances may create future competitors, especially in certain regions abroad where we do not pursue patent protection. If we fail to establish beneficial business partners and strategic alliances, our growth will suffer and the continued development of our technology may be harmed.

Competition in the human therapeutic and agricultural biotechnology industries is intense and technology is changing rapidly. If our competitors market their technology faster than we do, we may not be able to generate revenues from the commercialization of our technology.

Many human therapeutic and agricultural biotechnology companies are engaged in research and development activities relating to apoptosis and senescence. The market for plant protection and yield enhancement products is intensely competitive, rapidly changing and undergoing consolidation. We may be unable to compete successfully against our current and future competitors, which may result in price reductions, reduced margins and the inability to achieve market acceptance for products containing our technology. Our competitors in the field of plant senescence gene technology are companies that develop and produce transgenic plants and include major international agricultural companies, specialized biotechnology companies, research and academic institutions and, potentially, our joint venture and strategic alliance partners. These companies include: Mendel Biotechnology, Inc., Renessen LLC, Exelixis Plant Sciences, Inc., and Syngenta International AG, among others. Some of our competitors that are

involved in apoptosis research include: Celgene, Inc., Takeda/Millennium, ONYX Pharmaceuticals, Inc., Amgen Inc.; Centocor, Inc., Novartis AG and Genta Incorporated. Many of these competitors have substantially greater financial, marketing, sales, distribution and technical resources than us and have more experience in research and development, clinical trials, regulatory matters, manufacturing and marketing. We anticipate increased competition in the future as new companies enter the market and new technologies become available. Our technology may be rendered obsolete or uneconomical by technological advances or entirely different approaches developed by one or more of our competitors, which will prevent or limit our ability to generate revenues from the commercialization of our technology.

Our business is subject to various government regulations and, if we or our licensees are unable to obtain regulatory approval, we may not be able to continue our operations.

At present, the U.S. federal government regulation of biotechnology is divided among three agencies:

- the United States Department of Agriculture, or USDA, regulates the import, field testing and interstate movement of specific types of genetic engineering that may be used in the creation of transgenic plants;
- the United States Environmental Protection Agency, or EPA, regulates activity related to the invention of plant pesticides and herbicides, which may include certain kinds of transgenic plants; and
- the FDA regulates foods derived from new plant varieties.

The FDA requires that transgenic plants meet the same standards for safety that are required for all other plants and foods in general. Except in the case of additives that significantly alter a food's structure, the FDA does not require any additional standards or specific approval for genetically engineered foods, but expects transgenic plant developers to consult the FDA before introducing a new food into the marketplace.

Use of our technology, if developed for human therapeutic applications, is also subject to FDA regulation. The FDA must approve any drug or biologic product before it can be marketed in the United States. In addition, prior to being sold outside of the United States, any products resulting from the application of our human therapeutic technology must be approved by the regulatory agencies of foreign governments. Prior to filing a new drug application or biologics license application with the FDA, we would have to perform extensive clinical trials, and prior to beginning any clinical trial, we would need to perform extensive preclinical testing which could take several years and may require substantial expenditures.

We believe that our current agricultural activities, which to date have been confined to research and development efforts, do not require licensing or approval by any governmental regulatory agency. However, we are performing clinical trials in connection with our human therapeutic applications, which is subject to FDA approval. Additionally, federal, state and foreign regulations relating to crop protection products and human therapeutic applications developed through biotechnology are subject to public concerns and political circumstances, and, as a result, regulations have changed and may change substantially in the future. Accordingly, we may become subject to governmental regulations or approvals or become subject to licensing requirements in connection with our research and development efforts. We may also be required

to obtain such licensing or approval from the governmental regulatory agencies described above, or from state agencies, prior to the commercialization of our genetically transformed plants and human therapeutic technology. In addition, our marketing partners who utilize our technology or sell products grown with our technology may be subject to government regulations. If unfavorable governmental regulations are imposed on our technology or if we fail to obtain licenses or approvals in a timely manner, we may not be able to continue our operations.

Preclinical studies of our human therapeutic applications may be unsuccessful, which could delay or prevent regulatory approval.

Preclinical studies may reveal that our human therapeutic technology is ineffective or harmful, and/or may be unsuccessful in demonstrating efficacy and safety of our human therapeutic technology, which would significantly limit the possibility of obtaining regulatory approval for any drug or biologic product manufactured with our technology. The FDA requires submission of extensive preclinical, clinical and manufacturing data to assess the efficacy and safety of potential products. Any delay in receiving approval for any applicable IND from the FDA would result in a delay in the commencement of the related clinical trial. Additionally, we could be required to perform additional preclinical studies prior to the FDA approving any applicable IND. Furthermore, the success of preliminary studies does not ensure commercial success, and later-stage clinical trials may fail to confirm the results of the preliminary studies.

Our success will depend on the success of our clinical trials of our human therapeutic applications.

It may take several years to complete the clinical trials of a product, and failure of one or more of our clinical trials can occur at any stage of testing. We believe that the development of our product candidate involves significant risks at each stage of testing. If clinical trial difficulties and failures arise, our product candidate may never be approved for sale or become commercially viable.

There are a number of difficulties and risks associated with clinical trials. These difficulties and risks may result in the failure to receive regulatory approval to sell our product candidate or the inability to commercialize our product candidate. The possibility exists that:

- we may discover that the product candidate does not exhibit the expected therapeutic results in humans, may cause harmful side effects or have other unexpected characteristics that may delay or preclude regulatory approval or limit commercial use if approved;
- the results from early clinical trials may not be statistically significant or predictive of results that will be obtained from expanded advanced clinical trials;
- institutional review boards or regulators, including the FDA, may hold, suspend or terminate our clinical research or the clinical trials of our product candidate for various reasons, including noncompliance with regulatory requirements or if, in their opinion, the participating subjects are being exposed to unacceptable health risks;
- subjects may drop out of our clinical trials;
- our preclinical studies or clinical trials may produce negative, inconsistent or

inconclusive results, and we may decide, or regulators may require us, to conduct additional preclinical studies or clinical trials; and

- the cost of our clinical trials may be greater than we currently anticipate.

Clinical trials for our human therapeutic technology will be lengthy and expensive and their outcome is uncertain.

Before obtaining regulatory approval for the commercial sales of any product containing our technology, we must demonstrate through clinical testing that our technology and any product containing our technology is safe and effective for use in humans. Conducting clinical trials is a time-consuming, expensive and uncertain process and typically requires years to complete. In our industry, the results from preclinical studies and early clinical trials often are not predictive of results obtained in later-stage clinical trials. Some products and technologies that have shown promising results in preclinical studies or early clinical trials subsequently fail to establish sufficient safety and efficacy data necessary to obtain regulatory approval. At any time during clinical trials, we or the FDA might delay or halt any clinical trial for various reasons, including:

- occurrence of unacceptable toxicities or side effects;
- ineffectiveness of the product candidate;
- negative or inconclusive results from the clinical trials, or results that necessitate additional studies or clinical trials;
- delays in obtaining or maintaining required approvals from institutions, review boards or other reviewing entities at clinical sites;
- delays in patient enrollment; or
- insufficient funding or a reprioritization of financial or other resources.

Any failure or substantial delay in successfully completing clinical trials and obtaining regulatory approval for our product candidates could severely harm our business.

If our clinical trials for our product candidates are delayed, we would be unable to commercialize our product candidates on a timely basis, which would materially harm our business.

Planned clinical trials may not begin on time or may need to be restructured after they have begun. Clinical trials can be delayed for a variety of reasons, including delays related to:

- obtaining an effective IND or regulatory approval to commence a clinical trial;
- negotiating acceptable clinical trial agreement terms with prospective trial sites;
- obtaining institutional review board approval to conduct a clinical trial at a prospective site;
- recruiting qualified subjects to participate in clinical trials;
- competition in recruiting clinical investigators;
- shortage or lack of availability of supplies of drugs for clinical trials;
- the need to repeat clinical trials as a result of inconclusive results or poorly executed testing;
- the placement of a clinical hold on a study;
- the failure of third parties conducting and overseeing the operations of our clinical trials to perform their contractual or regulatory obligations in a timely fashion; and

- exposure of clinical trial subjects to unexpected and unacceptable health risks or noncompliance with regulatory requirements, which may result in suspension of the trial.

We believe that our product candidate has significant milestones to reach, including the successful completion of clinical trials, before commercialization. If we have significant delays in or termination of clinical trials, our financial results and the commercial prospects for our product candidates or any other products that we may develop will be adversely impacted. In addition, our product development costs would increase and our ability to generate revenue could be impaired.

Any inability to license from third parties their proprietary technologies or processes which we use in connection with the development of our technology may impair our business.

Other companies, universities and research institutions have or may obtain patents that could limit our ability to use our technology in a product candidate or impair our competitive position. As a result, we would have to obtain licenses from other parties before we could continue using our technology in a product candidate. Any necessary licenses may not be available on commercially acceptable terms, if at all. If we do not obtain required licenses, we may not be able to develop our technology into a product candidate or we may encounter significant delays in development while we redesign methods that are found to infringe on the patents held by others.

Even if we receive regulatory approval, consumers may not accept products containing our technology, which will prevent us from being profitable since we have no other source of revenue.

We cannot guarantee that consumers will accept products containing our technology. Recently, there has been consumer concern and consumer advocate activism with respect to genetically-engineered agricultural consumer products. The adverse consequences from heightened consumer concern in this regard could affect the markets for agricultural products developed with our technology and could also result in increased government regulation in response to that concern. If the public or potential customers perceive our technology to be genetic modification or genetic engineering, agricultural products grown with our technology may not gain market acceptance.

We face potential product liability exposure far in excess of our limited insurance coverage.

We may be held liable if any product we or our collaborators develop causes injury or is found otherwise unsuitable during product testing, manufacturing, marketing or sale. Regardless of merit or eventual outcome, product liability claims could result in decreased demand for our product candidates, injury to our reputation, withdrawal of patients from our clinical trials, substantial monetary awards to trial participants and the inability to commercialize any products that we may develop. These claims might be made directly by consumers, health care providers, pharmaceutical companies or others selling or testing our products. We have obtained limited product liability insurance coverage for our clinical trials; however, our insurance may not reimburse us or may not be sufficient to reimburse us for expenses or losses we may suffer. Moreover, if insurance coverage becomes more expensive, we may not be able to maintain insurance coverage at a reasonable cost or in sufficient amounts to protect us against

losses due to liability. If we obtain marketing approval for any of our product candidates, we intend to expand our insurance coverage to include the sale of commercial products, but we may be unable to obtain commercially reasonable product liability insurance for any products approved for marketing. On occasion, juries have awarded large judgments in class action lawsuits for claims based on drugs that had unanticipated side effects. In addition, the pharmaceutical and biotechnology industries, in general, have been subject to significant medical malpractice litigation. A successful product liability claim or series of claims brought against us could harm our reputation and business and would decrease our cash reserves.

We depend on our key personnel and, if we are not able to attract and retain qualified scientific and business personnel, we may not be able to grow our business or develop and commercialize our technology.

We are highly dependent on our scientific advisors, consultants and third-party research partners. Our success will also depend in part on the continued service of our key employees and our ability to identify, hire and retain additional qualified personnel in an intensely competitive market. Although we have a research agreement with Dr. John Thompson, this agreement may be terminated upon short or no notice. Additionally, we do not have employment agreements with our key employees. We do not maintain key person life insurance on any member of management. The failure to attract and retain key personnel could limit our growth and hinder our research and development efforts.

Certain provisions of our charter, by-laws, Delaware law and stock plans could make a takeover difficult.

Certain provisions of our certificate of incorporation and by-laws could make it more difficult for a third party to acquire control of us, even if the change in control would be beneficial to stockholders. Our certificate of incorporation authorizes our board of directors to issue, without stockholder approval, except as may be required by the rules of the NYSE Amex, 5,000,000 shares of preferred stock with voting, conversion and other rights and preferences that could adversely affect the voting power or other rights of the holders of our common stock.

In addition, we are subject to the Business Combination Act of the Delaware General Corporation Law which, subject to certain exceptions, restricts certain transactions and business combinations between a corporation and a stockholder owning 15% or more of the corporation's outstanding voting stock for a period of three years from the date such stockholder becomes a 15% owner. These provisions may have the effect of delaying or preventing a change of control of us without action by our stockholders and, therefore, could adversely affect the value of our common stock.

Furthermore, in the event of our merger or consolidation with or into another corporation, or the sale of all or substantially all of our assets in which the successor corporation does not assume our outstanding equity awards or issue equivalent equity awards, our current equity plans require the accelerated vesting of such outstanding equity awards.

Risks Related to Our Common Stock

We currently do not meet the NYSE Amex continued listing standards. If our common stock is delisted from the NYSE Amex, we may not be able to list on any other stock exchange, and our common stock may be subject to the “penny stock” regulations which may affect the ability of our stockholders to sell their shares.

The NYSE Amex requires us to meet minimum financial requirements in order to maintain our listing. Currently, we do not meet the \$6,000,000 minimum net worth continued listing requirement of the NYSE Amex. Failure to regain compliance with the continued listing standards could result in our company being delisted from the NYSE Amex. If we are delisted from the NYSE Amex, our common stock likely will become a “penny stock.” In general, regulations of the SEC define a “penny stock” to be an equity security that is not listed on a national securities exchange and that has a market price of less than \$5.00 per share or with an exercise price of less than \$5.00 per share, subject to certain exceptions. If our common stock becomes a penny stock, additional sales practice requirements would be imposed on broker-dealers that sell such securities to persons other than certain qualified investors. For transactions involving a penny stock, unless exempt, a broker-dealer must make a special suitability determination for the purchaser and receive the purchaser’s written consent to the transaction prior to the sale. In addition, the rules on penny stocks require delivery, prior to and after any penny stock transaction, of disclosures required by the SEC.

If our stock is not accepted for listing on the NYSE Amex, we will make every possible effort to have it listed on the Over the Counter Bulletin Board, or the OTC Bulletin Board. If our common stock were to be traded on the OTC Bulletin Board, the Securities Exchange Act of 1934, as amended, and related SEC rules would impose additional sales practice requirements on broker-dealers that sell our securities. These rules may adversely affect the ability of stockholders to sell our common stock and otherwise negatively affect the liquidity, trading market and price of our common stock.

We believe that the listing of our common stock on a recognized national trading market, such as the NYSE Amex, is an important part of our business and strategy. Such a listing helps our stockholders by providing a readily available trading market with current quotations. Without that, stockholders may have a difficult time getting a quote for the sale or purchase of our stock, the sale or purchase of our stock would likely be made more difficult and the trading volume and liquidity of our stock would likely decline. The absence of such a listing may adversely affect the acceptance of our common stock as currency or the value accorded it by other parties. In that regard, the absence of a listing on a recognized national trading market will also affect our ability to benefit from the use of our operations and expansion plans, including for use in licensing agreements, joint ventures, the development of strategic relationships and acquisitions, which are critical to our business and strategy and none of which is currently the subject of any agreement, arrangement or understanding, with respect to any future financing or strategic relationship we may undertake. A delisting from the NYSE Amex could result in negative publicity and could negatively impact our ability to raise capital in the future.

Our management and other affiliates have significant control of our common stock and could significantly influence our actions in a manner that conflicts with our interests and the interests of other stockholders.

As of June 30, 2011, our executive officers and directors together beneficially own approximately 32.4% of the outstanding shares of our common stock, assuming the conversion of preferred stock and exercise of options and warrants which are currently exercisable or will become exercisable within 60 days of June 30, 2011, held by these stockholders. As a result, these stockholders, acting together, will be able to exercise significant influence over matters requiring approval by our stockholders, including the election of directors, and may not always act in the best interests of other stockholders. Such a concentration of ownership may have the effect of delaying or preventing a change in control of us, including transactions in which our stockholders might otherwise receive a premium for their shares over then-current market prices.

A significant portion of our total outstanding shares of common stock may be sold in the market in the near future, which could cause the market price of our common stock to drop significantly.

As of June 30, 2011, we had 77,769,677 shares of our common stock issued and outstanding and 4,890 shares of convertible preferred stock outstanding which can convert into 16,300,000 shares of common stock. Approximately 34,164,431 shares of such shares are registered pursuant to registration statements on Form S-3 and 59,905,246 of which are either eligible to be sold under SEC Rule 144 or are in the public float. In addition, we have registered 35,890,007 shares of our common stock underlying warrants previously issued on Form S-3 registration statements and we registered 23,005,003 shares of our common stock underlying options granted or to be granted under our stock option plan. Consequently, sales of substantial amounts of our common stock in the public market, or the perception that such sales could occur, may have a material adverse effect on our stock price.

Our common stock has a limited trading market, which could limit your ability to resell your shares of common stock at or above your purchase price.

Our common stock is quoted on the NYSE Amex and currently has a limited trading market. The NYSE Amex requires us to meet minimum financial requirements in order to maintain our listing. Currently, we do not meet the continued listing requirements of the NYSE Amex. If we do not regain compliance with the continued listing standards, we could be delisted. We cannot assure you that an active trading market will develop or, if developed, will be maintained. As a result, our stockholders may find it difficult to dispose of shares of our common stock and, as a result, may suffer a loss of all or a substantial portion of their investment.

The market price of our common stock may fluctuate and may drop below the price you paid.

We cannot assure you that you will be able to resell the shares of our common stock at or above your purchase price. The market price of our common stock may fluctuate significantly in response to a number of factors, some of which are beyond our control. These factors include:

- quarterly variations in operating results;
- the progress or perceived progress of our research and development efforts;
- changes in accounting treatments or principles;
- announcements by us or our competitors of new technology, product and service offerings, significant contracts, acquisitions or strategic relationships;
- additions or departures of key personnel;
- future offerings or resales of our common stock or other securities;
- stock market price and volume fluctuations of publicly-traded companies in general and development companies in particular; and
- general political, economic and market conditions.

For example, during the quarter ended June 30, 2011, our common stock traded between \$0.24 per share and \$0.32 per share.

Because we do not intend to pay, and have not paid, any cash dividends on our shares of common stock, our stockholders will not be able to receive a return on their shares unless the value of our common stock appreciates and they sell their shares.

We have never paid or declared any cash dividends on our common stock, and we intend to retain any future earnings to finance the development and expansion of our business. We do not anticipate paying any cash dividends on our common stock in the foreseeable future. Therefore, our stockholders will not be able to receive a return on their investment unless the value of our common stock appreciates and they sell their shares.

Our stockholders may experience substantial dilution as a result of the conversion of convertible preferred stock, the exercise of options and warrants to purchase our common stock, or due to anti-dilution provisions relating to any on the foregoing.

As of June 30, 2011, we have outstanding 4,890 shares of convertible preferred stock which may convert into 16,300,000 shares of our common stock and warrants to purchase 55,301,226 shares of our common stock. In addition, as of June 30, 2011, we have reserved 25,991,603 shares of our common stock for issuance upon the exercise of options granted or available to be granted pursuant to our stock option plan, all of which may be granted in the future. Furthermore, in connection with the preferred stock agreements, we are required to reserve an additional 21,785,192 shares of common stock. The conversion of the convertible preferred stock and the exercise of these options and warrants will result in dilution to our existing stockholders and could have a material adverse effect on our stock price. The conversion price of the convertible preferred stock and certain warrants are also subject to certain anti-dilution adjustments.

Item 1B. Unresolved Staff Comments.

None.

Item 2. Properties.

Through May 20, 2011, we leased office space in New Brunswick, New Jersey. Effective May 19, 2011, we lease office space in Bridgewater, New Jersey for a current monthly rental fee of \$5,703, subject to certain escalations for our proportionate share of increases, over the base year of 2011, in the building's operating costs. The lease expires on May 31, 2013 but can be extended at our option for one additional year. The space is in good condition, and we believe it will adequately serve as our headquarters over the term of the lease. We also believe that this office space is adequately insured by the lessor.

Item 3. Legal Proceedings.

We are not currently a party to any legal proceedings; however, we may become involved in various claims and legal actions arising in the ordinary course of business.

Item 4. Removed and Reserved.

PART II

Item 5. Market for Registrant's Common Equity, Related Stockholder Matters and Issuer Purchases of Equity Securities.

Our common stock trades on the NYSE Amex Exchange under the symbol SNT.

The following table sets forth the range of the high and low sales price for our common stock for each of the quarters since the quarter ended September 30, 2009, as reported on the NYSE Amex Exchange.

Quarter Ended	Common Stock	
	High	Low
September 30, 2009	\$0.83	\$0.43
December 31, 2009	\$0.49	\$0.30
March 31, 2010	\$0.51	\$0.25
June 30, 2010	\$0.75	\$0.30
September 30, 2010	\$0.42	\$0.25
December 31, 2010	\$0.33	\$0.22
March 31, 2011	\$0.36	\$0.23
June 30, 2011	\$0.32	\$0.24

As of September 26, 2011, the approximate number of holders of record of our common stock was 271. This number does not include "street name" or beneficial holders, whose shares are held of record by banks, brokers and other financial institutions.

We have neither paid nor declared dividends on our common stock since our inception, and we do not plan to pay dividends on our common stock in the foreseeable future. We expect that any earnings, which we may realize, will be retained to finance the growth of our company.

The following table provides information about the securities authorized for issuance under our equity compensation plans as of June 30, 2011.

EQUITY COMPENSATION PLAN INFORMATION

	Number of securities to be issued upon exercise of outstanding options, warrants and rights and restricted stock units	Weighted-average exercise price of outstanding options, warrants and rights and restricted stock units	Number of securities remaining available for future issuance under equity compensation plans
Equity compensation plans approved by security holders	11,348,314 ⁽¹⁾	\$0.78	14,643,289 ⁽²⁾
Equity compensation plans not approved by security holders	--	--	--
Total	11,348,314 ⁽¹⁾	\$0.78	14,643,289 ⁽²⁾

⁽¹⁾ Issued pursuant to our 1998 Stock Plan and 2008 Stock Plan.

⁽²⁾ Available for future issuance pursuant to our 2008 Stock Plan.

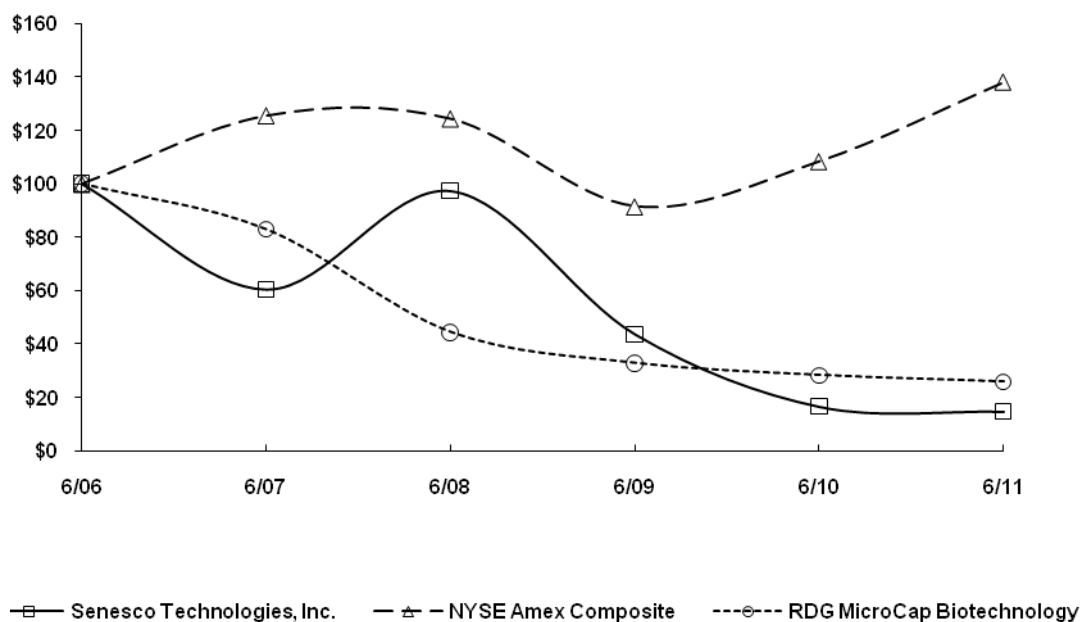

RECENT SALES OF UNREGISTERED SECURITIES; USE OF PROCEEDS FROM REGISTERED SECURITIES

None, except as previously disclosed on our Quarterly reports on Forms 10-Q and Current Reports on Forms 8-K.

PERFORMANCE GRAPH

The following graph compares the cumulative total stockholder return on our common stock with the cumulative total return on the NYSE Amex Market Value (U.S.) Index and the RDG Microcap Biotechnology Index for the period beginning July 1, 2006 and ending on the last day of our last completed fiscal year. The stock performance shown on the graph below is not indicative of future price performance.

Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations.

The discussion in “Management’s Discussion and Analysis of Financial Condition and Results of Operations” contains trend analysis, estimates and other forward-looking statements within the meaning of Section 27A of the Securities Act of 1933, as amended, and Section 21E of the Securities Exchange Act of 1934, as amended. These forward-looking statements include, without limitation, statements containing the words “believes,” “anticipates,” “expects,” “continue,” and other words of similar import or the negative of those terms or expressions. Such forward-looking statements are subject to known and unknown risks, uncertainties, estimates and other factors that may cause our actual results, performance or achievements, or industry results, to be materially different from any future results, performance or achievements expressed or implied by such forward-looking statements. Actual results could differ materially from those set forth in such forward-looking statements as a result of, but not limited to, the “Risk Factors” described in Part I, Item 1A. You should read the following discussion and analysis along with the “Selected Financial Data” and the financial statements and notes attached to those statements included elsewhere in this report.

Overview

We are a development stage company. We do not expect to generate significant revenues for several years, during which time we will engage in significant research and development efforts.

Our human therapeutic research program, which has consisted of pre-clinical *in-vitro* and *in-vivo* experiments designed to assess the role and method of action of the Factor 5A genes in human diseases, is performed by approximately twelve (12) third party researchers at our direction, at the University of Waterloo and other commercial research facilities.

We have developed a therapeutic candidate, SNS01-T, for the potential treatment of multiple myeloma. We have performed efficacy, toxicological and dose-finding studies *in vitro* in non-human and human cells and *in-vivo* in mice for SNS01. We have also completed our pivotal GLP toxicology studies in mice and dogs, employing SNS01-T, a slightly modified formulation of SNS01, and have an open IND, with the FDA. We have also been granted orphan drug status for SNS01-T by the FDA for the potential treatment of multiple myeloma.

We initiated a Phase 1b/2a clinical study with SNS01-T for treatment of multiple myeloma in September 2011 and are currently screening patients. We have selected Mayo Clinic as a clinical site and are considering adding an additional site. We recently met with our CRO to finalize the operational plans for the conduct and analysis of this open-label, multiple-dose, dose-escalation study, which will evaluate the safety and tolerability of SNS01-T when administered by intravenous infusion to relapsed or refractory multiple myeloma patients.

We may consider other human diseases in order to determine the role of Factor 5A and SNS01-T.

Additionally, we have seven active agricultural license agreements to develop and commercialize our technology in corn, soy, cotton, rice, canola, trees, alfalfa, and turf grass. The licenses provide for upfront payments, milestone payments and royalty payments to us upon

commercial introduction. We also have entered into a joint collaboration to develop and commercialize our technology in banana plants. In connection with the joint collaboration, we will receive 50% of the profits from the sale of enhanced banana plants.

Consistent with our commercialization strategy, we may license our technology for human health applications or for additional crops, as the opportunities may arise, that may result in additional license fees, revenues from contract research and other related revenues. Successful future operations will depend on our and our partners' ability to transform our research and development activities into a commercially feasible technology.

Critical Accounting Policies and Estimates

Revenue Recognition

We record revenue under technology license and development agreements related to the following. Actual fees received may vary from the recorded estimated revenues.

- Nonrefundable upfront license fees that are received in exchange for the transfer of our technology to licensees, for which no further obligations to the licensee exist with respect to the basic technology transferred, are recognized as revenue on the earlier of when payments are received or collections are assured.
- Nonrefundable upfront license fees that are received in connection with agreements that include time-based payments are, together with the time-based payments, deferred and amortized ratably over the estimated research period of the license.
- Milestone payments, which are contingent upon the achievement of certain research goals, are recognized as revenue when the milestones, as defined in the particular agreement, are achieved.

The effect of any change in revenues from technology license and development agreements would be reflected in revenues in the period such determination was made. Historically, no such adjustments have been made.

Estimates of Expenses

Our research and development agreements with third parties provide for an estimate of our expenses and costs, which are variable and are based on the actual services performed by the third party. We estimate the aggregate amount of the expenses based upon the projected amounts that are set forth in the agreements, and we accrue the expenses for which we have not yet been invoiced or prepay the expenses that have been invoiced but the services have not yet been performed. In estimating the expenses, we consider, among other things, the following factors:

- the existence of any prior relationship between us and the third party provider;
- the past results of prior research and development services performed by the third party provider; and
- the scope and timing of the research and development services set forth in the agreement with the third party provider.

After the research services are performed and we are invoiced, we make any adjustments that are necessary to accurately report research and development expense for the period.

Income Taxes

We account for income taxes in accordance with an asset and liability approach requiring the recognition of deferred tax assets and liabilities for the expected tax consequences of events that have been recognized in the financial statements or tax returns. Deferred tax assets and liabilities are recorded without consideration as to their ability to be realized. The deferred tax asset includes net operating loss and credit carryforwards, and the cumulative temporary differences related to stock-based compensation. The portion of any deferred tax asset, for which it is more likely than not that a tax benefit will not be realized, must then be offset by recording a

valuation allowance against the asset.

In assessing the realizability of deferred tax assets, management considers whether it is more likely than not that some portion or all of the deferred tax assets will not be realized. The ultimate realization of deferred tax assets is dependent upon the generation of future taxable income during the periods in which those temporary differences become deductible. Management considers the scheduled reversal of deferred tax liabilities, projected future taxable income and tax planning strategies in making this assessment. Management believes it is more likely than not that we will not realize the deferred tax assets in excess of deferred tax liabilities, and as such, a full valuation allowance is maintained against the net deferred tax assets.

While we believe that our tax positions are fully supportable, there is a risk that certain positions could be challenged successfully. In these instances, we look to establish reserves. If we determine that a tax position is more likely than not of being sustained upon audit, based solely on the technical merits of the position, we recognize the benefit. We measure the benefit by determining the amount that has likelihood greater than 50% of being realized upon settlement. We presume that all tax positions will be examined by a taxing authority with full knowledge of all relevant information. We regularly monitor our tax positions, tax assets and tax liabilities. We reevaluate the technical merits of our tax positions and recognize an uncertain tax benefit or derecognize a previously recorded tax benefit when (i) there is a completion of a tax audit, (ii) there is a change in applicable tax law including a tax case or legislative guidance, or (iii) there is an expiration of the statute of limitations. Significant judgment is required in accounting for tax reserves.

Stock-based Compensation

We measure all employee stock-based compensation awards using a fair value method and record such expense in our consolidated financial statements. Such expense is amortized on a straight line basis over the requisite service period of the award.

We estimate the grant date fair value of stock options using the Black-Scholes option-pricing model which requires the input of highly subjective assumptions. These assumptions include estimating the expected term of the award and the estimated volatility of our stock price over the expected term. Changes in these assumptions and in the estimated forfeitures of stock option awards may materially affect the amount of stock-based compensation recognized in our consolidated statements of operations.

In connection with our short-term and long-term incentive plans, our management reviews the specific goals of such plans to determine if such goals have been achieved or are probable that they will be achieved. If the goals have been achieved or are probable of being achieved, then the amount of compensation expense determined on the date of grant related to those specific goals is charged to compensation expense at such time.

Intangible Assets

We test all intangible assets for recoverability whenever events or changes in circumstances indicate that we may not be able to recover an asset's carrying amount. We

evaluate the recoverability of an asset by comparing its carrying amount to the undiscounted cash flows expected to result from the use and eventual disposition of that asset. If the undiscounted cash flows are not sufficient to recover the carrying amount, we measure any impairment loss as the excess of the carrying amount of the asset over its fair value. Events which could trigger asset impairment include significant underperformance relative to historical or projected future operating results, significant changes in the manner or use of an asset or in our overall business strategy, significant negative industry or economic trends, shortening of product life-cycles, negative changes in third party reimbursement, or changes in technology.

As of June 30, 2011, we have determined that the estimated future discounted cash flows related to our patent applications, after the write off of patents abandoned, will be sufficient to recover their carrying value.

Warrant Liability

We compute valuations each quarter using the Black-Scholes model, which requires the input of subjective assumptions for volatility, for warrants that have an exercise price reset feature to account for the various possibilities that could occur due to changes in the inputs to the Black-Scholes model as a result of contractually-obligated changes. We effectively weight each calculation based on the likelihood of occurrence to determine the value of the derivative at the reporting date. The fair value of the warrants that have cash settlement features is estimated using the Black-Scholes model. Changes in these assumptions may materially affect the amount of the warrant liability recorded on our consolidated balance sheet.

Convertible Preferred Stock

During the year ended June 30, 2010, we issued convertible preferred stock and warrants for gross proceeds in the amount of \$11,497,000. The proceeds have been allocated between convertible preferred stock and warrants based upon their fair values, whereby the fair value of the warrants have been determined using the Black-Scholes model. Such amount was recorded as a liability. The remaining amounts were allocated to the convertible preferred stock and were recorded as equity.

Liquidity and Capital Resources

Overview

As of June 30, 2011, our cash balance totaled \$3,609,954, and we had working capital of \$1,787,579. As of June 30, 2011, we had a federal tax loss carryforward of approximately \$40,935,000 and a state tax loss carry-forward of approximately \$33,569,000 to offset future taxable income. We cannot assure you that we will be able to take advantage of any or all of such tax loss carryforwards, if at all, in future fiscal years.

Contractual Obligations

The following table lists our cash contractual obligations as of June 30, 2011:

Contractual Obligations	Payments Due by Period				
	Total	Less than 1 year	1 - 3 years	3 - 5 years	More than 5 years
Research and Development Agreements ⁽¹⁾	\$ 580,206	\$ 483,484	\$ 96,722	\$ --	\$ --
Facility, Rent and Operating Leases ⁽²⁾	\$ 131,171	\$ 68,437	\$ 62,734	\$ --	\$ --
Employment, Consulting and Scientific Advisory Board Agreements ⁽³⁾	\$ 166,500	\$ 92,333	\$ 74,167	\$ --	\$ --
Total Contractual Cash Obligations	\$ 877,877	\$644,254	\$ 233,623	\$ --	\$ --

- (1) Certain of our research and development agreements disclosed herein provide that payment is to be made in Canadian dollars and, therefore, the contractual obligations are subject to fluctuations in the exchange rate.
- (2) The lease for our office space in Bridgewater, New Jersey is subject to certain escalations for our proportionate share of increases in the building's operating costs.
- (3) Certain of our consulting agreements provide for automatic renewal, which is not reflected in the table, unless terminated earlier by the parties to the respective agreements.

Effective June 20, 2011, we entered into a Master Services Agreement with Criterium under which CRITERIUM will provide professional and technical services in connection with the management of our planned Phase 1b/2a clinical trial for the treatment of multiple myeloma. The agreement has an initial term that commences on the date of the agreement and runs for a period of eighteen (18) months. Our financial obligation under the agreement is estimated to be \$483,608 and is included in the above table.

Effective August 15, 2011, we entered into a Clinical Trial Research Agreement with Mayo Clinic, or MAYO, under which MAYO will perform our planned Phase 1b/2a clinical trial for the treatment of multiple myeloma. The agreement has an initial term that commences on the

date of the agreement and continues until the study is completed and all final study documentation required to be provided is received and accepted by us. Our financial obligation under the agreement includes a fixed cost and a cost per patient and is not included in the above table.

Effective September 1, 2011, we extended our research and development agreement with the University of Waterloo for an additional one-year period through August 31, 2012, in the amount of CAD \$555,900, or approximately USD \$567,000 and is not included in the above table. Research and development expenses under this agreement aggregated USD \$622,872 for the year ended June 30, 2011, USD \$672,693 for the year ended June 30, 2010, USD \$653,104 for the year ended June 30, 2009 and USD \$6,575,933 for the cumulative period from inception through June 30, 2011.

We expect our capital requirements to increase significantly over the next several years as we commence new research and development efforts, increase our business and administrative infrastructure and embark on developing in-house business capabilities and facilities. Our future liquidity and capital funding requirements will depend on numerous factors, including, but not limited to, the levels and costs of our research and development initiatives and the cost and timing of the expansion of our business development and administrative staff.

Capital Resources

Since inception, we have generated revenues of \$1,590,000 in connection with the initial fees and milestone payments received under our license and development agreements. We have also received \$244,479 in grants. We have not been profitable since inception, we will continue to incur additional operating losses in the future, and we will require additional financing to continue the development and subsequent commercialization of our technology. While we do not expect to generate significant revenues from the licensing of our technology for several years, we may enter into additional licensing or other agreements with marketing and distribution partners that may result in additional license fees, receive revenues from contract research, or other related revenue.

Financing

On December 22, 2010, we initiated an ATM offering pursuant to which we, from time to time, may issue and sell shares of our common stock, par value \$0.01 per share, with an aggregate offering price of up to \$5,500,000. Such common stock will be offered and sold pursuant to a prospectus supplement filed with the Securities and Exchange Commission in connection with our shelf registration statement on Form S-3 (File No. 333-170140), which became effective on November 9, 2010.

Upon delivery of a placement notice by us, if any, the placement agent may sell the common stock in any method permitted by law deemed to be an “at the market” offering as defined in Rule 415 promulgated under the Securities Act of 1933, as amended, at prices prevailing at the time of sale or at prices related to such prevailing market prices, including sales made directly on the NYSE Amex LLC, or NYSE Amex, or sales made through a market maker other than on an exchange. The placement agent will make all sales using commercially reasonable efforts consistent with its normal sales and trading practices on mutually agreed upon

terms between the placement agent and us. We will pay the placement agent a commission of up to 6% of the gross proceeds from the sale of shares of the common stock, depending on the per share sales price. We have agreed to reimburse a portion of the placement agent's expenses in connection with the offering, up to an aggregate amount of \$25,000. In addition, we granted customary indemnification rights to the placement agent.

The ATM will terminate upon the earlier of (1) the sale of all of the common stock subject to the ATM, or (2) upon termination by us or the placement agent. The placement agent may terminate the ATM in certain circumstances, including the occurrence of a material adverse change that, in the placement agent's reasonable judgment, may impair its ability to sell the common stock, our failure to satisfy any condition under the ATM or a suspension or limitation of trading of the common stock on the NYSE Amex. In addition, either we or the placement agent may terminate the ATM at any time and for any reason upon 10 days prior notice to the other party.

During the year ended June 30, 2011, we issued 5,911,457 shares of common stock under the ATM for gross proceeds in the amount of \$1,853,419. From July 1, 2011 through September 26, 2011, we issued an additional 1,730,211 shares of common stock under the ATM for gross proceeds in the amount of \$481,368.

We anticipate that, based upon our current cash balance at June 30, 2011 and the funds received under the ATM subsequent to June 30, 2011, we will be able to fund our operations through March 2012. However, we have the ability to raise additional capital through our ATM facility, utilize our unused line of credit and, if necessary, delay certain costs which will provide us with enough cash to fund our operations at least through June 30, 2012.

Over the next 12 months, we plan to fund our research and development and commercialization activities by:

- utilizing our current cash balance and investments,
- achieving some of the milestones set forth in our current licensing agreements,
- through the execution of additional licensing agreements for our technology, and
- through the placement of equity or debt instruments.

We cannot assure you that we will be able to raise money through any of the foregoing transactions, or on favorable terms, if at all.

Results of Operations

Fiscal Year ended June 30, 2011

Revenue

We did not earn any revenue during the fiscal year ended June 30, 2011. During the fiscal year ended June 30, 2010, we earned revenue in the amount of \$140,000, which consisted of milestone payments in connection with certain agricultural license agreements.

We anticipate that we will receive future milestone payments in connection with our current agricultural development and license agreements. Additionally, we anticipate that we may receive future royalty payments from our license agreements when our partners commercialize their crops containing our technology. However, it is difficult for us to determine our future revenue expectations because we are a development stage biotechnology company with no history of receiving development milestone payments or royalties, and the timing and outcome of our experiments, the timing of signing new partners and the timing of our partners moving through the development process into commercialization is difficult to accurately predict.

Operating expenses

	<u>2011</u>	<u>Year Ended June 30,</u> <u>2010</u>	<u>Change</u>	<u>%</u>
General and administrative	\$ 2,610,222	\$ 2,349,116	\$ 261,106	11 %
Research and development	<u>3,720,394</u>	<u>2,637,407</u>	<u>1,082,987</u>	<u>41 %</u>
Total operating expenses	<u>\$ 6,330,616</u>	<u>\$ 4,986,523</u>	<u>\$ 1,344,093</u>	<u>27 %</u>

We expect operating expenses to increase over the next 12 months as we anticipate that research and development expenses and other general and administrative expenses will increase as we continue to expand our research and development activities.

General and administrative expenses

General and administrative expenses consist of the following:

	<u>Year ended June 30,</u>	
	<u>2011</u>	<u>2010</u>
Stock-based compensation	\$ 709,207	\$ 433,414
Payroll and benefits	568,597	655,958
Investor relations	260,455	250,893
Professional fees	425,640	509,838
Depreciation and amortization	143,274	126,567
Other general and administrative expenses	<u>503,049</u>	<u>372,446</u>
Total general and administrative expenses	<u>\$ 2,610,222</u>	<u>\$2,349,116</u>

- Stock-based compensation in Fiscal 2011 and 2010 consisted of the amortized portion of the Black-Scholes value of options, restricted stock units and warrants granted to directors, employees and consultants. During Fiscal 2011 and 2010, the following options and warrants were granted to such individuals:

	<u>Fiscal 2011</u>	<u>Fiscal 2010</u>
Options	4,579,142	2,951,760
Warrants	305,000	154,184

Stock-based compensation in Fiscal 2011 was higher than in Fiscal 2010 primarily due to the greater number of options and warrants granted.

- Payroll and benefits in Fiscal 2011 was lower than in Fiscal 2010 primarily due to the resignation of the VP-Corporate Development during Fiscal 2010.
- Investor relations expense in Fiscal 2011 was higher than in Fiscal 2010 primarily as a result of an increase in investor relations consulting costs.
- Professional fees in Fiscal 2011 were lower than in Fiscal 2010 primarily as a result of a decrease in legal fees. Legal fees decreased primarily due to discounts negotiated with our law firm and not incurring fees related to the resignation of our former President and CEO and the VP-Corporate Development, the redemption of our convertible notes, the Stanford bankruptcy and other regulatory issues which were incurred in Fiscal 2010.
- Depreciation and amortization in Fiscal 2011 was higher than in Fiscal 2010 primarily as a result of an increase in amortization of patent costs.

We expect general and administrative expenses to modestly increase over the next 12 months primarily due to an increase in payroll and benefits and insurance costs related to our multiple myeloma project.

Research and development expenses

	<u>Year Ended June 30,</u>			
	<u>2011</u>	<u>2010</u>	<u>Change</u>	<u>%</u>
Stock-based compensation	\$ 41,159	\$ 7,025	\$ 34,134	486%
Other research and development	<u>3,679,235</u>	<u>2,630,382</u>	<u>1,048,853</u>	<u>40%</u>
Total research and development	<u>\$3,720,394</u>	<u>\$2,637,407</u>	<u>\$ 1,082,987</u>	<u>41%</u>

- Stock-based compensation in Fiscal 2011 was higher than in Fiscal 2010 primarily because the number of options granted during Fiscal 2011 was higher than in Fiscal 2010.
- Other research and development costs in Fiscal 2011 was higher than in Fiscal 2010 primarily as a result of the expansion of our human therapeutic programs, specifically performing the pivotal toxicology study and submitting the IND for our multiple myeloma project.

The breakdown of our research and development expenses between our agricultural and human therapeutic research programs are as follows:

	<u>Year ended June 30,</u>			
	<u>2011</u>	<u>%</u>	<u>2010</u>	<u>%</u>
Agricultural research programs	\$ 467,141	13%	\$ 553,620	21%
Human therapeutic research programs	<u>3,253,253</u>	<u>87%</u>	<u>2,083,787</u>	<u>79%</u>
Total research and development expenses	<u>\$3,720,394</u>	<u>100%</u>	<u>\$2,637,407</u>	<u>100%</u>

- Agricultural research expenses in Fiscal 2011 were lower than in Fiscal 2010 primarily as a result of a decrease in the allocation of payroll from agriculture to human therapeutics.
- Human therapeutic research expenses in Fiscal 2011 were higher than in Fiscal 2010 primarily as a result of the progress of the ongoing multiple myeloma project.

We expect the percentage of human therapeutic research programs to increase as a percentage of the total research and development expenses as we continue to expand our human therapeutic initiatives.

Other non-operating income and expense

Grant income

We received grant income under the Qualified Therapeutic Discovery Project in the amount of \$244,479 during Fiscal 2011. The funds were granted in connection with our program for the use of our lead therapeutic candidate, SNS01-T, in multiple myeloma.

Fair value – warrant liability

This decrease of \$1,782,535 was primarily due to a decrease in the number of warrants that are accounted for as a liability as the terms that gave rise to liability accounting for these warrants were modified by the holders during Fiscal 2011. Accordingly, \$1,173,296 of the decrease was recorded as an increase to capital in excess of par with the balance of the decrease in the amount of \$609,239 being recorded as income from the change in the Black-Scholes value of the remaining warrants.

Other noncash expense or income

During Fiscal 2011, the exercise price of 4,088,540 warrants was adjusted from \$0.50 to \$0.32 in exchange for those warrant holders giving up their right to future adjustments to the exercise price. This resulted in a charge to stock-based compensation of \$115,869.

Write-off of patents abandoned

During Fiscal 2011, we reviewed our patent portfolio in order to determine if we could reduce our cost of patent prosecution and maintenance. We identified several patents and patents pending that we believe we no longer need to maintain without having a material impact on the portfolio. We determined that we would no longer incur the cost to prosecute or maintain those patents or patents pending. Therefore, we wrote-off the net book value of those patents and patents pending in the amount of \$1,588,087.

Interest (expense) income

	<u>Year Ended June 30,</u>			
	<u>2011</u>	<u>2010</u>	<u>Change</u>	<u>%</u>
Interest expense	\$(110,649)	\$(34,772)	\$ (75,877)	(218)%
Interest income	<u>22,527</u>	<u>10,637</u>	<u>11,890</u>	<u>112 %</u>
Interest expense, net	<u>\$ (88,122)</u>	<u>\$(24,135)</u>	<u>\$ (63,987)</u>	<u>(265)%</u>

- Interest expense in Fiscal 2011 was higher than in Fiscal 2010 due to the interest incurred on the \$3,000,000 line of credit, of which approximately \$2,200,000 was utilized during the entirety of Fiscal 2011, but only for the last five months of Fiscal 2010.
- Interest income in Fiscal 2011 was higher than in Fiscal 2010 due to a higher average cash and investment balance during the year.

Fiscal Year ended June 30, 2010

Revenue

During the fiscal year ended June 30, 2010, we earned revenue in the amount of \$140,000, which consisted of milestone payments in connection with certain agricultural license agreements. During the fiscal year ended June 30, 2009, we earned revenue in the amount of \$275,000, which consisted of milestone payments received in connection with certain agricultural license agreements.

Operating expenses

	<u>2010</u>	<u>Year Ended June 30,</u> <u>2009</u>	<u>Change</u>	<u>%</u>
General and administrative	\$ 2,349,116	\$ 2,205,739	\$ 143,377	7 %
Research and development	<u>2,637,407</u>	<u>2,353,962</u>	<u>283,445</u>	<u>12 %</u>
Total operating expenses	<u>\$ 4,986,523</u>	<u>\$ 4,559,701</u>	<u>\$ 426,822</u>	<u>9 %</u>

General and administrative expenses

General and administrative expenses consist of the following:

	<u>Year ended June 30,</u>	
	<u>2010</u>	<u>2009</u>
Stock-based compensation	\$ 433,414	\$ 445,255
Payroll and benefits	655,958	689,834
Investor relations	250,893	244,537
Professional fees	509,838	415,767
Depreciation and amortization	126,567	111,753
Other general and administrative expenses	<u>372,446</u>	<u>98,593</u>
Total general and administrative expenses	<u>\$2,349,116</u>	<u>\$2,205,739</u>

- Stock-based compensation in Fiscal 2010 and 2009 consisted of the amortized portion of the Black-Scholes value of options, restricted stock units and warrants granted to directors, employees and consultants. During Fiscal 2010 and 2009, the following options, restricted stock units and warrants were granted to such individuals:

	<u>Fiscal 2010</u>	<u>Fiscal 2009</u>
Options	2,951,760	834,812
Restricted Stock Units	-	136,000
Warrants	-	500

Stock-based compensation in Fiscal 2010 was lower than in Fiscal 2009 primarily due to a lower Black-Scholes value of the options granted due to a lower average stock price during Fiscal 2010.

- Payroll and benefits in Fiscal 2010 was lower than in Fiscal 2009 primarily due to the resignation of the former President and CEO and the VP-Corporate Development during Fiscal 2010.
- Investor relations expense in Fiscal 2010 was higher than in Fiscal 2009 primarily as a result of an increase in investor relations consulting costs.
- Professional fees in Fiscal 2010 were higher than in Fiscal 2009 primarily as a result of an increase in legal fees. Legal fees increased primarily due to the resignation of our former President and CEO and the VP-Corporate Development, the redemption of our convertible notes, the Stanford bankruptcy and other regulatory issues.
- Depreciation and amortization in Fiscal 2010 was higher than in Fiscal 2009 primarily as a result of an increase in amortization of patent costs.

Research and development expenses

	<u>Year Ended June 30,</u>			
	<u>2010</u>	<u>2009</u>	<u>Change</u>	<u>%</u>
Stock-based compensation	\$ 7,025	\$ 61,592	\$ (54,567)	(89)%
Other research and development	<u>2,630,382</u>	<u>2,292,370</u>	<u>338,012</u>	<u>15 %</u>
Total research and development	<u>\$ 2,637,407</u>	<u>\$ 2,353,962</u>	<u>\$ 283,445</u>	<u>12 %</u>

- Stock-based compensation in Fiscal 2010 was lower than in Fiscal 2009 primarily because the number of options vested during Fiscal 2010 were lower than in Fiscal 2009.
- Other research and development costs in Fiscal 2010 was higher than in Fiscal 2009 primarily as a result of the expansion of our human therapeutic programs, specifically our multiple myeloma project and an increase in the cost of our research agreement with the University of Waterloo due to the weakening of the U.S. dollar against the Canadian dollar.

The breakdown of our research and development expenses between our agricultural and human therapeutic research programs are as follows:

	<u>Year ended June 30,</u>			
	<u>2010</u>	<u>%</u>	<u>2009</u>	<u>%</u>
Agricultural research programs	\$ 553,620	21%	\$ 617,783	26%
Human therapeutic research programs	<u>2,083,787</u>	<u>79%</u>	<u>1,736,179</u>	<u>74%</u>
Total research and development expenses	<u>\$2,637,407</u>	<u>100%</u>	<u>\$2,353,962</u>	<u>100%</u>

- Agricultural research expenses in Fiscal 2010 were lower than in Fiscal 2009 primarily as a result of a decrease in the allocation of payroll from agriculture to human therapeutics.
- Human therapeutic research expenses in Fiscal 2010 were higher than in Fiscal 2009 primarily as a result of the progress of the ongoing multiple myeloma project.

Other non-operating income and expense

Fair value – warrant liability

This decrease of \$2,516,661 was due to a decrease in the Black-Scholes value of the underlying warrants.

Amortization of debt discount and financing costs

During Fiscal 2008, we issued \$10,000,000 of convertible notes and warrants. The discount on the convertible notes was being amortized, using the effective yield method over the term of the convertible notes. The related costs of issuance were recorded as deferred financing costs and were being amortized on a straight line basis over the term of the convertible notes. As of June 30, 2010, all of the notes had been converted or redeemed and the unamortized portion of the convertible notes and deferred financing costs were fully amortized. As of June 30, 2009, \$9,455,000 of convertible notes were outstanding.

Interest expense – convertible notes

Interest expense – convertible notes represents the fair value of the common stock issued in lieu of paying cash for the 8% coupon rate of interest related to the convertible notes issued during Fiscal 2008.

Interest (expense) income

		<u>Year Ended June 30,</u>		
	<u>2010</u>	<u>2009</u>	<u>Change</u>	<u>%</u>
Interest expense	\$(34,772)	-	\$(34,772)	-
Interest income	<u>10,637</u>	<u>\$43,076</u>	<u>(32,439)</u>	<u>(75)%</u>
Interest (expense) income, net	<u>\$(24,135)</u>	<u>\$43,076</u>	<u>\$(67,211)</u>	<u>(156)%</u>

- Interest expense in Fiscal 2010 was higher than in Fiscal 2009 due to the interest incurred on the \$3,000,000 line of credit, of which approximately \$2,200,000 was utilized during the last five months of Fiscal 2010.
- Interest income in Fiscal 2010 was lower than in Fiscal 2009 due to a lower average cash and investments balance during the year and lower interest rates.

Item 7A. Quantitative and Qualitative Disclosures About Market Risk.

Foreign Currency Risk

Our financial statements are denominated in United States dollars and, except for our agreement with the University of Waterloo, which is denominated in Canadian dollars, all of our contracts are denominated in United States dollars. Therefore, we believe that fluctuations in foreign currency exchange rates will not result in any material adverse effect on our financial condition or results of operations. In the event we derive a greater portion of our revenues from international operations or in the event a greater portion of our expenses are incurred internationally and denominated in a foreign currency, then changes in foreign currency exchange rates could affect our results of operations and financial condition.

Interest Rate Risk

We invest in high-quality financial instruments, primarily money market funds, with an effective duration of the portfolio of less than one year which we believe are subject to limited credit risk. We currently do not hedge our interest rate exposure. Due to the short-term nature of our investments, which we plan to hold until maturity, we do not believe that we have any material exposure to interest rate risk arising from our investments.

Item 8. Financial Statements and Supplementary Data.

The financial statements required to be filed pursuant to this Item 8 are included in this Annual Report on Form 10-K. A list of the financial statements filed herewith is found at "Item 15. Exhibits, Financial Statement Schedules."

Item 9. Changes in and Disagreements with Accountants on Accounting and Financial Disclosure.

None.

Item 9A. Controls and Procedures.

Disclosure Controls and Procedures

Our management, with the participation of our chief executive officer and chief financial officer, evaluated the effectiveness of our disclosure controls and procedures (as defined in Rules 13a-15(e) and 15d-15(e) under the Exchange Act) as of the end of the period covered by this Annual Report on Form 10-K. Based on this evaluation, our chief executive officer and chief financial officer have concluded that, as of the end of such period, our disclosure controls and procedures were effective.

Internal Control Over Financial Reporting

Management's Annual Report on Internal Control Over Financial Reporting

Our company's management is responsible for establishing and maintaining adequate internal control over financial reporting. Internal control over financial reporting is defined in Rules 13a-15(f) and 15d-15(f) under the Exchange Act as a process designed by, or under the supervision of, our company's principle executive and principal financial officers and effected by our company's board of directors, management and other personnel to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles in the U.S. and includes those policies and procedures that:

- Pertain to the maintenance of records that in reasonable detail accurately and fairly reflect the transactions and dispositions of the assets of our company;
- Provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of our company are being made only in accordance with authorization of management and directors of our company; and
- Provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use or disposition of our company's assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Projections of any evaluation of effectiveness to future periods are subject to the risks that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Management assessed the effectiveness of our company's internal control over financial reporting as of June 30, 2011. In making this assessment, management used the criteria established in *Internal Control-Integrated Framework* issued by the Committee of Sponsoring Organizations of the Treadway Commission, or COSO.

Based on this assessment, management has concluded that, as of June 30, 2011 our company's internal control over financial reporting is effective.

Management's report was not subject to attestation by the company's registered public accounting firm pursuant to applicable law that permits the Company to provide only management's report in this annual report.

Changes in Internal Controls Over Financial Reporting

No change in our internal controls over financial reporting (as defined in Rules 13a-15(f) and 15d-15(f) under the Exchange Act) occurred during the fiscal year ended June 30, 2011 that has materially affected, or is reasonably likely to materially affect, our internal controls over financial reporting.

Item 9B. Other Information.

None.

PART III

Item 10. Directors, Executive Officers and Corporate Governance.

The information relating to our directors, nominees for election as directors and executive officers under the headings "Election of Directors" and "Executive Officers" in our definitive proxy statement for the 2012 Annual Meeting of Stockholders is incorporated herein by reference to such proxy statement.

Item 11. Executive Compensation.

The discussion under the heading "Executive Compensation" in our definitive proxy statement for the 2012 Annual Meeting of Stockholders is incorporated herein by reference to such proxy statement.

Item 12. Security Ownership of Certain Beneficial Owners and Management and Related Stockholder Matters.

The discussion under the heading "Security Ownership of Certain Beneficial Owners and Management" in our definitive proxy statement for the 2012 Annual Meeting of Stockholders is incorporated herein by reference to such proxy statement.

Item 13. Certain Relationships and Related Transactions, and Director Independence.

The discussion under the heading "Certain Relationships and Related Transactions" in our definitive proxy statement for the 2012 Annual Meeting of Stockholders is incorporated herein by reference to such proxy statement.

Item 14. Principal Accounting Fees and Services.

The discussion under the heading "Principal Accountant Fees and Services" in our definitive proxy statement for the 2012 Annual Meeting of Stockholders is incorporated herein by reference to such proxy statement.

PART IV

Item 15. Exhibits and Financial Statement Schedules.

- (a) (1) Financial Statements.

Reference is made to the Index to Financial Statements on Page F-1.

- (a) (2) Financial Statement Schedules.

None.

- (a) (3) Exhibits.

Reference is made to the Exhibit Index on Page 54.

SIGNATURES

Pursuant to the requirements of Section 13 or 15(d) of the Securities Exchange Act of 1934, the Registrant has duly caused this report to be signed on its behalf by the undersigned, thereunto duly authorized this 28th day of September 2011.

SENESCO TECHNOLOGIES, INC.

EXHIBIT INDEX

<u>Exhibit No.</u>	<u>Description of Exhibit</u>
2.1	Merger Agreement and Plan of Merger by and among Nava Leisure USA, Inc., an Idaho corporation, the Principal Stockholders (as defined therein), Nava Leisure Acquisition Corp., and Senesco, Inc., dated October 9, 1998. (Incorporated by reference to Senesco Technologies, Inc. definitive proxy statement on Schedule 14A dated January 11, 1999.)
2.2	Merger Agreement and Plan of Merger by and between Senesco Technologies, Inc., an Idaho corporation, and Senesco Technologies, Inc., a Delaware corporation, dated September 30, 1999. (Incorporated by reference to Senesco Technologies, Inc. quarterly report on Form 10-QSB for the period ended September 30, 1999.)
3.1	Amended and Restated Certificate of Incorporation of Senesco Technologies, Inc. filed with the State of Delaware on January 22, 2007. (Incorporated by reference to Senesco Technologies, Inc. quarterly report on Form 10-Q for the period ended December 31, 2006.)
3.2	Certificate of Amendment to the Amended and Restated Certificate of Incorporation of Senesco Technologies, Inc. filed with the State of Delaware on January 22, 2008. (Incorporated by reference to Exhibit 3.1 of Senesco Technologies, Inc. quarterly report on Form 10-Q for the period ended December 31, 2007.)
3.3	Certificate of Amendment to the Amended and Restated Certificate of Incorporation of Senesco Technologies, Inc. filed with the State of Delaware on September 22, 2009. (Incorporated by reference to Exhibit 3.3 of Senesco Technologies, Inc. annual report on Form 10-K/A for the period ended June 30, 2009.)
3.4	Certificate of Amendment to the Amended and Restated Certificate of Incorporation of Senesco Technologies, Inc. filed with the State of Delaware on May 25, 2010. (Incorporated by reference to Exhibit 3.1 to Senesco Technologies, Inc. current report on Form 8-K filed on May 28, 2010.)
3.5	Amended and Restated By-laws of Senesco Technologies, Inc. as adopted on October 2, 2000. (Incorporated by reference to Senesco Technologies, Inc. quarterly report on Form 10-QSB for the period ended December 31, 2000.)
3.6	Certificate of Designations to the Company's Certificate of Incorporation (Series A)(Incorporated by reference to Exhibit 3.1 to Senesco Technologies, Inc. current report on Form 8-K filed on March 29, 2010)
3.7	Certificate of Designations to the Company's Certificate of Incorporation (Series B)(Incorporated by reference to Exhibit 3.2 to Senesco Technologies, Inc. current report on Form 8-K filed on March 29, 2010)
4.1	Form of Warrant issued to Stanford Venture Capital Holdings, Inc. and certain officers of Stanford Venture Capital Holdings, Inc. (with attached schedule of parties and terms thereto). (Incorporated by reference to Exhibit 4.1 of Senesco Technologies, Inc. quarterly report on Form 10-QSB for the period ended December 31, 2001.)

<u>Exhibit No.</u>	<u>Description of Exhibit</u>
4.2	Form of Warrant issued to H.C. Wainwright & Co., Inc., or its designees, dated as of October 10, 2006 (Incorporated by reference to Exhibit 10.42 of Senesco Technologies, Inc. annual report on Form 10-K for the period ended June 30, 2006.)
4.3	Form or Warrant issued to certain accredited investors dated October 10, 2006 (with attached schedule of parties and terms thereto). (Incorporated by reference to Exhibit 10.40 of Senesco Technologies, Inc. annual report on Form 10-K for the period ended June 30, 2006.)
4.4	Form of Series A Warrant issued to YA Global Investments, L.P. (Incorporated by reference to Exhibit 4.15 of Senesco Technologies, Inc. annual report on Form 10-K for the period ended June 30, 2007.)
4.5	Form of Series A Warrant issued to Stanford Venture Capital Holdings, Inc. (Incorporated by reference to Exhibit 4.16 of Senesco Technologies, Inc. annual report on Form 10-K for the period ended June 30, 2007.)
4.6	Form of Series B Warrant issued to YA Global Investments, L.P. (Incorporated by reference to Exhibit 4.19 of Senesco Technologies, Inc. annual report on Form 10-K for the period ended June 30, 2007.)
4.7	Form of Series B Warrant issued to Stanford Venture Capital Holdings, Inc. (Incorporated by reference to Exhibit 4.20 of Senesco Technologies, Inc. annual report on Form 10-K for the period ended June 30, 2007.)
4.8	Form of Warrant issued to H.C. Wainwright & Co., Inc or its designees. (Incorporated by reference to Exhibit 4.21 of Senesco Technologies, Inc. annual report on Form 10-K for the period ended June 30, 2008.)
4.9	Form of Series A Warrant issued to Partlet Holdings Ltd. (Incorporated by reference to Exhibit 4.1 of Senesco Technologies, Inc. current report on Form 8-K, filed on July 10, 2009.)
4.10	Form of Series B Warrant issued to Partlet Holdings Ltd. (Incorporated by reference to Exhibit 4.1 of Senesco Technologies, Inc. current report on Form 8-K, filed on July 10, 2009.)
4.11	Form of Series A Warrant issued to each of Robert Forbes, Timothy Forbes, Harlan W. Waksal, M.D., Rudolf Stalder, Christopher Forbes, David Rector, John N. Braca, Jack Van Hulst, Warren Isabelle and the Thomas C. Quick Charitable Foundation. (Incorporated by reference to Exhibit 4.1 of Senesco Technologies, Inc. current report on Form 8-K, filed on July 30, 2009.)
4.12	Form of Series B Warrant issued to each of Robert Forbes, Timothy Forbes, Harlan W. Waksal, M.D., Rudolf Stalder, Christopher Forbes, David Rector, John N. Braca, Jack Van Hulst, Warren Isabelle and the Thomas C. Quick Charitable Foundation. (Incorporated by reference to Exhibit 4.1 of Senesco Technologies, Inc. current report on Form 8-K, filed on July 30, 2009.)

**CERTIFICATION PURSUANT TO SECTION 302
OF THE SARBANES-OXLEY ACT OF 2002**

I, Leslie J. Browne, Ph.D., certify that:

1. I have reviewed this Annual Report on Form 10-K of Senesco Technologies, Inc.
2. Based on my knowledge, this report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this report;
3. Based on my knowledge, the financial statements, and other financial information included in this report, fairly present in all material respects the financial condition, results of operations and cash flows of the registrant as of, and for, the periods presented in this report;
4. The registrant's other certifying officer and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(e)) and internal control over financial reporting (as defined in Exchange Act Rules 13a-15(f) and 15d-15(f)) for the registrant and have:
 - a) Designed such disclosure controls and procedures, or caused such disclosure controls and procedures to be designed under our supervision, to ensure that material information relating to the registrant, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period in which this report is being prepared;
 - b) Designed such internal control over financial reporting, or caused such internal control over financial reporting to be designed under our supervision, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles;
 - c) Evaluated the effectiveness of the registrant's disclosure controls and procedures and presented in this report our conclusions about the effectiveness of the disclosure controls and procedures, as of the end of the period covered by this report based on such evaluation; and
 - d) Disclosed in this report any change in the registrant's internal control over financial reporting that occurred during the registrant's most recent fiscal quarter (the registrant's fourth fiscal quarter in the case of an annual report) that has materially affected, or is reasonably likely to materially affect, the registrant's internal control over financial reporting; and
5. The registrant's other certifying officer and I have disclosed, based on our most recent evaluation of internal control over financial reporting, to the registrant's auditors and the

audit committee of the registrant's board of directors (or persons performing the equivalent functions):

- a) All significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting which are reasonably likely to adversely affect the registrant's ability to record, process, summarize and report financial information; and
- b) Any fraud, whether or not material, that involves management or other employees who have a significant role in the registrant's internal control over financial reporting.

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

To the Board of Directors and Stockholders
Senesco Technologies, Inc.

We have audited the accompanying consolidated balance sheets of Senesco Technologies, Inc. and Subsidiary (a development stage company) as of June 30, 2011 and June 30, 2010, and the related consolidated statements of operations, stockholders' equity and cash flows for each of the three years in the period ended June 30, 2011 and cumulative amounts from July 1, 1998 (inception) to June 30, 2011. These financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. The Company is not required to have, nor were we engaged to perform an audit of its internal control over financial reporting. Our audit included consideration of internal control over financial reporting as a basis for designing audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Company's internal control over financial reporting. Accordingly, we express no such opinion. An audit also includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements, assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the consolidated financial statements referred to above present fairly, in all material respects, the financial position of Senesco Technologies, Inc. and Subsidiary as of June 30, 2011 and June 30, 2010, and the results of their operations and their cash flows for each of the three years in the period ended June 30, 2011 and cumulative amounts from July 1, 1998 (inception) to June 30, 2011, in conformity with U.S. generally accepted accounting principles.

SENESCO TECHNOLOGIES, INC. AND SUBSIDIARY
(A DEVELOPMENT STAGE COMPANY)
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

1. Principle Business Activity:

The Company

The Company is a development stage biotechnology company whose mission is to develop novel approaches to treat programmed cell death diseases in humans (apoptosis), and to enhance the quality and productivity of fruits, flowers, vegetables and agronomic crops through the control of cell death in plants (senescence).

Senesco, Inc. ("SI"), a New Jersey corporation, was incorporated on November 24, 1998 and is the successor entity to Senesco, L.L.C., a New Jersey limited liability company that was formed on June 25, 1998 but commenced operations on July 1, 1998.

Liquidity

As shown in the accompanying consolidated financial statements, the Company has a history of losses with a deficit accumulated during the development stage from July 1, 1998 (inception) through June 30, 2011 of \$60,748,435. Additionally, the Company has generated minimal revenues by licensing its technology for certain crops to companies willing to share in its development costs. In addition, the Company's technology may not be ready for commercialization for several years. The Company expects to continue to incur losses for the next several years because it anticipates that its expenditures on research and development, and administrative activities will significantly exceed its revenues during that period. The Company cannot predict when, if ever, it will become profitable.

As of June 30, 2011, the Company had cash and cash equivalents in the amount of \$3,609,954, which consisted of checking accounts and money market funds. In December 2010, the Company entered into an At Market Issuance Sales Agreement ("ATM") whereby it may issue up to \$5,500,000 of Common Stock under this facility. From July 1, 2011 through September 26, 2011, the Company has received net proceeds from the issuance of the Company's common stock, par value \$0.01 (the "Common Stock") in the amount of \$451,096. The Company estimates that its cash and cash equivalents and the net proceeds from its ATM facility will cover its expenses through March 2012. However, the Company has the ability to raise additional capital through its ATM facility, draw down on its unused line of credit and delay certain costs, if necessary, which will provide the Company with enough cash to fund its operations at least through June 30, 2012.

The Company will need additional capital and plans to raise additional capital through the placement of debt instruments or equity or both. However, the Company may not be able to obtain adequate funds for its operations when needed or on acceptable terms. If the Company is unable to raise additional funds, it will need to do one or more of the following:

- delay, scale-back or eliminate some or all of its research and product development programs;
- license third parties to develop and commercialize products or technologies that it would otherwise seek to develop and commercialize itself;
- seek strategic alliances or business combinations;
- attempt to sell the Company;
- cease operations; or
- declare bankruptcy.

Risks and Uncertainties

The Company operates in an industry that is subject to intense competition, government regulation and rapid technological change. The Company's operations are subject to significant risk and uncertainties including financial, operational, technological, regulatory and other risks, including the potential risk of business failure.

SENESCO TECHNOLOGIES, INC. AND SUBSIDIARY
(A DEVELOPMENT STAGE COMPANY)
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

2. Summary of Significant Accounting Policies:

Principles of consolidation

The accompanying consolidated financial statements include the accounts of Senesco Technologies, Inc. ("ST") and its wholly owned subsidiary, SI (collectively, the "Company"). All significant intercompany accounts and transactions have been eliminated in consolidation.

Management Estimates and Judgments

The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and judgments that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenue and expenses during the reporting period. The critical accounting policies that require management's most significant estimate and judgment are the assessment of the recoverability of intangible assets, the variables and method used to calculate stock-based compensation and warrant liabilities, and the valuation allowance on deferred tax assets. Actual results experienced by the Company may differ from management's estimates.

Cash and Cash Equivalents and Short-Term Investments

The Company considers all highly liquid instruments with an original maturity of 90 days or less at the time of purchase to be cash equivalents. Cash and cash equivalents consist of deposits that are readily convertible into cash.

Fair Value Measurements

ASC Topic 820, Fair Value Measurements, defines fair value, establishes a framework for measuring fair value and expands the related disclosure requirements. The guidance applies under other accounting pronouncements that require or permit fair value measurements. The statement indicates, among other things, that a fair value measurement assumes that the transaction to sell an asset or transfer a liability occurs in the principal market for the asset or liability or, in the absence of a principal market, the most advantageous market for the asset or liability. ASC 820 defines fair value based upon an exit price model.

The Company categorizes our financial instruments into a three-level fair value hierarchy that prioritizes the inputs to valuation techniques used to measure fair value into three broad levels. The fair value hierarchy gives the highest priority to quoted prices in active markets for identical assets or liabilities (Level 1) and the lowest priority to unobservable inputs (Level 3). If the inputs used to measure fair value fall within different levels of the hierarchy, the category level is based on the lowest priority level input that is significant to the fair value measurement of the instrument. Financial assets recorded at fair value on our consolidated balance sheets are categorized as follows:

- Level 1: Observable inputs such as quoted prices in active markets;
- Level 2: Inputs, other than the quoted prices in active markets, that are observable either directly or indirectly; and
- Level 3: Unobservable inputs in which there is little or no market data, which require the reporting entity to develop its own assumptions.

The fair value of the warrant liabilities is based on the Black-Scholes Merton and Modified Black-Scholes Merton option pricing models ("Black-Scholes model") (Level 3). (See note 9).

The carrying value of prepaid expenses and other current assets, accounts payable, accrued expenses, and line of credit reported in the consolidated balance sheets equal or approximate fair value due to their short maturities.

SENESCO TECHNOLOGIES, INC. AND SUBSIDIARY
(A DEVELOPMENT STAGE COMPANY)
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

Concentrations of Credit Risk

The Company maintains its cash primarily in investment accounts within one large financial institution. The Federal Deposit Insurance Corporation insures these balances up to \$250,000 per bank. The Company has not experienced any losses on its bank deposits and believes these deposits do not expose the Company to any significant credit risk.

Prepaid Research Services and Supplies

Prepaid research services and supplies are carried at cost and are included in prepaid expenses and other current assets on the accompanying consolidated balance sheet. When such services are performed and supplies are used, the carrying value of the supplies are expensed in the period that they are performed or used for the development of proprietary applications and processes.

Equipment, Furniture and fixtures

Equipment, furniture and fixtures are recorded at cost. Depreciation is calculated on a straight-line basis over the estimated useful life of each asset, generally four to seven years. Expenditures for major renewals and improvements are capitalized, and expenditures for maintenance and repairs are charged to operations as incurred. (See note 4).

Intangibles

The Company conducts research and development activities, the cost of which is expensed as incurred, in order to generate patents that can be licensed to third parties in exchange for license fees and royalties. Because the patents are the basis of the Company's future revenue, the patent costs are capitalized. The capitalized patent costs represent the outside legal fees incurred by the Company to submit and undertake all necessary efforts to have such patent applications issued as patents.

The length of time that it takes for an initial patent application to be approved is generally between four to six years. However, due to the unique nature of each patent application, the actual length of time may vary. If a patent application is denied, the associated cost of that application would be written off. However, the Company has not had any patent applications denied as of June 30, 2011. Additionally, should a patent application become impaired during the application process, the Company would write down or write off the associated cost of that patent application.

Issued patents and agricultural patent applications pending are being amortized over a period of 16 to 17 years, the expected economic life of the patent. (See note 5).

Impairment of Long-lived Assets

The Company assesses the impairment in value of intangible assets whenever events or circumstances indicate that their carrying value may not be recoverable. Factors the Company considers important which could trigger an impairment review include the following:

- significant negative industry trends;
- significant underutilization of the assets;
- significant changes in how the Company uses the assets or its plans for their use; and
- changes in technology and the appearance of competing technology.

SENESCO TECHNOLOGIES, INC. AND SUBSIDIARY
(A DEVELOPMENT STAGE COMPANY)
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

If the Company's review determines that the future discounted cash flows related to these assets will not be sufficient to recover their carrying value, the Company will reduce the carrying values of these assets down to its estimate of fair value and continue amortizing them over their remaining useful lives. To date, the Company has not recorded any impairment of intangible assets. However, during the year ended June 30, 2011, in order to reduce its cost of patent prosecution and maintenance the Company reviewed its patent portfolio and identified several patents and patent applications that it believed it no longer needed to maintain without having a material impact on the patent portfolio. Accordingly, during the year ended June 30, 2011, the Company wrote off patent costs in the net amount of \$1,588,087.

Net Loss per Common Share

Basic earnings (loss) per share is computed by dividing net income (loss) available to common shareholders by the weighted average number of common shares assumed to be outstanding during the period of computation. Diluted earnings per share is computed similar to basic earnings per share except that the denominator is increased to include the number of additional common shares that would have been outstanding if the potential common shares had been issued and if the additional common shares were dilutive.

For all periods presented, basic and diluted loss per share are the same, as any additional common stock equivalents would be anti-dilutive. Potentially dilutive shares of Common Stock have been excluded from the calculation of the weighted average number of dilutive common shares.

For the year ended June 30, 2011, there were 82,949,540 additional potentially dilutive shares of common stock. These additional shares include 16,300,000 shares issuable upon conversion of the Preferred Stock, and 66,649,540 outstanding options and warrants. For the year ended June 30, 2010, there were 91,299,773 additional potentially dilutive shares of common stock. These additional shares include 28,859,375 shares issuable upon conversion of the Preferred Stock, and 62,440,398 outstanding options and warrants. For the year ended June 30, 2009, there were 33,779,411 additional potentially dilutive shares of common stock. These additional shares include 10,505,556 shares issuable upon conversion of the 8% Convertible Notes and 23,273,855 outstanding options and warrants.

Income Taxes

Income taxes are accounted for under the asset and liability method. Deferred tax assets and liabilities are recognized for the future tax consequences attributable to the differences between the financial statement carrying amounts of existing assets and liabilities and their respective tax bases and operating loss and tax credit carryforwards. Deferred tax assets and liabilities are measured using enacted tax rates expected to apply to taxable income in the years in which those temporary differences are expected to be recovered or settled. The effect on deferred tax assets and liabilities of a change in tax rates is recognized in income in the period that includes the enactment date.

The asset and liability method requires that deferred tax assets and liabilities be recorded without consideration as to their realizability. The deferred tax asset primarily includes net operating loss carryforwards. The portion of any deferred tax asset for which it is more likely than not that a tax benefit will not be realized must then be offset by recording a valuation allowance. A valuation allowance has been established against all of the deferred tax assets as it is more likely than not that these assets will not be realized given the history of operating losses.

While the Company believes that its tax positions are fully supportable, there is a risk that certain positions could be challenged successfully. In these instances, the Company looks to establish reserves. If the Company determined that a tax position is more likely than not of being sustained upon audit, based solely on the technical merits of the position, the Company would recognize the benefit. The Company measures the benefit by determining the amount that has a likelihood greater than 50% of being realized upon settlement. The Company presumes that all tax positions will be examined by a taxing authority with full knowledge of all

SENESCO TECHNOLOGIES, INC. AND SUBSIDIARY
(A DEVELOPMENT STAGE COMPANY)
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

relevant information. The Company regularly monitors its tax positions, tax assets and tax liabilities. The Company reevaluates the technical merits of its tax positions and would recognize an uncertain tax benefit or derecognize a previously recorded tax benefit when (i) there is a completion of a tax audit, (ii) there is a change in applicable tax law including a tax case or legislative guidance, or (iii) there is an expiration of the statute of limitations. Significant judgment is required in accounting for tax reserves. As of June 30, 2011, the Company determined that it had no liability for uncertain income taxes. The Company's policy is to recognize potential accrued interest and penalties related to the liability for uncertain tax benefits, if applicable, in income tax expense. The Company's tax returns for the years ended June 30, 2011, 2010, 2009 and 2008 are open for examination. (See note 12).

Revenue Recognition

The Company has received certain nonrefundable upfront fees in exchange for the transfer of its technology to licensees. Upon delivery of the technology, the Company had no further obligations to the licensee with respect to the basic technology transferred and, accordingly, recognized revenue at that time. The Company has and may continue to receive additional payments from its licensees in the event such licensees achieve certain development or commercialization milestones in their particular field of use. Milestone payments, which are contingent upon the achievement of certain research goals, are recognized as revenue when the milestones, as defined in the particular agreement, are achieved.

Stock-based Payments

The Company accounts for stock-based compensation under the provisions of FASB ASC Topic 718, Compensation—Stock Compensation (“ASC 718”), which requires the measurement and recognition of compensation expense for all stock-based awards made to employees and directors based on estimated fair values on the grant date. The Company estimates the fair value of stock-based awards on the date of grant using the Black-Scholes model. The value of the portion of the award that is ultimately expected to vest is recognized as expense over the requisite service periods using the straight-line method. The Company estimates forfeitures at the time of grant and revises its estimate in subsequent periods if actual forfeitures differ from those estimates.

The Company accounts for stock-based compensation awards to non-employees in accordance with FASB ASC Topic 505-50, Equity-Based Payments to Non-Employees (“ASC 505-50”). Under ASC 505-50, the Company determines the fair value of the warrants or stock-based compensation awards granted as either the fair value of the consideration received or the fair value of the equity instruments issued, whichever is more reliably measurable.

All issuances of stock options or other equity instruments to non-employees as consideration for goods or services received by the Company are accounted for based on the fair value of the equity instruments issued. Any stock options issued to non-employees are recorded as an expense and additional paid-in capital in stockholders' equity over the applicable service periods using variable accounting through the vesting dates based on the fair value of the options at the end of each period.

SENESCO TECHNOLOGIES, INC. AND SUBSIDIARY
(A DEVELOPMENT STAGE COMPANY)
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

The following table sets forth the total stock-based compensation expense and issuance of common stock for services included in the consolidated statements of operations for the years ended June 30, 2011, 2010 and 2009 and from inception to date.

	<u>Year Ended June 30,</u>			<u>Cummulative</u>
	<u>2011</u>	<u>2010</u>	<u>2009</u>	<u>From Inception</u>
General and administrative	709,207	433,414	445,255	9,873,917
Research and development	<u>41,159</u>	<u>7,025</u>	<u>61,592</u>	<u>1,519,832</u>
Total	<u>\$ 750,366</u>	<u>\$ 440,439</u>	<u>\$ 506,847</u>	<u>\$ 11,393,749</u>

The Company estimated the fair value of each warrant and option grant throughout the year using the Black-Scholes option-pricing model using the following assumptions:

	<u>Year Ended June 30,</u>		
	<u>2011</u>	<u>2010</u>	<u>2009</u>
Risk-free interest rate (1)	1.3%-2.9%	2.0%-3.9%	1.3%-2.1%
Expected volatility	103-104%	100-106%	100%
Dividend yield	None	None	None
Expected life (2)	5.0 - 10.0	3.5-6.2	3.0-5.5

(1) Represents the interest rate on a U.S. Treasury security with a maturity date corresponding to that of the option term.

(2) Expected life for employee based stock options was estimated using the “simplified” method, as allowed under the provisions of the Securities and Exchange Commission Staff Accounting Bulletin No. 110.

The economic values of the options will depend on the future price of the Company's Common Stock, par value \$0.01 (the “Common Stock”), which cannot be forecast with reasonable accuracy.

Research and Development

Research and development costs are expensed as incurred.

Recent Accounting Pronouncements Applicable to the Company

In March 2010, the FASB issued new guidance that updates ASC Topic 605, Revenue Recognition, which addresses accounting for arrangements in which a vendor satisfies its performance obligations over time, with all or a portion of the consideration contingent on future events, referred to as “milestones.” The Milestone Method of Revenue Recognition is limited to arrangements which involve research or development activities. A milestone is defined as an event for which, at the date the arrangement is entered into, there is substantive uncertainty whether the event will be achieved, and the achievement of the event is based in whole or in part on either the vendor’s performance or a specific outcome resulting from the vendor’s performance. In addition, the achievement of the event would result in additional payments being due to the vendor. The Milestone Method of Revenue Recognition allows a vendor to adopt an accounting policy to recognize arrangement consideration that is contingent on the achievement of a substantive milestone in its entirety in the period the milestone is achieved. The Milestone Method of Revenue Recognition is effective on a prospective basis, with an option for retrospective application for milestones achieved in fiscal years and interim periods within those fiscal years beginning on or after June 15, 2010. Early adoption is permitted. If an entity elects early application in a period that is not the first reporting period of its fiscal year, then the guidance must be applied retrospectively from the beginning of that fiscal year. The Company will determine the impact of the new accounting standard as it enters into new revenue arrangements that include the achievement of milestones and earns payments under either new or existing revenue arrangements.

(A DEVELOPMENT STAGE COMPANY)
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

3. Fair Value Measurements:

The following tables provide the assets and liabilities carried at fair value measured on a recurring basis as of June 30, 2011 and 2010:

	Carrying Value	Fair Value Measurement at June 30, 2011		
		Level 1	Level 2	Level 3
Assets:				
Cash and cash equivalents	\$ 3,609,954	\$ 3,609,954	\$ -	\$ -
Liabilities:				
Warrant liabilities	\$ 711,259	\$ -	\$ -	\$ 711,259

	Carrying Value	Fair Value Measurement at June 30, 2010		
		Level 1	Level 2	Level 3
Assets:				
Cash and cash equivalents	\$ 8,026,296	\$ 8,026,296	\$ -	\$ -
Liabilities:				
Warrant liabilities	\$ 2,493,794	\$ -	\$ -	\$ 2,493,794

The following table summarizes the changes in fair value of the Company's Level 3 financial instruments:

	Year ended June 30,	
	2011	2010
Beginning Balance	\$ 2,493,794	\$ 3,200,108
Issuance of common stock warrants, exercisable at \$0.35 (37,007,813)	-	1,810,347
Reclassification to equity due to change in terms of common stock warrants exercisable at \$0.35	(1,173,296)	-
Gain due to change in fair value of warrant liabilities, net	(609,239)	(2,516,661)
Ending Balance	\$ 711,259	\$ 2,493,794

4. Equipment, Furniture and Fixtures:

Equipment, Furniture and Fixtures consist of the following:

	<u>June 30,</u>	
	<u>2011</u>	<u>2010</u>
Equipment	\$ 26,592	\$ 24,566
Furniture and fixtures	67,674	67,674
	<u>94,266</u>	<u>92,240</u>
Less—Accumulated depreciation	(90,484)	(87,686)
	<u>\$ 3,782</u>	<u>\$ 4,554</u>

Depreciation expense aggregated \$2,798, \$2,548, \$3,646 and \$176,423 for the years ended June 30, 2011, 2010, 2009, and cumulatively from inception through June 30, 2011, respectively.

5. Intangible assets:

Intangible assets consist of the following:

	<u>June 30,</u>	
	<u>2011</u>	<u>2010</u>
Patents approved	\$ 2,059,323	\$ 850,419
Patents pending	1,979,246	4,243,859
	<u>4,038,569</u>	<u>5,094,278</u>
Accumulated amortization	(513,838)	(525,383)
	<u>\$ 3,524,731</u>	<u>\$ 4,568,895</u>

Amortization expense amounted to \$140,476, \$124,019, \$108,107 and \$665,859 for the years ended June 30, 2011, 2010, 2009, and cumulatively from inception through June 30, 2011, respectively.

During the year ended June 30, 2011, the Company abandoned certain patents and patents pending. Accordingly, intangible assets were reduced by the net carrying value of those patents and patents pending in the amount of \$1,588,087.

Estimated amortization expense for the next five years is as follows:

Year ended June 30,	
2012	\$ 285,000
2013	285,000
2014	285,000
2015	285,000
2016	285,000

SENESCO TECHNOLOGIES, INC. AND SUBSIDIARY

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

6. Accrued Expenses:

Accrued expenses were comprised of the following:

	<u>June 30,</u>	
	<u>2011</u>	<u>2010</u>
Accrued research	\$ 195,992	\$ 218,514
Accrued dividends payable	122,252	230,875
Accrued director fees	26,000	29,041
Accrued patent costs	75,393	36,962
Accrued legal	58,710	29,682
Accrued other	29,448	31,773
	<u>\$ 509,806</u>	<u>\$ 578,857</u>

7. Line of Credit:

On February 17, 2010, the Company entered into a credit agreement with JMP Securities LLC. The agreement provides the Company with, subject to certain restrictions, including the existence of suitable collateral, up to a \$3.0 million line of credit upon which the Company may draw at any time (the "Line of Credit"). Any draws upon the Line of Credit accrue at a monthly interest rate of (i) the broker rate in effect at the interest date (which was 3.75% at June 30, 2011), plus (ii) 2.0%. There are no other conditions or fees associated with the Line of Credit. The Line of Credit is not secured by any assets of the Company, but it is secured by certain assets of one of a member of the Company's Board of Directors, Harlan W. Waksal, M.D., which is currently held by JMP Securities. The balance outstanding as of June 30, 2011 and 2010 was \$2,199,108 and \$2,194,844, respectively. In April 2011, we were required to enter into a new demand note with the clearing agent for JMP Securities in connection with the Line of Credit.

8. Convertible Notes:

On August 1, 2007 and August 29, 2007, the Company entered into a binding Securities Purchase Agreement to issue \$5,000,000 of 8% convertible notes to YA Global Investments L.P. ("YA Global") and \$5,000,000 of 8% Convertible Notes to Stanford Venture Capital Holdings, Inc. ("Stanford") for aggregate gross proceeds of \$10,000,000. The convertible notes were originally convertible into the Company's Common Stock at a fixed price of \$0.90 per share, subject to certain adjustments through August 1, 2009 and December 20, 2009, respectively, at which time the convertible notes could convert into shares of the Company's common stock at the lower of the fixed conversion price or 80% of the lowest daily volume-weighted average price (the "VWAP"), of the common stock during the five trading days prior to the conversion date. The maturity date of each of the convertible notes for YA Global and Stanford was December 30, 2010 and December 31, 2010, respectively.

The convertible notes accrued interest on their outstanding principal balances at an annual rate of 8%. The Company had the option to pay interest in cash or, upon certain conditions, common stock. If the Company paid interest in common stock, the stock would be valued at a 10% discount to the average daily VWAP for the five day trading period prior to the interest payment date (the "Interest Shares").

The agreements with YA Global and Stanford provided for the issuance of warrants to purchase an aggregate of 5,550,000 and 8,333,333, respectively, of the Company's Common Stock, exercisable six months and one day from the date of issuance until their expiration on the date that is five years from the date of issuance. The warrants have been issued in two series. The exercise price of the Series A warrants is \$1.01 per share, and the exercise price of the Series B warrants was \$0.90 per share, subject to certain adjustments. The warrants provide a right of cashless exercise if, at the time of exercise, there is no effective registration statement registering the resale of the shares underlying the warrants.

SENESCO TECHNOLOGIES, INC. AND SUBSIDIARY
(A DEVELOPMENT STAGE COMPANY)
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

The conversion rate of each convertible note and the exercise price of the Series B warrants are subject to adjustment for certain events, including dividends, stock splits, combinations and the sale of the Company's Common Stock or securities convertible into or exercisable for the Company's Common Stock at a price less than the then applicable conversion or exercise price. As of June 30, 2011, the exercise price of the Series B warrants has been adjusted to \$0.49 per share.

During the year ended June 30, 2008, \$7,931,875 of the total net proceeds of \$9,340,000 from the convertible notes was allocated to the warrants based upon the fair value of the warrants which was determined using the Black-Scholes model. The remaining \$1,408,125 was allocated to the beneficial conversion feature based upon the effective conversion price of the Convertible Notes compared to the fair value of the common stock on the date of issuance of the convertible notes and warrants.

Debt discount associated with the Convertible Notes which amounted to \$10,000,000 was being amortized to interest expense, using the effective yield method, over the remaining life of the convertible notes. Upon conversion or redemption of the Convertible Notes into Common Stock, any unamortized debt discount relating to the portion converted or redeemed was charged to interest expense.

The material factors incorporated in the Black-Scholes model in estimating the value of the warrants include the following:

Estimated life in years	5.0
Risk-free interest rate	3.5% - 4.4%
Volatility	100%
Dividend paid	None

In connection with the issuance of the convertible notes, the Company incurred costs in the amount of \$1,291,427 which was recorded as deferred financing costs and was being amortized ratably over the term of the convertible notes. During the year ended June 30, 2010, as a result of the conversion and redemption of the convertible notes, the remaining balance of the deferred financing costs which amounted to \$632,324 was fully amortized.

During the year ended June 30, 2010, YA Global converted \$2,619,360 of their convertible notes into 9,635,093 shares of Common Stock. From the inception of the convertible notes, YA Global converted \$3,164,360 of the convertible notes into 10,250,648 shares of Common Stock. On March 3, 2010, YA Global and the Company entered into a letter agreement pursuant to which the Company purchased from YA Global all of its remaining outstanding convertible notes, which in the aggregate totaled \$1,835,640, for an aggregate purchase price of \$2,144,844, including accrued interest of \$33,859 on the convertible notes. As a result of this transaction, the Company recorded a loss on the extinguishment of debt in the amount of \$275,345. In addition, the Company purchased from YA Global warrants to purchase 2,775,000 shares of the Company's common stock at an exercise price of \$1.01 per share, for a purchase price of \$50,000.

During the year ended June 30, 2010, certain members of the Company's board of directors acquired all of the \$5,000,000 of convertible notes and warrants previously issued to Stanford and converted the \$5,000,000 of convertible notes into 6,024,096 shares of Common Stock at a conversion price of \$0.83.

Total charges to interest for amortization of debt discount were \$0, \$9,448,783, \$51,160 and \$10,000,000 for the years ended June 30, 2011, June 30, 2010 and June 30, 2009 and from inception through June 30, 2011, respectively.

SENESCO TECHNOLOGIES, INC. AND SUBSIDIARY
(A DEVELOPMENT STAGE COMPANY)
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

9. Warrant Liabilities:

The warrant liabilities represent the fair value of Common Stock purchase warrants, which have exercise price reset features and cash settlement features.

The fair value of the warrants that have exercise price reset features is estimated using an adjusted Black-Scholes model. The Company computes valuations, each quarter, using the Black-Scholes model for such warrants to account for the various possibilities that could occur due to changes in the inputs to the Black-Scholes model as a result of contractually-obligated changes. The Company effectively weights each calculation based on the likelihood of occurrence to determine the value of the derivative at the reporting date. The fair value of the warrants that have cash settlement features is estimated using the Black-Scholes model.

During the year ended June 30, 2011, the holders of an aggregate of 22,641,665 warrants amended the terms of their warrants. As of the dates of the amendments to the warrants, the Black-Scholes value in the amount of \$1,173,296 was reclassified from warrant liabilities to equity with the change in fair value from June 30, 2010 through the dates of the amendments being recorded in the consolidated statement of operations.

The Company also recorded a charge of \$115,869 during the year ended June 30, 2011, as a result of the amendment to certain of the warrants that had an exercise price reset feature, whereby the exercise price of \$0.50, subject to future adjustments, was reset to \$0.32 and would no longer be subject to future adjustments and accordingly are no longer deemed to be liabilities. The charge of \$115,869 represents the difference in the Black-Scholes value of the warrants immediately prior to the amendment and the Black-Scholes value of the warrants immediately after the amendment.

During the years ended June 30, 2011 and 2010, the Company revalued all of the remaining warrant liabilities, using the adjusted Black-Scholes and Black-Scholes models. A gain on the change in fair value of the warrant liabilities in the amount of \$609,239 and \$2,516,661 was recorded in the Condensed Consolidated Statement of Operations for the years ended June 30, 2011 and 2010, respectively.

At June 30, 2011 and 2010, there were an aggregate of 21,307,814 and 43,949,479 warrants included in the fair value of the warrant liabilities, which are valued at \$711,259 and \$2,493,794, respectively.

SENESCO TECHNOLOGIES, INC. AND SUBSIDIARY
(A DEVELOPMENT STAGE COMPANY)
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

(1) Represents the interest rate on a U.S. Treasury security with a maturity date corresponding to that of the warrant term.

(2) Such warrants were amended during the year ended June 30, 2011 and are no longer deemed liabilities.

10. Stockholders' Equity:

Preferred Stock

On April 1, 2010, the Company sold 10,297 shares of 10% Series A preferred stock to non-affiliated purchasers for cash. On June 2, 2010, the Company sold 1,200 shares of 10% Series B preferred stock to affiliated purchasers for cash. The Company received gross proceeds in the aggregate amount of \$11,497,000 and net proceeds in the amount of \$10,754,841.

Pursuant to the Agreements, the Series A and Series B preferred stock was initially convertible into approximately 35,928,125 shares of the Company's Common Stock, subject to adjustment. In addition, the Series A and Series B Preferred shareholders received immediately exercisable warrants to purchase up to approximately 35,928,125 shares.

Each share of Preferred Stock has a stated value of \$1,000 (the "Stated Value"). Each holder of shares of preferred stock is entitled to receive semi-annually dividends at the rate of 10% per annum of the Stated Value for each share of preferred stock held by such holder. Except in limited circumstances, the Company can elect

SENESCO TECHNOLOGIES, INC. AND SUBSIDIARY
(A DEVELOPMENT STAGE COMPANY)
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

to pay the dividends in cash or shares of Common Stock. If the dividends are paid in shares of Common Stock, such shares will be priced at the lower of 90% of the average VWAP for the 20 days immediately preceding the payment date or \$0.224. The dividends are subject to a 30% make whole provision.

The shares of preferred stock are convertible into shares of Common Stock at an initial conversion price of \$0.32 per share and are convertible at any time, The conversion price is subject to adjustment if the Company sells or grants any Common Stock or Common Stock equivalents, subject to certain exclusions, at an effective price per share that is lower than the conversion price of the preferred stock. After 18 months from the date of issuance of the preferred stock, if the Company's Common Stock trades above \$0.80 for 20 out of 30 consecutive trading days, the preferred stock will no longer be subject to adjustment. On December 27, 2010, in connection with the Company's ATM facility (see below), the conversion price on the then outstanding 5,325 shares of Preferred Stock was adjusted from \$0.32 to \$0.30, resulting in an additional 1,109,375 shares of Common Stock that will be issued upon conversion of the then outstanding Preferred Stock. In connection with the adjustment of the conversion price, due to a beneficial conversion feature, an additional dividend in the amount of \$360,733 was recorded as an increase to both additional paid-in capital and accumulated deficit. As a result of the reset of the conversion price, each share of preferred stock is convertible into 3,333 shares of Common Stock (a conversion price of \$0.30).

The Company may force conversion of the preferred stock if the Company's Common Stock trades above \$0.80 for 20 out of 30 consecutive trading days and there is an effective registration statement for the underlying Common Stock or such underlying Common Stock is freely tradable under rule 144.

Warrants

Pursuant to the Purchase Agreements, the Company delivered a Series A Warrant to the Non-Affiliate Investors and a Series B Warrant to the Affiliate Investors (the "Warrants"). Each Warrant has an initial exercise price of \$0.35 per share of Common Stock. The Warrants are immediately exercisable and have a five year term. The Series A Warrants also contain a provision which limits the holder's beneficial ownership to a maximum of 4.99% (which percentage may be increased to 9.99% upon 60 days notice to the Company).

Placement Agent Warrants

On April 1, 2010, in connection with the issuance of the Series A preferred stock, the Company issued warrants to purchase 1,079,688 shares of the Company's common stock as partial compensation for services related to the raising of the capital. Each Warrant has an initial exercise price of \$0.35 per share of Common Stock. The Warrants are immediately exercisable and have a five year term. In accordance with ASC 480-10, Distinguishing Liabilities from Equity, the Company determined that such warrants are to be accounted for as a liability. Accordingly, using the Black Scholes model, the Company recorded a warrant liability in the amount of \$51,339 related to the warrants on the issuance date. The Company recorded a charge to additional paid in capital as an additional cost of capital.

As discussed in note 9 above, the Company is required to record the warrants as liabilities. As a result, the Company must allocate the proceeds to the warrants based upon their fair value with the remainder of the proceeds allocated to the preferred stock. The Company allocated the gross proceeds of the offering as follows:

	Series A	Series B	
	<u>Preferred Stock</u>	<u>Preferred Stock</u>	<u>Total</u>
Total gross proceeds	\$ 10,297,000	\$ 1,200,000	\$ 11,497,000
Allocated to warrants	<u>(1,530,070)</u>	<u>(228,938)</u>	<u>(1,759,008)</u>
Allocated to preferred stock	<u>\$ 8,766,930</u>	<u>\$ 971,062</u>	<u>\$ 9,737,992</u>

SENESCO TECHNOLOGIES, INC. AND SUBSIDIARY
(A DEVELOPMENT STAGE COMPANY)
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

Due to the allocation of the proceeds to the fair value of the warrant at the issuance dates, the convertible feature of the Preferred Stock was below market value. Such feature, as it specifically relates to the convertible feature of the Preferred Stock, is characterized as a “Beneficial Conversion Feature” (“BCF”). Pursuant to existing accounting standards, FASB ASC topic 470.20 – Debt with Conversion and Other Options”, the estimated relative fair value of the BCF was \$15,068,031. The value of the BCF which amounted to \$5,330,039 was determined utilizing an intrinsic value method with the fair value of the warrants determined using the Black-Scholes model at the date of issuance. Per the guidance of accounting standards, the value of the BCF is treated as a deemed dividend to the Preferred stockholders and, due to the potential immediate convertibility of the Preferred stock at issuance, this value is recorded as an increase to both additional-paid-in-capital and accumulated deficit at the time of issuance.

During the year ended June 30, 2011, 4,345 shares of Preferred Stock were converted into 13,668,750 shares of Common Stock. During the year ended June 30, 2011, the Company issued an additional 7,912,266 shares of Common Stock for the payment of dividends in the amount of \$2,277,567. Total dividends payable on the outstanding 4,890 shares of Preferred Stock at June 30, 2011 amounted to \$122,252.

During the year ended June 30, 2010, 2,262 shares of Preferred Stock were converted into 7,068,750 shares of Common Stock. During the year ended June 30, 2010, the Company issued an additional 3,029,465 shares of Common Stock for the payment of dividends in the amount of \$678,600. Total dividends payable on the outstanding 9,235 shares of Preferred Stock at June 30, 2010 amounted to \$230,875.

Common Stock

On September 22, 2009, the stockholders approved a proposal to increase the authorized Common Stock of the Company from 100,000,000 shares to 120,000,000 shares. On May 25, 2010, the stockholders approved a proposal to increase the authorized Common Stock of the Company from 120,000,000 shares to 250,000,000 shares.

At the Market Sales Agreement

On December 22, 2010, the Company entered into an At Market Issuance Sales Agreement (the “ATM”) under which the Company, from time to time, may issue and sell shares of its Common Stock, par value \$0.01 per share, with an aggregate offering price of up to \$5,500,000. Such Common Stock will be offered and sold pursuant to a prospectus supplement filed with the Securities and Exchange Commission in connection with the Company’s shelf registration statement on Form S-3 (File No. 333-170140), which became effective on November 9, 2010.

Upon delivery of a placement notice by the Company, if any, the placement agent may sell the Common Stock in any method permitted by law deemed to be an “at the market” offering as defined in Rule 415 promulgated under the Securities Act of 1933, as amended, at prices prevailing at the time of sale or at prices related to such prevailing market prices, including sales made directly on the NYSE Amex LLC, or NYSE Amex, or sales made through a market maker other than on an exchange. The placement agent will make all sales using commercially reasonable efforts consistent with its normal sales and trading practices on mutually agreed upon terms between the placement agent and the Company. The Company will pay the placement agent a commission of up to 6% of the gross proceeds from the sale of shares of the Common Stock, depending on the per share sales price. The Company has agreed to reimburse a portion of the placement agent’s expenses in connection with the offering, up to an aggregate amount of \$25,000. In addition, the Company granted customary indemnification rights to the placement agent.

SENESCO TECHNOLOGIES, INC. AND SUBSIDIARY
(A DEVELOPMENT STAGE COMPANY)
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

The ATM will terminate upon the earlier of (1) the sale of all of the Common Stock subject to the ATM, or (2) upon termination by the Company or the placement agent. The placement agent may terminate the ATM in certain circumstances, including the occurrence of a material adverse change that, in the placement agent's reasonable judgment, may impair its ability to sell the Common Stock, the Company's failure to satisfy any condition under the ATM or a suspension or limitation of trading of the Common Stock on the NYSE Amex. In addition, either the Company or the placement agent may terminate the ATM at any time and for any reason upon 10 days prior notice to the other party.

During the year ended June 30, 2011, the Company issued 5,911,457 shares of Common Stock under the ATM for gross proceeds in the amount of \$1,853,421. From July 1, 2011 through September 26, 2011, the Company issued an additional 1,730,211 shares of Common Stock under the ATM for gross proceeds in the amount of \$481,368 and net proceeds in the amount of \$451,096.

Private Placements of Common Stock and Warrants

In July 2009 and September 2009, the Company issued 1,555,555 shares of common stock in a private placement to unaffiliated investors. The Company received total gross proceeds in the amount of \$1,400,000.

In connection with the private placement to the unaffiliated investors in July and September 2009, the Company issued Series A warrants to purchase 1,400,000 shares of the Company's common stock at \$0.01 per warrant share. The Series A Warrants have a term of seven years and were exercisable immediately after the date of grant. The Company also issued Series B Warrants to purchase 2,461,110 shares of the Company's common stock at \$0.60 per warrant share. The Series B Warrants have a term of seven years and were not exercisable until after the six-month anniversary from the date of grant.

Additionally, on September 30, 2009, the Company issued 144,444 shares of common stock in a private placement to affiliated investors. The Company received total gross proceeds in the amount of \$130,000.

In connection with the private placement to the affiliated investors on September 30, 2009, the Company issued Series A warrants to purchase 130,000 shares of the Company's common stock at \$0.01 per warrant share. The Series A Warrants have a term of seven years and were exercisable immediately after the date of grant. The Company also issued Series B Warrants to purchase 131,807 shares of the Company's common stock at \$0.60 per warrant share. The Series B Warrant has a term of seven years and was not exercisable until after the six-month anniversary from the date of grant.

Also, on September 30, 2009, the Company issued 194,444 Shares of the Company's common stock at \$0.90 per share, a Series A warrant and a Series B warrant in exchange for the extinguishment of an accounts payable due to the vendor amounting to \$175,000.

The Series A Warrant entitles the holder to purchase in the aggregate, up to 175,000 shares of the Company's common stock at \$0.01 per warrant share, has a term of seven years and was exercisable immediately after the date of grant. The Series B Warrant entitles the holder to purchase, up to 177,431 shares of the Company's common stock at \$0.60 per warrant share, has a term of seven years and was not exercisable until after the six-month anniversary from the date of grant.

The transaction was accounted for as an extinguishment of debt. The Company valued the common stock and warrants issued at fair value on the date of the closing which amounted to \$261,532 and recorded a loss on the extinguishment of debt in the amount of \$86,532 for the year ended June 30, 2010.

In connection with the July 2009 and September 2009 private placements, the Company incurred \$180,862 in issuance costs which has been recorded as a charge to Capital in Excess of Par Value.

SENESCO TECHNOLOGIES, INC. AND SUBSIDIARY
(A DEVELOPMENT STAGE COMPANY)
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

11. Stock-Based Compensation

In December 2008, the Company adopted the 2008 Incentive Compensation Plan (the "2008 Plan"), which provides for the grant of stock options, stock grants and stock purchase rights to certain designated employees and certain other persons performing services for the Company, as designated by the board of directors. Pursuant to the 2008 Plan, an aggregate of 5,137,200 shares of common stock had been reserved for issuance. On May 25, 2010, the Company increased the aggregate shares of common stock reserved for issuance under the 2008 Plan to 11,137,200. On March 11, 2011, the Company increased the aggregate shares of common stock reserved for issuance under the 2008 Plan to 23,005,003. Additionally, on January 1 of each calendar year beginning with the calendar year 2012 and ending with the calendar year 2015, the share reserve will automatically increase so that the total number of shares available for issuance under the 2008 Plan is 15% of the fully diluted shares as of the date of such increase, but in no event will such annual increase exceed 7,000,000 shares per year. The 2008 Plan is intended to serve as a successor to the Amended and Restated 1998 Stock Incentive Plan (the "1998 Plan"), which terminated in December 2008. On February 19, 2009, the Company filed a registration statement with the SEC to register all of the 6,137,200 shares of Common Stock underlying the 2008 Plan. On June 8, 2010, the Company filed with the SEC an amendment to the registration statement to register the additional 5,000,000 shares of Common Stock underlying the 2008 Plan. The registration statement and amendment was deemed effective upon filing.

The terms and vesting schedules for share-based awards vary by type of grant and the employment status of the grantee. Generally, the awards vest based upon time-based conditions or achievement of specified goals and milestones.

As of June 30, 2011, the aggregate intrinsic value of stock options outstanding was \$81,018, with a weighted-average remaining term of 7.25 years. The aggregate intrinsic value of stock options exercisable at that same date was \$20,285, with a weighted-average remaining term of 6.15 years. As of June 30, 2011, the Company has 14,643,289 shares available for future stock option grants.

SENESCO TECHNOLOGIES, INC. AND SUBSIDIARY
(A DEVELOPMENT STAGE COMPANY)
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

As of June 30, 2011, total estimated compensation expense not yet recognized related to stock option grants amounted to \$952,069, which will be recognized over the next 42 months.

Warrants

Total outstanding warrants at June 30, 2011 were as follows:

	<u>Strike Price</u>	<u>Warrants</u>
\$	7.00	10,000
\$	3.45	15,000
\$	3.15	20,000
\$	2.35	15,000
\$	2.15	110,000
\$	1.40	5,000
\$	1.18	993,153
\$	1.08	2,500
\$	1.07	139,041
\$	1.01	5,900,000
\$	0.99	1,000
\$	0.90	388,889
\$	0.74	151,314
\$	0.60	2,770,850
\$	0.50	2,853,126
\$	0.35	37,007,813
\$	0.32	4,388,540
\$	0.26	5,000
\$	0.01	525,000
		<u>55,301,226</u>

As of June 30, 2011, 55,297,892 of the above warrants are exercisable expiring at various dates through 2016. At June 30, 2011, the weighted-average exercise price on the above warrants was \$0.46.

Short-Term Incentive Program

In November 2008, the Company adopted a Short-Term Equity Incentive Program for key employees in which shares of the Company's Common Stock, or options to acquire shares of the Company's Common Stock would be awarded, if the Company achieved certain target goals relating to research, financing, licensing, investor relations and other administrative items during the fiscal year ending June 30, 2009. The number of eligible shares and options to be awarded to the employees was based upon certain performance criteria as defined in the incentive program.

As of June 30, 2009, the Company had determined that the achievement of the target goals was probable and issued 116,000 Restricted Stock Units ("RSU") and 124,000 options to purchase common stock with a fair value based upon the Black Scholes model of \$140,480. As a result, the Company recognized the fair value of the awards as compensation expense ratably over the seven and one-half month period from November 19, 2008 through June 30, 2009. In October 2009, it was determined that the executive officers had partially achieved the previously granted short-term performance milestones and the number of RSU's and options to purchase common stock which vested were reduced. As a result, compensation expense was reduced by \$13,840 during the year ended June 30, 2010.

SENESCO TECHNOLOGIES, INC. AND SUBSIDIARY
(A DEVELOPMENT STAGE COMPANY)
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

Long-Term Incentive Program

On December 13, 2007, the Company adopted a Long-Term Equity Incentive Program for the members of the executive management team in which key employees will be awarded shares of the Company's Common Stock and options to acquire shares of the Company's Common Stock if the Company achieves certain target goals relating to its multiple myeloma research project over the three fiscal year period from the date of adoption.

During the year ended June 30, 2011, the Company determined that the first target goal under the Long-Term Equity Incentive Program had been met and, therefore, recognized \$93,500 of compensation. The Company also determined that the second and third target goals under the Long-Term Equity Incentive Program would not be met. As such, the eligible shares and options related thereto will not vest and the remaining \$374,000 of potential compensation expense will not be recognized.

12. Income Taxes:

Since the Company has recurring losses and a valuation allowance against deferred tax assets, there is no tax expense (benefit) for all periods presented.

The Company files a consolidated federal income tax return. The subsidiary files separate state and local income tax returns.

The amount of the deferred tax asset and valuation allowance for the year ended June 30, 2010 was decreased by \$3,232,800, from \$17,923,000 to \$14,690,200, due to a decrease in the taxable net operating loss in the amount of approximately \$8,000,000, which represents a correction in the tax treatment of amortization of convertible note discount.

The reconciliation of the effective income tax rate to the federal statutory rate is as follows:

	<u>2011</u>	<u>June 30,</u> <u>2010</u>	<u>2009</u>
Federal income tax provision at statutory rate	(34.0)%	(34.0)%	(34.0)%
Fair value - warrant liability	(2.8)%	(6.4)%	-
Stock-based compensation	3.5%	1.0%	0.5%
Amortization of debt discount and finance costs	-	23.0%	5.8%
Other	(1.6)%	(0.5)%	0.1%
Change in valuation allowance	<u>34.9%</u>	<u>16.9%</u>	<u>27.6%</u>
Actual income tax provision (benefit) effective tax rate	<u>- %</u>	<u>- %</u>	<u>- %</u>

The deferred income tax asset consists of the following at:

	<u>2011</u>	<u>June 30,</u> <u>2010</u>
Deferred tax assets:		
Net operating loss carryforwards	\$15,931,894	\$12,943,177
Stock-based compensation	2,101,085	1,800,939
Other	<u>(95,928)</u>	<u>(53,916)</u>
	17,937,051	14,690,200
Valuation allowance	<u>(17,937,051)</u>	<u>(14,690,200)</u>
Net deferred tax asset	<u>\$ -</u>	<u>\$ -</u>

SENESCO TECHNOLOGIES, INC. AND SUBSIDIARY
(A DEVELOPMENT STAGE COMPANY)
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

At June 30, 2011, the Company has federal and state net operating loss carryforwards of approximately \$40,935,000 and \$33,576,000, respectively, available to offset future taxable income expiring on various dates through 2031. The timing and extent to which the Company can utilize future tax deductions in any year may be limited by provisions of the Internal Revenue Code regarding changes in ownership of Corporations (i.e. IRS Code Section 382).

13. Commitments:

Research Agreement

Effective September 1, 1998, the Company entered into a research and development agreement, which has subsequently been renewed, with The University of Waterloo which Dr. John Thompson, who is an officer, director and stockholder of the Company, is affiliated with. Pursuant to the agreement, the university provides research and development under the direction of the researcher and the Company. The agreement is renewable annually by the Company which has the right of termination upon 30 days' advance written notice. Effective September 1, 2010, the Company extended the research and development agreement for an additional three-month period through November 30, 2010, in the amount of Can \$164,200, or approximately U.S. \$164,200. Effective December 1, 2010, the Company extended the research and development agreement for an additional nine-month period through August 31, 2011, in the amount of Can \$434,687. Effective September 1, 2011, the Company extended the research and development agreement for an additional one-year period through August 31, 2012 in the amount of Can \$555,900. Research and development expenses under this agreement for the years ended June 30, 2011, 2010 and 2009 aggregated U.S. \$622,872, U.S. \$672,693 and U.S. \$653,104, respectively, and U.S. \$6,575,933 for the cumulative period through June 30, 2011. Future obligations to be paid under the agreement through August 31, 2012 equal approximately U.S. \$567,000.

Supply and service agreements

Effective June 20, 2011, the Company entered into an agreement with Criterium, Inc. ("Criterium") under which Criterium will provide monitoring, project and data management services in connection with the Company's Phase 1b/2a clinical trial. The agreement has an initial term that commences on the date of the agreement and runs for a period of eighteen (18) months. The Company's financial obligation under the agreement is estimated to be approximately \$483,000.

Consulting and other Agreements

Effective May 1, 1999, the Company entered into a consulting agreement for research and development with Dr. John Thompson. The agreement was renewed for an additional two-year term through June 30, 2013. Future obligations to be paid under the agreement equal \$135,000.

The Company is obligated under a non-cancelable operating lease of office space expiring on May 31, 2013. The aggregate minimum future payments are \$131,172. Rent expense charged to operations aggregated \$88,766, \$86,215, \$84,768 and \$845,558 for the years ended June 30, 2011, 2010, 2009, and from inception through June 30, 2011, respectively.

14. Collaborative Arrangements:

On May 14, 1999, the Company entered into an agreement ("Collaboration") with an Israeli partnership that is engaged in the worldwide marketing of tissue culture plants. The purpose of the Collaboration is to develop enhanced banana plants which will result in banana fruit with improved consumer- and grower-driven traits. The program has been performed as a joint collaboration whereby the Company pays for 50% of the research costs of the program. The Company's portion of the expenses of the collaboration approximated \$205,000, \$214,000 and \$210,000 for the years ended June 30, 2011, 2010 and 2009, respectively, and is included in research and development expenses.

SENESCO TECHNOLOGIES, INC. AND SUBSIDIARY
(A DEVELOPMENT STAGE COMPANY)
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

In July 1999, the Collaboration applied for and received a conditional grant from the Israel - United States Binational Research and Development Foundation (the "BIRD Foundation"). This agreement, as amended, allowed the Collaboration to receive \$340,000 over a five-year period ending May 31, 2004. Grants received from the BIRD Foundation will be paid back only upon the commercial success of the Collaborations technology, as defined. The Company has received a total of \$99,728, all of which was received prior to the years ended June 30, 2011, June 30, 2010 and June 30, 2009.

15. Grant Income:

On October 29, 2010, the Company was approved for a grant in the amount of \$244,479 in connection with the Qualified Therapeutic Discovery Project, which is Section 48D of the Internal Revenue Code. The funds were granted in connection with the Company's program for the use of its lead therapeutic candidate, SNS01-T, in multiple myeloma.

16. Supplemental Cash Flow Information

- (1) Member of the Compensation Committee
- (2) Member of the Audit Committee
- (3) Member of the Nominating and Corporate Governance Committee

None of our current executive officers are related to any other executive officer or to any of our directors. Our executive officers are elected annually by our board and serve until their successors are duly elected and qualified.

Leslie J. Browne, Ph.D. was appointed our President and Chief Executive Officer in May 2010 and has been our director since March 2011. Dr. Browne has over 30 years of experience in the pharmaceutical industry. Prior to joining Senesco in May 2010, he served from October 2008 to May 2010 as President and CEO, and is currently chair, of Phrixus Pharmaceuticals, Inc., a private biotech working on muscular dystrophy and heart failure. He recently served from January 2007 to January 2009 as chair of the New Jersey Technology Council, where he continues as a member of the board. He also served from April 2007 to January 2009 as an independent director of Genelabs Technologies, which was sold to GSK, and from September 2004 to May 2008 as President, CEO and Director of Pharmacoepia, a Nasdaq listed company, where he transformed the company from a discovery contract research organization to a clinical development stage biopharmaceutical company with multiple internal development programs. Prior to joining Pharmacoepia, Dr. Browne was the Chief Operating Officer at Iconix Pharmaceuticals, Inc., a privately-held chemogenomics company from October 2001 to July 2004. Before Iconix, Dr. Browne held key positions at Berlex/Schering AG from 1990 to 2000, including Corporate Vice President, Berlex Laboratories, Inc. and President of

Schering Berlin Venture Corporation. In 1979, Dr. Browne began his industrial career at Ciba-Geigy, now Novartis, where he invented fadrozole, for the treatment of breast cancer and was closely involved in the discoveries of Femara® and Diovan®, which became major products for Novartis. Dr. Browne received his Bachelor of Science degree in Chemistry in 1972 from the University of Strathclyde, Glasgow Scotland. He received his Ph.D. in Organic Chemistry in 1978 from the University of Michigan and his postdoctoral training as a National Institutes of Health Postdoctoral Fellow at Harvard University from January 1978 to April 1979. Dr. Browne is an experienced executive with former CEO experience and senior executive level experience at large multinational, as well as development stage, life sciences companies. He also has corporate governance experience through service on boards of other companies and organizations. Dr. Browne's educational background also provides him with the tools necessary to understand the science underlying our technology and how it relates to human health and agricultural applications.

John E. Thompson, Ph.D. has been our director since October 2001. Dr. Thompson was appointed our President and Chief Executive Officer in January 1999, and he continued in that capacity until September 1999 when he was appointed Executive Vice President of Research and Development. In July 2004, Dr. Thompson became our Executive Vice President and Chief Scientific Officer. Dr. Thompson is the inventor of the technology that we develop. Since July 2001, he has been the Associate Vice President, Research and, from July 1990 to June 2001, he was the Dean of Science at the University of Waterloo in Waterloo, Ontario, Canada. Dr. Thompson has a Ph.D. in Biology from the University of Alberta, Edmonton, and he is a Fellow of the Royal Society of Canada. Dr. Thompson is also the recipient of a Lady Davis Visiting Fellowship, the Sigma Xi Award for Excellence in Research, the CSPP Gold Medal and the Technion Visiting Fellowship. Dr. Thompson has an in-depth knowledge and understanding of the science underlying our technology and how it relates to human health and agricultural applications.

Joel Brooks was appointed our Chief Financial Officer and Treasurer in December 2000. Mr. Brooks was appointed our Secretary in May 2010. From September 1998 until November 2000, Mr. Brooks was the Chief Financial Officer of Blades Board and Skate, LLC, a retail establishment specializing in the action sports industry. Mr. Brooks was Chief Financial Officer from 1997 until 1998 and Controller from 1994 until 1997 of Cable and Company Worldwide, Inc. He also held the position of Controller at USA Detergents, Inc. from 1992 until 1994, and held various positions at several public accounting firms from 1983 through 1992. Mr. Brooks is also a director and chairman of the audit committee of USA Technologies, Inc. Mr. Brooks received his Bachelor of Science degree in Commerce with a major in Accounting from Rider University in February 1983.

Richard Dondero was appointed our Vice President of Research and Development in July 2004. From July 2002 until July 2004, Mr. Dondero was a Group Leader in the Proteomics Reagent Manufacturing division of Molecular Staging, Inc., a biotech firm engaged in the measurement and discovery of new biomarkers. From 1985 through June 2001, Mr. Dondero served in several roles of increasing responsibility through Vice President of Operations and Product Development at Cistron Biotechnology, Inc. From 1977 through 1985, Mr. Dondero served as a senior scientist at Johnson and Johnson, and from 1975 through 1977, as a scientist at Becton Dickinson. Mr. Dondero received his Bachelor of Arts degree from New Jersey State University in 1972 and his Master of Science degree from Seton Hall University in 1976.

Harlan W. Waksal, M.D. has been our chairman of the board of directors since June 2009 and a director since October 2008. From July 2003 to present, Dr. Waksal has been the President and Sole Proprietor of Waksal Consulting L.L.C., which provides strategic business and clinical development counsel to biotechnology companies. Dr. Waksal co-founded the biotechnology company ImClone Systems Inc. in 1984. From July 2011 to present, Dr. Waksal has served as the Executive Vice-President, Business and Scientific Affairs of Acasti Pharma, Inc., which is a subsidiary of Neptune Technologies & Bioresources, Inc. From March 1987 through July 2003, Dr. Waksal had served in various senior roles for ImClone Systems Inc. as follows: March 1987 through April 1994 – President; April 1994 through May 2002 – Executive Vice President and Chief Operating Officer; May 2002 through July 2003 – President, Chief Executive Officer and Chief Operating Officer. Dr. Waksal also served as a director of ImClone Systems Inc. from March 1987 through January 2005. Dr. Waksal is currently a member of the Board of Trustees of Oberlin College. Dr. Waksal received a Bachelor of Arts in Biology from Oberlin College and an M.D. from Tufts University School of Medicine. Dr. Waksal is knowledgeable in science, drug development, regulatory and clinical affairs. In addition, he ran and operated a public biotechnology company and is familiar with the issues of corporate governance.

John N. Braca has been our director since October 2003. Mr. Braca has also served as a director and board observer for other healthcare, technology and biotechnology companies over the course of his career. Since August 2010, Mr. Braca has been the executive director controller for Iroko Pharmaceuticals, a privately-held global pharmaceutical company based in Philadelphia. From April 2006 through July 2010, Mr. Braca was the managing director of Fountainhead Venture Group, a healthcare information technology venture fund based in the Philadelphia area, and has been working with both investors and developing companies to establish exit and business development opportunities. From May 2005 through March 2006, Mr. Braca was a consultant and advisor to GlaxoSmithKline management in their research operations. From 1997 to April 2005, Mr. Braca was a general partner and director of business investments for S.R. One, Limited, or S.R. One, the venture capital subsidiary of GlaxoSmithKline. In addition, from January 2000 to July 2003, Mr. Braca was a general partner of Euclid SR Partners Corporation, an independent venture capital partnership. Prior to joining S.R. One, Mr. Braca held various finance and operating positions of increasing responsibility within several subsidiaries and business units of GlaxoSmithKline. Mr. Braca is a licensed Certified Public Accountant in the state of Pennsylvania and is affiliated with the American Institute of Certified Public Accountants and the Pennsylvania Institute of Certified Public Accountants. Mr. Braca received a Bachelor of Science in Accounting from Villanova University and a Master of Business Administration in Marketing from Saint Joseph's University. Mr. Braca's financial background, operating experience with both large pharmaceutical companies and developing biotechnology companies, provides the board with practical experience for issues facing the Company. In addition, Mr. Braca also has a strong corporate governance background through his experience with other company boards.

Christopher Forbes has been our director since January 1999. From September 2011 to present, Mr. Forbes has been the Vice Chairman of Forbes Media LLC and Forbes Family Holdings, and Vice President of Forbes Management Co. Inc. From 1989 through September 2011, Mr. Forbes had been Vice Chairman of Forbes, Inc. From 1981 to 1989, Mr. Forbes was Corporate Secretary at Forbes. Prior to 1981, he held the position of Vice President and Associate Publisher. Mr. Forbes is the Chairman of the American Friends of the Louvre, and he

also sits on the boards of The Friends of New Jersey State Museum and The New York Academy of Art. He is also a member of the board of advisors of The Princeton University Art Museum. Mr. Forbes received a Bachelor of Arts degree in Art History from Princeton University in 1972.

In 1986, he was awarded the honorary degree of Doctor of Humane Letters by New Hampshire College and in 2003 was appointed a Chevalier of the Legion of Honor by the French Government. Mr. Forbes's knowledge regarding corporate operations as well as his business acumen, provide the board with experience in running a corporation and addressing the issues that face a growing company, such as ours.

Warren J. Isabelle has been our director since June 2009. Mr. Isabelle is a founder and principal of Ironwood Investment Management L.L.C., located in Boston, MA. Mr. Isabelle founded Ironwood Investment Management L.L.C in August 1997. From 1983 until 1997, Mr. Isabelle was with Pioneer Management Corporation where he served most recently as Director of Research and Head of U.S. Equities. Mr. Isabelle has also, since January 2004, served as a member of the Public Board and Vice-Chairman of the Investment Committee of the University of Massachusetts Foundation. Mr. Isabelle is a Chartered Financial Analyst and member of the CFA institute and the American Chemical Society. Mr. Isabelle received a Bachelor of Science degree in chemistry from Lowell Technological Institute, a Master of Science degree in Polymer Science and Engineering from the University of Massachusetts, and a MBA from the Wharton School, University of Pennsylvania. Mr. Isabelle's experience as an investment analyst and portfolio manager provides the Company with valuable insight into the biotechnology industry and the publicly-traded capital markets.

Thomas C. Quick has been our director since February 1999. Since 2003, Mr. Quick has been the President of First Palm Beach Properties, Inc. From 2001 through 2003, Mr. Quick was the Vice Chairman of Quick & Reilly/Fleet Securities, Inc., successor to The Quick & Reilly Group, Inc., a holding company for four (4) major financial services businesses. From 1996 until 2001, Mr. Quick was the President and Chief Operating Officer and a director of Quick & Reilly/Fleet Securities, Inc. From 1985 to 1996, he was President of Quick & Reilly, Inc., a Quick & Reilly subsidiary and a national discount brokerage firm. Mr. Quick serves as a member of the board of directors and compensation committee of B.F. Enterprises. He is also a member of the board of directors of Best Buddies, The American Ireland Fund and Venetian Heritage, Inc. He is a trustee of the National Corporate Theater Fund, Cold Spring Harbor Laboratories, the Norton Museum and the Inter-City Scholarship Foundation of New York City. Mr. Quick is a graduate of Fairfield University. As a result of his professional and other experiences, Mr. Quick has a deep understanding of corporate operations and strategy, and operations in both the US and internationally. Mr. Quick also has significant corporate governance experience through his service on other company boards.

David Rector has been our director since February 2002. Mr. Rector also serves as a director and member of the compensation and audit committee of the Dallas Gold and Silver Exchange (formerly Superior Galleries, Inc.) Mr. Rector also serves on the board of directors of Sagebrush Gold, Ltd. and California Gold Corp. Since 1985, Mr. Rector has been the Principal of The David Stephen Group, which provides enterprise consulting services to emerging and developing companies in a variety of industries. Since May 2011 through present, Mr. Rector has served as the President of Sagebrush Gold, Ltd. From October 2009 through August 2011, Mr. Rector had served as President and CEO of Li3 Energy, Inc. From July 2009 through May 2011, Mr. Rector had served as President and CEO of Nevada Gold Holdings, Inc. From September 2008 through November 2010, Mr. Rector served as President and CEO Universal

Gold Mining Corp. Since October 2007 through present, Mr. Rector has served as President and CEO of Standard Drilling, Inc. From May 2004 through December 2006, Mr. Rector had served in senior management positions with Nanoscience Technologies, Inc., a development stage company engaged in the development of DNA Nanotechnology. From 1983 until 1985, Mr. Rector served as President and General Manager of Sunset Designs, Inc., a domestic and international manufacturer and marketer of consumer product craft kits, and a wholly-owned subsidiary of Reckitt & Coleman N.A. From 1980 until 1983, Mr. Rector served as the Director of Marketing of Sunset Designs. From 1971 until 1980, Mr. Rector served in progressive roles in the financial and product marketing departments of Crown Zellerbach Corporation, a multi-billion dollar pulp and paper industry corporation. Mr. Rector received a Bachelor of Science degree in Business/Finance from Murray State University in 1969. As a result of these professional and other experiences, Mr. Rector has a deep business understanding of developing companies. Mr. Rector also brings corporate governance experience through his service on other company boards.

Rudolf Stalder has been our director since February 1999 and was appointed as our Chairman and Chief Executive Officer on January 10, 2000. On October 4, 2001, Mr. Stalder resigned as our Chief Executive Officer. On June 8, 2009, Mr. Stalder resigned as our Chairman. Mr. Stalder is a former member of the executive boards of Credit Suisse Group and Credit Suisse First Boston and former Chief Executive Officer of the Americas Region of Credit Suisse Private Banking. Mr. Stalder joined Credit Suisse in 1980 as a founding member and Deputy Head of the Multinational Services Group. In 1986, he became Executive Vice President. He was named to Credit Suisse's Executive Board in 1989. In 1990, he became Head of the Commercial Banking Division and a Member of the Executive Committee. From 1991 to 1995, Mr. Stalder was Chief Financial Officer of Credit Suisse First Boston and a Member of the Executive Boards of Credit Suisse Group and Credit Suisse First Boston. He became head of the Americas Region of Credit Suisse Private Banking in 1995 and retired in 1998. Prior to moving to the United States, Mr. Stalder was a member of the Board of Directors for several Swiss subsidiaries of major corporations including AEG, Bayer, BTR, Hoechst, Saint Gobain, Solvay and Sony. He is a fellow of the World Economic Forum. He currently serves on the board of the Greater Bridgeport Symphony. He was a member of the Leadership Committee of the Consolidated Corporate Fund of Lincoln Center for the Performing Arts, Board of The American Ballet Theatre and a Trustee of Carnegie Hall. From 1991 through 1998, Mr. Stalder was Chairman of the New York Chapter of the Swiss-American Chamber of Commerce. He continues to serve as an advisory board member of the American-Swiss Foundation. Mr. Stalder received a diploma in advanced finance management at the International Management Development Institute in Lausanne, Switzerland in 1976. He completed the International Senior Managers Program at Harvard University in 1985. Mr. Stalder is an experienced executive with former CEO experience and senior executive level experience at large multinational companies. He also has corporate governance experience through service on other public company boards.

Jack Van Hulst has been our director since January 2007. Mr. Van Hulst was appointed as our President and Chief Executive Officer effective November 16, 2009. Mr. Van Hulst was further appointed as our Secretary effective February 1, 2010. Mr. Van Hulst resigned as our President and Chief Executive Officer and Secretary effective May 25, 2010. Since June 2010, Mr. Van Hulst has been the operating partner of SK Capital Partners. Mr. Van Hulst also serves as a director and member of the compensation and audit committees of HiTech Pharmacal, Inc. He has more than 42 years of international experience in the pharmaceutical industry. He began

his career in 1968 at Organon, which was subsequently acquired by AKZO, N.V., the multinational human and animal healthcare company, where he was based in Europe and the US and responsible for establishing AKZO's position in the US in the manufacturing and sales and marketing of fine chemicals. Mr. Van Hulst later became President of AKZO's US Pharmaceutical Generic Drug Business and was responsible for establishing AKZO in the US generic drug industry. From 1989 to 1999, Mr. Van Hulst successively owned and led two generic pharmaceutical companies, improving their operations and then selling them to a private equity group and a pharmaceutical company. From 1999 to 2005, he was Executive Vice President at Puerto Rico-based MOVA Pharmaceutical Corporation, a contract manufacturer to the pharmaceutical industry that recently merged with Canadian-based Patheon. Mr. Van Hulst also serves as Chairman of the Board of The International Center in New York, a non-profit organization. Mr. Van Hulst received a Masters degree in law from the University in Utrecht, Netherlands in 1968. Mr. Van Hulst possesses management experience as a result of his prior positions. Mr. Van Hulst spent years holding a number of management roles at other pharmaceutical companies and this experience assists the Company in working through the similar issues that it may face in its own operations.

Section 16(a) Beneficial Ownership Reporting Compliance

Section 16(a) of the Exchange Act requires a company's directors, officers and stockholders who beneficially own more than 10% of any class of equity securities of the company registered pursuant to Section 12 of the Exchange Act, collectively referred to herein as the Reporting Persons, to file initial statements of beneficial ownership of securities and statements of changes in beneficial ownership of securities with respect to the company's equity securities with the SEC. All Reporting Persons are required by SEC regulation to furnish us with copies of all reports that such Reporting Persons file with the SEC pursuant to Section 16(a).

Based solely on our review of the copies of such forms received by us and upon written representations of the Reporting Persons received by us, we believe that there has been compliance with all Section 16(a) filing requirements applicable to our Reporting Persons.

Code of Business Ethics and Conduct

On March 17, 2003, our board adopted a Code of Business Ethics and Conduct, which may also be found on our website at www.senesco.com. Our Code of Ethics contains written standards designed to deter wrongdoing and to promote:

- honest and ethical conduct, including the ethical handling of actual or apparent conflicts of interest between personal and professional relationships;
- full, fair, accurate, timely, and understandable disclosure in reports and documents filed with the SEC and in other public communications made by the Company;
- compliance with applicable governmental laws, rules and regulations;
- the prompt internal reporting of violations of our Code of Ethics to an appropriate person or persons identified in our Code of Ethics; and
- accountability for adherence to our Code of Ethics.

Each of our employees, officers and directors completed a signed certification to document his or her understanding of and compliance with our Code of Ethics.

Audit Committee

Our Audit Committee was established in July 1999. On March 11, 2011, our board adopted an Amended and Restated Audit Committee Charter. The primary responsibilities of our Audit Committee include:

- appointing, approving the compensation of, and assessing the independence of our independent registered public accounting firm;
- overseeing the work of our independent registered public accounting firm, including through the receipt and consideration of certain reports from our independent registered public accounting firm;
- reviewing and discussing with management and our independent registered public accounting firm our annual and quarterly financial statements and related disclosures;
- monitoring our internal control over financial reporting, disclosure controls and procedures and code of business conduct and ethics;
- discussing our risk management policies;
- establishing policies regarding hiring employees from our independent registered public accounting firm and procedures for the receipt and retention of accounting related complaints and concerns;
- meeting independently with our independent registered public accounting firm and management; and
- preparing the audit committee report required by SEC rules.

Our Audit Committee is currently comprised of John N. Braca, David Rector and Rudolf Stalder. Mr. Braca currently serves as the chairman of the Audit Committee. The NYSE Amex currently requires an Audit Committee comprised solely of independent directors. Messrs. Braca, Rector and Stalder are “independent” members of our board as defined in Rule 10A-3 under the Securities Exchange Act of 1934, as amended, or the Exchange Act, and Section 803 of the NYSE Amex Company Guide. In addition, our board of directors has determined that Mr. Braca satisfies the definition of an audit committee “financial expert” as set forth in Item 407(d) (5) of Regulation S-K promulgated by the SEC. Our Audit Committee held five (5) meetings during Fiscal 2011.

Item 11. Executive Compensation.

Compensation Discussion and Analysis

This Compensation Discussion and Analysis explains the principles underlying our compensation policies and decisions and the principal elements of compensation paid to our executive officers during Fiscal 2011 and as anticipated for Fiscal 2012. Our Chief Executive Officer, Chief Financial Officer and all of our other executive officers included in the Summary Compensation Table will be referred to as the “named executive officers” for purposes of this discussion.

Compensation Objectives and Philosophy

The Compensation Committee, also referred to herein as the Committee, of the board is responsible for the following:

- annually reviewing and approving, or recommending for approval by our board, the corporate goals and objectives relevant to executive officer compensation;
- reviewing and approving, or recommending for approval by our board, the salaries and incentive compensation of our executive officers;
- preparing the Compensation Committee report, including the Compensation Discussion and Analysis;
- administering our 2008 Incentive Compensation Plan, or similar stock plan adopted by our stockholders; and
- reviewing and making recommendations to our board with respect to director compensation.

As part of this process, the Committee seeks to accomplish the following objectives with respect to our executive compensation programs:

- to motivate, recruit and retain executives capable of meeting our strategic objectives;
- to provide incentives to ensure superior executive performance and successful financial results for us; and
- to align the interests of executives with the long-term interests of our stockholders.

The Committee seeks to achieve these objectives by:

- linking a substantial portion of compensation to our achievement of long-term and short-term financial objectives and the individual's contribution to the attainment of those objectives;
- providing long-term equity-based incentives and encouraging direct share ownership by executives with the intention of providing incentive-based compensation to encourage a long-term focus on company profitability and stockholder value; and
- understanding the marketplace and establishing a compensation structure that is adjusted for our position in the marketplace and our current financial condition and limited capital resources.

Setting Executive Compensation

For Fiscal 2011, the Committee's objective was to target each component of compensation listed below to be competitive with comparable positions at peer group companies, and to target the total annual compensation of each named executive officer at the appropriate level for comparable positions at the competitive peer group companies.

During the compensation review process for Fiscal 2011, the Committee engaged, J. Richard and Co., also referred to herein as J. Richard, a nationally recognized compensation consulting firm, as its compensation consultant, on an as needed basis regarding its proposed programs and approaches to compensation during Fiscal 2011, for which J. Richard was compensated. Other than as described above, J. Richard did not provide any additional services to the Committee or Senesco for Fiscal 2011, and compensation to J. Richard for services rendered in Fiscal 2011 was less than \$120,000. In addition, the Committee consulted with J. Richard in connection with its plans for Fiscal 2012.

The Committee elected to identify various companies in the biotech sector it felt were somewhat close in scope of operation to Senesco. It became evident, as in prior years, that due to the key banner points listed above (the breadth of operations in general, executive officers scope of duties and responsibilities, position in the life cycle, financial responsibilities, capitalization and size of management staff) it is very difficult to identify such public entities for comparative purposes. For Fiscal 2011, the companies we elected to evaluate were as follows: Adolor Corporation (ADLR); MDRNA Inc. (MRNA); Anesiva Inc. (ANSV); Santarus Inc. (SNTS); Sequenom, Inc.(SQNM); Cubist (CBST); Lexicon (LXX); and Targacept, Inc. (TRGT). For Fiscal 2012, the companies we elected to evaluate were as follows: Access Pharma (ACCP.OB); Adventrx (ANX); Poniard (PARD); Cortex (CORX.OB); Callisto (CLSP.OB); RXi Pharmaceuticals (RXII); Titan Pharma (TTNP.OB); Oxigene (OXGN); Entremed (ENMD); and Silence Therapeutics (SLNCF). In selecting companies to survey for such compensation purposes, the Committee considered many factors not directly associated with the stock price performance of those companies, such as geographic location, development stage, organizational structure and market capitalization. For this reason, there is not a meaningful correlation between the companies included within the peer group identified for comparative compensation purposes and the companies included within the RDG Micro Biotechnology Index.

In determining the compensation of each named executive officer, the Committee also considers a number of other factors, including our recent performance and the named executive officer's individual performance, the Chief Executive Officer's recommendations and the importance of the executive's position and role in relation to execution of our strategic plan. There is no pre-established policy for allocation of compensation between cash and non-cash components or between short-term and long-term components. Instead, the Committee determines the mix of compensation for each named executive officer based on its review of the competitive data, its subjective analysis of that individual's performance and contribution to our financial performance, the financial strength and outlook of Senesco and, most of all, what is considered fair and reasonable based on the scope of operations and responsibilities of the officer. For the Chief Executive Officer, for Fiscal 2011, the Committee set his performance

targets and compensation levels based upon the input from the Committee's analysis and from the Chief Executive Officer. For other named executive officers, the Committee sets performance targets and compensation levels after taking into consideration recommendations from the Chief Executive Officer.

Components of Compensation

For Fiscal 2011, our executive compensation program included the following components:

- base salary;
- annual short-term equity incentives; and
- a continuation of the long-term equity incentive program.

Currently, for Fiscal 2012, our executive compensation program includes the following components:

- base salary;
- annual short-term equity incentives; and
- a continuation of the long-term equity incentive program.

The Committee seeks to align the named executive officers' and stockholders' interests in a pay for performance environment. The Committee also reviews the compensation metrics of the CEO versus the other named executive officers. Although certain percentages and allocations may differ, the overall cash and equity compensation package of the CEO is not materially greater than the overall cash and equity compensation package of each other named executive officer. On average, a large portion of an executive officer's total compensation is at risk, with the amount actually paid tied to achievement of pre-established objectives and individual goals.

Base Salary

In General – It is the Committee's objective to set a competitive rate of annual base salary or consulting fees for each named executive officer. The Committee believes competitive base salaries are necessary to attract and retain top quality executives, since it is common practice for public companies to provide their executive officers with a guaranteed annual component of compensation that is not subject to performance risk. However, the Committee recognizes that we are still a development stage company, with little to no revenue currently and believes that developing too rigid of a compensation structure can become detrimental to our progress.

When compared to comparable positions at the competitive peer group companies, it is the Committee's objective to target the base compensation level of executive officers below the 50th percentile because of our current financial position. Historically, the compensation level for our executive officers has been below the 25th percentile of competitive peer group companies. However, in determining the compensation of each executive officer, the Committee also considers a number of other factors, including recent Senesco and individual performance, the officer's position and responsibilities and the CEO's recommendations (with respect to officers other than the CEO).

Base Salary for Fiscal 2011 – For Fiscal 2011, after review of the factors discussed above, the following named executive officers’ salaries were increased as follows:

<u>Name</u>	<u>Title</u>	<u>2011 Salary</u>	<u>2010 Salary</u>	<u>% Increase</u>
Joel P. Brooks	Chief Financial Officer, Secretary and Treasurer	\$164,800	\$160,000	3.0%
Richard Dondero	Vice-President of Research and Development	\$147,300	\$143,000	3.0%

The Committee did not change the salary of Leslie J. Browne, Ph.D., our President and Chief Executive Officer, due to the fact that Dr. Browne’s compensation was recently determined in connection with his appointment to his current positions in May 2010. Additionally, the Committee did not change the consulting fee for John E. Thompson, Ph.D., our Executive Vice President and Chief Scientific Officer, as such consulting fee will be reviewed and revised, as necessary, by the Committee in connection with the board’s review of our research and development budget for Fiscal 2011.

Base Salary for Fiscal 2012 – For Fiscal 2012, after a review of the factors discussed above, the following named executive officer’s salaries were increased as follows.

<u>Name</u>	<u>Title</u>	<u>2012 Salary</u>	<u>2011 Salary</u>	<u>% Increase</u>
Leslie J. Browne, Ph.D.	President and Chief Executive Officer	\$262,500	\$ 250,000	5.0%
John E. Thompson, Ph.D.	Executive Vice-President and Chief Scientific Officer	\$ 67,500 (1)	\$ 65,000 (1)	3.8%
Joel P. Brooks	Chief Financial Officer, Secretary and Treasurer	\$170,000	\$164,800	3.0%
Richard Dondero	Vice-President of Research and Development	\$153,200	\$147,300	4.0%

(1) Represents consulting fees paid under a consulting agreement.

Annual Bonuses for Fiscal 2011– There were no bonuses granted for Fiscal 2011.

The Committee wishes to provide additional compensation to all of the named executive officers, including the Chief Executive Officer, through the development of incentive programs based on the named executives performance and attainment of stated objectives that enhance shareholder value in order to (i) link a substantial portion of their compensation to the achievement of short-term and long-term objectives and (ii) to save cash given our limited capital resources.

Annual Bonuses for Fiscal 2012– Bonuses will be determined at the discretion of the board after the end of the fiscal year based upon the recommendation of the Committee.

Short Term Incentive Equity Awards

In General – A portion of each named executive officer’s compensation is provided in the form of short-term equity awards. It is the Committee’s belief that properly structured equity awards are an effective method of aligning the short-term interests of our named executive officers with those of our stockholders.

Short-term equity awards were made in the form of incentive stock options, also referred to herein as ISO’s, for tax purposes. The Committee has followed a grant practice of tying equity awards to its annual year-end review of individual performance, its assessment of our performance and our operational results.

Short-Term Incentive Plan for Fiscal 2011 – The Committee, in coordination with our Chief Executive Officer, established our short-term goals and objectives for Fiscal 2011, which included the following:

- Contributions relating to the development of our SNS01-T assets:
 - Submit IND for Phase I/II clinical trial;
 - Initiate Phase I/II clinical trial;
 - Plan Phase II clinical trial;
 - Develop SNS01-T development plan to NDA submission;
- Contributions relating to finance objectives:
 - Maintain sufficient capital resources;
 - Maintain NYSE Amex compliance;
 - Increase shareholder communications and enhance investor relations;
- Contributions relating to corporate development:
 - Update corporate strategy; and
 - Re-align our structure to best implement corporate strategies.

The foregoing goals and objectives were weighted as follows: 50% for contributions relating to the development of our SNS01-T assets; 25% to contributions relating to finance objectives; and 25% to contributions relating to corporate development. The option awards for each of the foregoing goals and objectives were equally allotted to the following named executive officers – Dr. Browne and Messrs. Brooks and Dondero – at one-third each.

The Committee, working with our Chief Executive Officer, identified additional individual performance goals and objectives for Fiscal 2011 for Messrs. Brooks and Dondero, which primarily included broadening their knowledge base and leadership profile within the scientific and business community of our peers, competitors, clients and customers.

In October 2010, the Committee determined to award the following options to purchase shares of our common stock, par value \$0.01, to the following named executive officers in connection with the short-term goals and objectives for Fiscal 2011:

Leslie J. Browne, Ph.D.	725,000
Joel Brooks	425,000
Richard Dondero	425,000
John E. Thompson, Ph.D.	425,000

Such options were granted on November 17, 2010, which was two days after the filing of our quarterly report on Form 10-Q for the period ended September 30, 2010, and have an exercise price of \$0.26, which is equal to the closing price of the common stock on the date of grant. Twenty-five percent (25%) of such options will vest on the first anniversary of the date of grant with the balance vesting at a rate of 1/36 for each month thereafter, unless the Committee has determined that the performance metrics have not been met.

Upon conclusion of Fiscal 2011, the Committee, working with our Chief Executive Officer, evaluated our performance and the performance of our named executive officers against the previously established goals and objectives for Fiscal 2011. Based on such review, the Committee determined that 80% of the Fiscal 2011 goals and objectives were met and 20% of such goals and objectives were not met. The performance level for Fiscal 2011 was considered in connection with the Fiscal 2012 Short-Term Incentive Plan, and the Fiscal 2012 short-term incentive equity awards allocated to each of our named executive officers (as described below) were reduced by 20% of the Fiscal 2011 short-term incentive equity awards granted to each such named executive officer to reflect the unmet goals and objectives for Fiscal 2011.

Short-Term Incentive Plan for Fiscal 2012 – The Committee, in coordination with our Chief Executive Officer, established our short-term goals and objectives for Fiscal 2012, which include the following:

- Contributions relating to the development of our SNS01-T assets:
 - Demonstrate the pre-clinical effects of SNS01-T in combination with certain approved therapeutic products;
 - Develop an improved SNS01-T formulation;
 - Complete treatment under the Phase 1b/2a clinical study for SNS01-T in multiple myeloma; and
 - Plan a clinical study for SNS01-T in B cell cancers in addition to multiple myeloma;
- Contributions relating to finance objectives:
 - Maintain sufficient working capital and plan and execute financing activities; and
 - Regain and maintain NYSE Amex compliance;
- Contributions relating to corporate development:
 - Expand product portfolio; and
 - Investigate partnering opportunities.

The foregoing goals and objectives were weighted as follows: 50% for contributions relating to the development of our SNS01-T assets; 25% to contributions relating to finance objectives; and 25% to contributions relating to corporate development. The option awards for each of the foregoing goals and objectives were allotted to the following named executive officers as follows – Dr. Browne: 35%, Mr. Brooks: 20%, Mr. Dondero: 20%, and Dr. Thompson: 20%. Five percent of the option awards allotted for completion of Fiscal 2012 goals and objectives would be allocated at the Committee’s discretion for outstanding performance to assist Senesco in reaching such goals.

The Committee, working with our Chief Executive Officer, identified additional individual performance goals and objectives for Fiscal 2012 for Messrs. Brooks and Dondero. Mr. Brooks’s goals and objectives primarily include raising capital through financings, regaining and maintaining NYSE Amex compliance and increasing Senesco’s trading volume. Mr. Dondero’s goals and objectives primarily include management of Senesco’s clinical trials, initiation of new clinical trials for our SNS01-T assets and expanding our product portfolio. Dr. Thompson’s goals primarily include demonstrating the pre-clinical effects of SNS01-T in combination with certain approved therapeutic products and developing an improved SNS01-T formulation.

In September 2011, the Committee determined to award the following options to purchase shares of our common stock, par value \$0.01, to the following named executive officers in connection with the short-term goals and objectives for Fiscal 2012:

Leslie J. Browne, Ph.D.	819,000
Joel Brooks	468,000
Richard Dondero	468,000
John E. Thompson, Ph.D.	468,000

Such options were granted on September 30, 2011, which was two days after the filing of our annual report on Form 10-K for the year ended June 30, 2011, and have an exercise price of \$0.23, which is equal to the closing price of the common stock on the date of grant. Twenty-five percent (25%) of such options will vest on the first anniversary of the date of grant with the balance vesting at a rate of 1/36 for each month thereafter, unless the Committee has determined that the performance metrics have not been met.

Long-Term Incentive Equity Awards

In General – A portion of each named executive officer’s compensation is provided in the form of long-term incentive equity awards as set forth in the Long-Term Incentive Plan (the “LTIP”) discussed below. It is the Committee’s belief that properly structured equity awards are an effective method of aligning the long term interests of our named executive officers with those of our stockholders.

Beginning with the LTIP for Fiscal 2008, equity awards have been made in the form of restricted stock units, also referred to herein as RSU’s; however, each executive officer could elect to receive an equity award in the form of stock options. Beginning with Fiscal 2010, equity awards have been made in the form of stock options. Under the LTIP, equity awards are based upon the completion of certain event milestones (“LTIP Event Milestones”) to be achieved over a period of 3 years as discussed below. Accordingly, any equity awards to the named

executive officers under the LTIP were made promptly after the completion of each LTIP Event Milestone based on the level of achievement of the milestones. The Committee has established LTIP grant guidelines for eligible named executive officers based on competitive annual grant data provided by management's compensation consultant and by J. Richard, the Committee's compensation consultant.

Long-Term Incentive Plan – For the Fiscal 2008 LTIP period beginning on December 13, 2007 (the “LTIP Effective Date”) and ending on the earlier of (i) the completion of the Third LTIP Event Milestone or (ii) three (3) years from the LTIP Effective Date, LTIP equity grants were to be made to our named executive officers in the form of RSU's and ISO's, based on achievement of the LTIP Event Milestones. Each RSU entitled the recipient to receive one share of our common stock upon vesting or upon a designated date or event following such vesting. Each named executive had the option of receiving their RSU grant in the form of RSU's or ISO's. If a named executive chose to receive ISO's in lieu of RSU's, then such named executive was granted twice as many ISO's, due to the exercise price of such ISO's.

The total RSU's and ISOs in the LTIP pool awarded to our named executive officers was 775,000 shares, which consisted of 225,000 RSU's and 550,000 ISO's, representing 3.9% of the outstanding shares as of July 1, 2009.

The LTIP Event Milestones to be achieved, the weighting allocated to each milestone, amount and percentage of the RSU's and ISOs to be awarded, as adjusted for forfeitures to all the named executive officers as a whole for the completion of each of the three LTIP Event Milestones were as follows:

<u>LTIP Event Milestone</u>	<u>Percentage of LTIP RSU and ISO Award Pool</u>	<u>Total Amount of RSUs and ISO's Awarded As a Whole to All Named Executive Officers</u>
<u>First LTIP Event Milestone.</u> The Execution of a Research Agreement to Conduct Phase I/II Trials at a Research Facility	20%	120,000
<u>Second LTIP Event Milestone.</u> The Filing and Acceptance by the U.S. FDA of an investigation new drug application, or IND, by the date set by the Committee	20%	120,000
<u>Third LTIP Event Milestone.</u> The Successful Completion of Phase I/II Trials Approved by the FDA by the date set by the Committee	60%	360,000

The LTIP awards for each named executive officer upon the completion of each individual LTIP Event Milestone were to be as follows:

Name	Title	Percentage of Total RSU's Awarded Upon Completion of a LTIP Event Milestone	Number of RSU's Awarded upon Completion of First LTIP Event Milestone	Number of RSU's Awarded upon Completion of Second LTIP Event Milestone	Number of RSU's Awarded upon Completion of Third LTIP Event Milestone
Joel P. Brooks (1)	Chief Financial Officer, Treasurer and Secretary	10%	10,000	10,000	30,000
John E. Thompson (2)	Executive Vice-President and Chief Scientific Officer	25%	50,000	50,000	150,000
Richard Dondero (2)	Vice-President of Research and Development	30%	60,000	60,000	180,000
Bruce C. Galton(1) (3)	Former President and Chief Executive Officer	25%	25,000	25,000	75,000
Sascha P. Fedyszyn(1)(4)	Former Vice-President of Corporate Development and Secretary	10%	10,000	10,000	30,000

(1) Represents RSU's.

(2) Represents ISO's.

(3) Mr. Galton resigned from Senesco on November 16, 2009 and, thus his awards set forth above, which were unvested at the time of his resignation, were forfeited.

(4) Mr. Fedyszyn resigned from Senesco on February 1, 2010 and, thus his awards set forth above, which were unvested at the time of his resignation, were forfeited.

The Committee reviewed the LTIP Event Milestones and determined that the First LTIP Event Milestone had been met and the RSU's and ISOs related to such event were granted to Messrs. Brooks and Dondero and Dr. Thompson on November 17, 2010, which was two trading days after the filing of our quarterly report on Form 10-Q for the period ended September 30, 2010. Each such option grant had an exercise price of \$0.99 per share, the closing selling price of our stock on the grant date. The Committee also determined that none of the remaining LTIP Event Milestones have been met and the RSU's and Options related to such events expired on December 13, 2010.

Market Timing of Equity Awards

The Compensation Committee does not engage in any market timing of the equity awards made to the executive officers or other award recipients, and accordingly, there is no established practice of timing our awards in advance of the release of favorable financial results or adjusting the award date in connection with the release of unfavorable financial developments affecting our business. In general, we will attempt, when possible, to make equity awards to our executive officers and directors promptly after the release of our financial results. For example, the September 2011 awards were granted on September 30, 2011, which was two trading days after the filing of our annual report on Form 10-K for the year ended June 30, 2011.

Clawback Policy

We are reviewing our current “clawback” policy which provides for recoupment of incentive compensation in certain circumstances in connection with the enactment of recent regulations in that regard and are awaiting final SEC rules and regulations in order to revise our “clawback” policy in compliance with such rules and regulations.

Analysis of Risk Associated with our Compensation Plans

In making decisions regarding compensation program design and pay levels, our Compensation Committee and senior management, working with our Audit Committee, consider many factors, including any potential risks to Senesco and our stockholders. Although a significant portion of our executives’ compensation is performance-based and “at-risk,” we believe our compensation plans are appropriately structured and are not reasonably likely to have a material adverse effect on us.

Executive Benefits and Perquisites

In General – The named executive officers are also provided with certain market competitive benefits. They are currently not provided with any perquisites. It is the Committee’s belief that such benefits are necessary for us to remain competitive and to attract and retain top caliber executive officers, since such benefits are typically provided by companies in the biotechnology industry and with other companies with which we compete for executive talent.

Retirement Benefits – The named executive officers may participate in the company-wide 401(k) plan. We do not make any contributions to the 401(k) plan and do not have any additional retirement benefits.

Other Benefits and Perquisites – All administrative employees, including the named executive officers, are eligible to receive standard health, disability, and life insurance. We do not provide any additional benefits and perquisites.

Executive Compensation Agreements

We had previously entered into employment agreements with our executive officers. During Fiscal 2009, the Committee determined that we could in no manner financially support the terms of the various employment agreements in effect. The Committee issued a notice of non-renewal to all named executive officers in effect not renewing the employment agreements moving forward following the various upcoming anniversary dates of each agreement. As such, Mr. Brooks's employment agreement expired on June 30, 2010, and Mr. Dondero's employment agreement expired on July 19, 2010. Each of the named executive officers have, following the expiration of their employment agreements, continued as employees on an "at will basis", meaning that either we or the employees may discontinue their employment with or without notice or cause. The employees' respective salaries, duties and titles may be adjusted as determined by the Committee. In May 2010, we entered into an employment agreement with Dr. Browne in connection with his appointment as our chief executive officer. Such agreement was entered into with Dr. Browne as part of an inducement to join Senesco and become our President and CEO in May 2010. The terms of the agreement with Dr. Browne provided for six months of severance at his base salary in effect at such time, in the event that Dr. Browne was terminated without cause within the first year of his employment, which would have amounted to \$125,000. He would also have been provided with a continuation of his medical benefits for a period of six months from the date of his termination. Such agreement has expired.

IRC Section 162(m) compliance

As a result of Section 162(m) of the Internal Revenue Code, publicly-traded companies such as us are not allowed a federal income tax deduction for compensation, paid to the Chief Executive Officer and the three other highest paid executive officers, to the extent that such compensation exceeds \$1 million per officer in any one year and does not otherwise qualify as performance-based compensation. Currently, our stock option compensation packages are structured so that compensation deemed paid to an executive officer in connection with the exercise of a stock option should qualify as performance-based compensation that is not subject to the \$1 million limitation. However, other awards, like RSU's, made under our stock incentive plans may or may not so qualify. In establishing the cash and equity incentive compensation programs for the executive officers, it is the Committee's view that the potential deductibility of the compensation payable under those programs should be only one of a number of relevant factors taken into consideration, and not the sole governing factor. For that reason the Committee may deem it appropriate to continue to provide one or more executive officers with the opportunity to earn incentive compensation, including cash bonus programs tied to our financial performance and RSU awards, which may be in excess of the amount deductible by reason of Section 162(m) or other provisions of the Internal Revenue Code. It is the Committee's belief that cash and equity incentive compensation must be maintained at the requisite level to attract and retain the executive officers essential to our financial success, even if part of that compensation may not be deductible by reason of the Section 162(m) limitation. For Fiscal 2011, none of our executive officer's compensation reached the \$1 million limitation. The Committee will continue to evaluate such \$1 million limitation in Fiscal 2012.

Report of the Compensation Committee

The Compensation Committee has reviewed and discussed the Compensation, Discussion and Analysis with management, and based on this review and these discussions, the Compensation Committee recommended to the board that the Compensation, Discussion and Analysis be included in Senesco's Annual Report on Form 10-K/A.

This report is submitted on behalf of the
Compensation Committee

David Rector, Chairman

John N. Braca

Other Compensation

Summary Compensation Table

The following table sets forth information concerning compensation for services rendered in all capacities during the fiscal years ended June 30, 2011, June 30, 2010 and June 30, 2009 awarded to, earned by or paid to: (i) our Chief Executive Officer; (ii) our Chief Financial Officer; and (iii) each of our two other executive officers whose total compensation for Fiscal 2011 was in excess of \$100,000, collectively referred to herein as the named executive officers. No other executive officers who would have otherwise been includable in such table on the basis of total compensation for Fiscal 2011 have been excluded by reason of their termination of employment or change in executive status during that year.

Name and Principal Position (a)	Year (1) (b)	Salary (\$)(2) (c)	Bonus (\$)(3) (d)	Stock Awards (\$)(4) (e)	Option Awards (\$)(5) (f)	Non-Equity Incentive Plan Compensation (\$)(g)	Change in Pension Value and Nonqualified Deferred Compensation Earnings (\$)(h)	All Other Compensation (\$)(i)	Total (\$)(j)
Leslie J. Browne, Ph.D. (6) (President and Chief Executive Officer)	2011	\$ 250,468	-	-	\$154,425	-	-	-	\$ 404,893
	2010	\$ 27,885	-	-	\$ 440,000	-	-	-	\$467,885
	2009	-	-	-	-	-	-	-	-
Joel Brooks (Chief Financial Officer, Secretary and Treasurer)	2011	\$ 165,976	-	\$ 2,600	\$ 90,525	-	-	-	\$ 259,101
	2010	\$ 163,306	\$15,000	-	\$ 66,000	-	-	-	\$ 244,306
	2009	\$ 161,986	-	\$ 16,800	-	-	-	-	\$ 178,786
Richard Dondero (Vice-President of Research)	2011	\$ 148,827	-	-	\$ 90,525	-	-	-	\$ 239,352
	2010	\$ 146,677	\$15,000	-	\$ 66,000	-	-	-	\$ 227,677
	2009	\$ 145,507	-	-	\$ 34,960	-	-	-	\$ 180,467
John E. Thompson Ph.D. (Executive Vice-President and Chief Scientific Officer)	2011	\$ 65,000	-	-	\$ 90,525	-	-	-	\$ 155,525
	2010	\$ 65,000	-	-	-	-	-	-	\$ 65,000
	2009	\$ 65,000	-	-	\$ 22,080	-	-	-	\$ 87,080

(1) Senesco's fiscal year ends on June 30.

(2) Such amount represents actual salary paid, including such amounts deferred in connection with our 401K plan.

(3) The bonus earned for the fiscal year ended June 30, 2010 was declared and paid in October 2010. There were no bonuses earned or paid during the fiscal years ended June 30, 2011 and 2009.

(4) The amounts shown are the grant date fair value of RSU's awarded to each named executive officer in each year. The fair values of the RSU's awarded were calculated based on the fair market value of the underlying shares of common stock on the respective grant dates in accordance with FASB ASC Topic 718 and were not adjusted to take into account any estimated forfeitures. In accordance with the recently adopted SEC rules, the amounts previously reported in the "Stock Awards" column for 2009 have been revised to reflect the grant date fair values of the awards granted in such year, as determined in accordance with FASB ASC Topic 718, excluding the effect of forfeitures.

(5) The amounts shown are the grant date fair value of stock options granted to each named executive officer, in accordance with FASB ASC Topic 718 pursuant to the Black Scholes pricing model. For a discussion of valuation assumptions used in the calculations, see Notes 2 and 11 of Notes to Consolidated Financial Statements included in Part II, Item 8 of our 2011 Form 10-K. The grant date fair values used to calculate such compensation costs were not adjusted to take into account any estimated forfeitures. In accordance with the recently adopted SEC rules, the amounts previously reported in the "Option Awards" column for 2009 have been revised to reflect the grant date fair

values of the awards granted in such years, as determined in accordance with FASB ASC Topic 718, excluding the effect of forfeitures.

(6) Dr. Browne was appointed President and Chief Executive Officer on May 25, 2010.

Grants of Plan-Based Awards

The following Grants of Plan Based Awards table provides additional information about stock and option awards and equity incentive plan awards granted to our named executive officers during the fiscal year ended June 30, 2011.

Name	Grant Date	Estimated Future Payouts Under Non-Equity Incentive Plan Awards			Estimated Future Payouts Under Equity Incentive Plan Awards			All Other Stock Awards: Number of Shares of Stock or Units (#)	All Other Option Awards: Number of Securities Underlying Options (#)	Exercise or Base Price of Option Awards (\$/Sh)	Grant Date Fair Value of Equity Awards \$(1)
		Threshold (\$)	Target (\$)	Maximum (\$)	Threshold (#)	Target (#)	Maximum (#)				
(a)	(b)	(c)	(d)	(e)	(f)	(g)	(h)	(i)	(j)	(k)	
Leslie J. Browne, Ph.D.	11/17/2010	-	-	-	-	-	-	-	725,000	\$0.26	\$154,425
John E. Thompson, Ph.D.	11/17/2010	-	-	-	-	-	-	-	425,000	\$0.26	\$ 90,525
Joel P. Brooks	11/17/2010	-	-	-	-	-	-	-	425,000	\$0.26	\$ 90,525
Richard Dondero	11/17/2010	-	-	-	-	-	-	-	425,000	\$0.26	\$ 90,525

(1) The amounts shown are the grant date fair value of stock options granted to each named executive officer, in accordance with FASB ASC Topic 718 pursuant to the Black Scholes pricing model. For a discussion of valuation assumptions used in the calculations, see Notes 2 and 11 of Notes to Consolidated Financial Statements included in Part II, Item 8 of our 2011 Form 10-K. The grant date fair values used to calculate such compensation costs were not adjusted to take into account any estimated forfeitures.

Outstanding Equity Awards at Fiscal Year-End

The following table summarizes the equity awards we have made to our named executive officers which are outstanding as of June 30, 2011.

Name (a)	Option Awards					Stock Awards			
	Number of Securities Underlying Unexercised Options (#) Exercisable (b)	Number of Securities Underlying Unexercised Options (#) Unexercisable (c)	Equity Incentive Plan Awards: Number of Securities Underlying Unexercised Unearned Options (#) (d)	Option Exercise Price (\$) (e)	Option Expiration Date (f)	Number of Shares or Units of Stock That Have Not Vested (#) (g)	Market Value of Shares or Units of Stock That Have Not Vested (\$) (h)	Equity Incentive Plan Awards: Number of Unearned Shares, Units or Other Rights That Have Not Vested (#) (i)	Equity Incentive Plan Awards: Market or Payout Value of Unearned Shares, Units or Other Rights That Have Not Vested (\$) (j)
Leslie J. Browne, Ph.D.	-	-	725,000 (1)	\$0.26	11/17/2020	-	-	-	-

	50,000 (5)	-	-	\$0.99	12/13/2017	-	-	-	-
	48,000 (5)	-	-	\$0.60	11/19/2018	-	-	-	-

- (1) One-quarter of such options will vest on the first anniversary of the date of grant with one-thirty-sixth of the balance vesting each month thereafter.
- (2) One-quarter of such options vested on the first anniversary of the date of grant with one-thirty-sixth of the balance vesting each month thereafter.
- (3) 60,000 of such options vested on the date of grant and an additional 60,000 of such options vested on each of June 30, 2010 and June 30, 2011. An additional 60,000 of such options will vest on each of June 30, 2012 and June 30, 2013.
- (4) One-third of such options vested on the date of grant and an additional one-third of such options vested on each of the first and second anniversary of the date of grant.
- (5) Such amounts consist of performance based options which vested upon the achievement of certain milestones under our long-term incentive plan.

Options Exercised and Stock Vested

The table below shows option exercise and stock award vesting activity for our named executive officers during the year ended June 30, 2011.

Name	Option Awards		Stock Awards	
	Number of Shares	Value Realized on Exercise	Number of Shares	Value Realized on Vesting
(a)	(b)	(c)	(d)	(e)
Leslie J. Browne, Ph.D.	--	--	270,833	\$ 73,125
Joel P. Brooks	--	--	60,000	\$ 16,800
Richard Dondero	--	--	60,000	\$ 16,800
John E. Thompson, Ph.D.	--	--	--	--

(1) Such amounts in this column were calculated by multiplying the number in column (d) by the closing price on the date of vesting.

Employment Contracts, Termination of Employment, and Change-in-Control Arrangements

None of our named executive officers have a current employment agreement or any termination or change of control arrangements with us.

Executive Severance. None of our named executive officer's have employment agreements or any agreements which contain severance provisions.

Compensation of Directors

We use a combination of cash and equity-based compensation to attract and retain qualified individuals to serve on our board. Dr. Thompson has received compensation for providing research and development management services to us and does not receive any additional compensation for his services as a board member. See “Certain Relationships and Related Transactions” which sets forth the details of the compensation for Dr. Thompson.

Equity Grants Fiscal 2011:

We do not automatically grant options or other equity to our board. Our Compensation Committee reviews the equity program each year with its compensation consultant and determines the appropriate level of the equity awards.

Effective September 30, 2011, the Committee granted the following options to the non-employee directors for their service during Fiscal 2011:

Director	Total # of Options Granted
Harlan W. Waksal, M.D.....	305,000 (1)
Rudolf Stalder	155,000 (1)
Rudolf Stalder	300,000 (2)
Christopher Forbes	190,000 (1)
Thomas C. Quick	155,000 (1)
John N. Braca	230,000 (1)
David Rector	230,000 (1)
Jack Van Hulst	155,000 (1)
Warren J. Isabelle.....	155,000 (1)

(1) Such grants vest as follows: one-half (1/2) upon the date of grant and the remaining one-half (1/2) will vest one (1) year from the date of grant, subject to continued board service through the vesting date.

(2) Additionally, effective September 30, 2011, the Committee granted an additional 300,000 options to Rudolf Stalder for his commitment, leadership and individual performance during Fiscal 2011. Twenty-five percent (25%) of such options shall vest on the first anniversary of the date of grant and one-thirty-six of such grant each month thereafter, subject to continued board service through the vesting date.

Cash Compensation

Commencing in Fiscal 2009, after review and consultation with the Compensation Committee's compensation consultant, we implemented a new cash compensation plan for our directors pursuant to which we pay each non-employee director cash compensation as consideration for their service on our board for each fiscal year as follows:

Annual (Base) Retainer	\$	10,000
Per Scheduled Board Meeting Fee	\$	1,500 ⁽¹⁾
Per Committee Meeting Fee.....	\$	750 ⁽²⁾
Additional Annual Retainer:		
Chairman of the Board	\$	5,000
Audit Committee Chair	\$	3,500
Compensation Committee Chair	\$	3,500
Nominating and Corporate Governance Committee Chair.....	\$	1,500
Non-Chair Committee Member Additional Retainer (All Committees).....	\$	1,000
Maximum Per Diem For All Meetings.....	\$	2,000

(1) \$750 for telephonic meetings (less than 30 minutes: \$375).

(2) \$375 for telephonic meetings.

Such cash compensation is paid in quarterly increments. A director may elect, provided such election is made at the beginning of the Company's fiscal year, to receive, in lieu of such cash payments, either (i) restricted stock units, or RSU's, covering that number of shares having a fair market value on the grant date equal to such cash award or (ii) options in an amount equal to twice the number of RSU's that would have been received. Such election to receive (y) cash or (z) equity in the form of RSU's or options applies for the entire year. The directors have all elected to receive options in lieu of cash for Fiscal 2011 and Fiscal 2012, except for Messrs. Braca and Rector, who have elected to receive their retainer fees in cash and their meeting fees in options, and Mr. Isabelle, who has elected to receive his fees in cash. The RSU's or options for each quarter are granted effective two (2) days following the filing of our quarterly reports on Form 10-Q for that quarter and are fully vested as of the grant date. The exercise price of the options will be the closing price on the grant date.

We provide reimbursement to directors for reasonable and necessary expenses incurred in connection with attendance at meetings of the board of directors and other Senesco business.

Director Compensation

The table below shows the compensation paid or awarded to our non-employee directors (other than Dr. Thompson) during the fiscal year ended June 30, 2011.

Name (a)	Fees Earned or Paid in Cash (\$) (b)	Stock Awards (\$) (c)	Option Awards (1) (\$) (d)	Non-Equity Incentive Plan Compensation (\$) (e)	Change in Pension Value and Nonqualified Deferred Compensation Earnings (\$) (f)	All Other Compensation (\$) (g)	Total (\$) (h)
Rudolf Stalder.....	--	--	\$ 52,366	--	--	--	\$ 52,366
Christopher Forbes	--	--	\$ 53,125	--	--	--	\$ 53,125
Thomas C. Quick..	--	--	\$ 47,536	--	--	--	\$ 47,536
John N. Braca	\$14,500	--	\$ 50,530	--	--	--	\$ 65,030
David Rector	\$14,500	--	\$ 49,353	--	--	--	\$ 63,853
Jack Van Hulst.....	--	--	\$ 63,009	--	--	--	\$ 63,009
Harlan W. Waksal, M.D....	--	--	\$ 188,097	--	--	--	\$ 188,097
Warren J. Isabelle.	\$17,125	--	\$ 20,400	--	--	--	\$ 37,525

- (1) Represents the aggregate grant date fair value for stock options granted in Fiscal 2011 as described below calculated in accordance with the FASB ASC Topic 718 and were not adjusted to take into account any estimated forfeitures. For information regarding assumptions underlying the FASB ASC Topic 718 valuation of equity awards, see Notes 2 and 11 of the Notes to the Consolidated Financial Statements in our Annual Report on Form 10-K for the fiscal year ended June 30, 2011. Does not include the aggregate grant date fair value for stock options granted on September 30, 2011.

As described above, our non-employee directors (other than Mr. Isabelle and Messrs. Braca and Rector (only with respect to their retainer fees)) have elected to receive option grants in lieu of their cash compensation. Accordingly, on November 17, 2010, February 14, 2011, and May 17, 2011, each of these non-employee directors received options to purchase shares of our common stock pursuant to the provisions of the 2008 Stock Plan. Additionally, on November 17, 2010, the non-employee directors were granted additional options for their service during Fiscal 2010. The options have an exercise price of \$0.26 per share, \$0.29 per share and \$0.27 per share, respectively, the fair market value of the common stock on the grant dates (except for the grants to Christopher Forbes, which have exercise prices of \$0.29 per share, \$0.32 per share and \$0.30 per share, respectively (110% of the fair market value of the common stock on the grant date)).

The following table sets forth information relating to options granted to the directors during Fiscal 2011.

Director	Option Grant Date	Exercise Price	# of Shares	Grant Date Fair Value
Rudolf Stalder	5/17/2011	\$0.27	48,148	\$ 10,207
	2/14/2011	\$0.29	31,896	\$ 7,113
	11/17/2010	\$0.26	171,792	\$ 35,046
Christopher Forbes	5/17/2011	\$0.30	37,962	\$ 7,668
	2/14/2011	\$0.32	32,758	\$ 7,207
	11/17/2010	\$0.29	192,308	\$ 38,250
Thomas C. Quick.....	5/17/2011	\$0.27	28,704	\$ 6,085
	2/14/2011	\$0.29	29,310	\$ 6,536
	11/17/2010	\$0.26	171,154	\$ 34,915
John N. Braca.....	5/17/2011	\$0.27	27,778	\$ 5,889
	2/14/2011	\$0.29	18,104	\$ 4,037
	11/17/2010	\$0.26	199,038	\$ 40,604
David Rector	5/17/2011	\$0.27	27,778	\$ 5,889
	2/14/2011	\$0.29	18,104	\$ 4,037
	11/17/2010	\$0.26	193,269	\$ 39,427
Jack Van Hulst	5/17/2011	\$0.27	32,408	\$ 6,870
	2/14/2011	\$0.29	32,758	\$ 7,305
	11/17/2010	\$0.26	237,177	\$ 48,834
Harlan W. Waksal, M.D.	5/17/2011	\$0.27	51,852	\$ 10,993
	2/14/2011	\$0.29	45,690	\$ 10,189
	11/17/2010	\$0.26	796,154	\$166,915
Warren J. Isabelle*	11/17/2010	\$0.26	100,000	\$ 20,400

(*) Represents additional options granted for service during Fiscal 2010, not for cash compensation for Fiscal 2011.

The following table shows the total number of shares of our common stock subject to option awards (vested and unvested) held by each non-employee director as of June 30, 2011:

Director	Total # of Options Outstanding
Rudolf Stalder	1,161,787
Christopher Forbes	741,239
Thomas C. Quick.....	600,373
John N. Braca.....	714,489
David Rector	691,797
Jack Van Hulst	680,375
Harlan W. Waksal, M.D.	1,157,654
Warren J. Isabelle.....	125,000

Compensation Committee Interlocks and Insider Participation

No member of the Compensation Committee is or has been an officer or employee of our company or any of our subsidiaries. In addition, no member of the Compensation Committee had any relationships with us or any other entity that requires disclosure under the regulations promulgated by the SEC and none of our executive officers served on the Compensation Committee or board of any company that employed any member of our board.

Item 12. Security Ownership of Certain Beneficial Owners and Management and Related Stockholder Matters.

The following table sets forth, as of October 15, 2011, the beneficial ownership of the common stock by (i) each person known by us to be the beneficial owner of more than 5% of the total number of shares of our common stock outstanding as of such date; (ii) each of our directors, and our named executive officers; and (iii) all of our directors and our current executive officers as a group.

<u>Name and Address of Beneficial Owner</u> ⁽¹⁾	<u>Amount and Nature of Beneficial Ownership</u> ⁽²⁾	<u>Percent of Class</u> ⁽³⁾
(i) Certain Beneficial Owners:		
Partlet Holdings Ltd. International House, 1 st Floor 41, The Parade St. Helier, JERSEY, Channel Islands	7,961,309 ⁽⁴⁾	9.6%
Defiance Fund, Ltd. 488 Madison Avenue 12 th Floor New York, NY 10022.....	5,368,195 ⁽⁵⁾	6.5%
(ii) Directors (which includes all nominees), Named Executive Officers and Chief Executive Officer:		
Harlan W. Waksal, M.D.	3,794,696 ⁽⁶⁾	4.5%
John N. Braca	1,038,012 ⁽⁷⁾	1.3%
Jack Van Hulst.....	788,357 ⁽⁸⁾	1.0%

Richard Dondero.....	563,028 ⁽¹⁶⁾	*
Leslie J. Browne, Ph.D.	580,354 ⁽¹⁷⁾	*
(iii) All Directors and current executive officers as a group (12 persons)	34,344,565 ⁽¹⁸⁾	33.3%

* Less than 1%

(1) Unless otherwise provided, all addresses should be care of Senesco Technologies, Inc., 721 Route 202/206, Suite 130, Bridgewater, New Jersey 08807.

(2) Except as otherwise indicated, all shares of common stock are beneficially owned and sole investment and voting power is held by the persons named.

- (3) Applicable percentage of ownership is based on 80,777,097 shares of our common stock outstanding as of October 15, 2011, plus any common stock equivalents and options or warrants held by such holder which are presently or will become exercisable within sixty (60) days after October 15, 2011.
- (4) Includes 3,618,056 shares of common stock issuable pursuant to presently exercisable warrants.
- (5) Includes 1,562,500 shares of common stock issuable pursuant to presently exercisable warrants. Per Form 13G filed on May 20, 2011.
- (6) Includes 2,112,904 shares of common stock issuable pursuant to presently exercisable warrants and options or options which will become exercisable within sixty (60) days after October 15, 2011. Also includes 740,740 shares of common stock issuable pursuant to the conversion of convertible preferred stock at a conversion rate of \$0.27. Excludes 517,083 shares of common stock issuable pursuant to options which become exercisable after sixty (60) days from October 15, 2011.
- (7) Includes 900,048 shares of common stock issuable pursuant to presently exercisable warrants and options or options which will become exercisable within sixty (60) days after October 15, 2011. Excludes 115,000 shares of common stock issuable pursuant to options which become exercisable after sixty (60) days from October 15, 2011.
- (8) Includes 748,289 shares of common stock issuable pursuant to presently exercisable warrants and options or options which will become exercisable within sixty (60) days after October 15, 2011. Excludes 113,958 shares of common stock issuable pursuant to options which become exercisable after sixty (60) days from October 15, 2011.
- (9) Includes 7,927,716 shares of common stock issuable pursuant to presently exercisable warrants and options or options which will become exercisable within sixty (60) days after October 15, 2011. Also includes 3,703,704 shares of common stock issuable pursuant to the conversion of convertible preferred stock at a conversion rate of \$0.27. Excludes 95,000 shares of common stock issuable pursuant to options which become exercisable after sixty (60) days from October 15, 2011.
- (10) Includes 270,059 shares of common stock issuable pursuant to presently exercisable warrants and options or options which will become exercisable within sixty (60) days after October 15, 2011. Excludes 77,500 shares of common stock issuable pursuant to options which become exercisable after sixty (60) days from October 15, 2011.
- (11) Represents 675,173 shares of common stock and 403,428 shares of common stock issuable pursuant to warrants issued to Thomas C. Quick Charitable Foundation, of which Mr. Quick is the sole trustee. Represents 139,734 shares of common stock and 677,873 shares of common stock issuable pursuant to presently exercisable options or options which will become exercisable within sixty (60) days after October 15, 2011 issued to Thomas C. Quick. Excludes 77,500 shares of common stock issuable pursuant to options issued to Thomas C. Quick which become exercisable after sixty (60) days from October 15, 2011.
- (12) Includes 944,662 shares of common stock issuable pursuant to presently exercisable warrants and options or options which will become exercisable within sixty (60) days after October 15, 2011. Excludes 115,000 shares of common stock issuable pursuant to options which become exercisable after sixty (60) days from October 15, 2011.
- (13) Includes 1,828,349 shares of common stock issuable pursuant to presently exercisable warrants and options or options which will become exercisable within sixty (60) days after October 15, 2011. Excludes 377,500 shares of common stock issuable pursuant to options which become exercisable after sixty (60) days from October 15, 2011.
- (14) Represents 572,000 shares of common stock held by 2091794 Ontario Ltd., of which Dr. Thompson is the sole owner, and 485,780 shares of common stock issuable pursuant to presently exercisable options or options which will become exercisable within sixty (60) days after October 15, 2011 issued to John E. Thompson, Ph.D. Excludes 777,896 shares of common stock issuable pursuant to options which will become exercisable after sixty (60) days from October 15, 2011.
- (15) Includes 427,604 shares of common stock issuable pursuant to presently exercisable options or options which will become exercisable within sixty (60) days after October 15, 2011. Excludes 897,896 shares

of common stock issuable pursuant to options which will become exercisable after sixty (60) days from October 15, 2011.

- (16) Includes 563,028 shares of common stock issuable pursuant to presently exercisable options or options which will become exercisable within sixty (60) days after October 15, 2011. Excludes 897,896 shares of common stock issuable pursuant to options which will become exercisable after sixty (60) days from October 15, 2011.
- (17) Includes 571,354 shares of common stock issuable pursuant to presently exercisable options or options which will become exercisable within sixty (60) days after October 15, 2011. Excludes 1,972,646 shares of common stock issuable pursuant to options which will become exercisable after sixty (60) days from October 15, 2011.
- (18) See Notes 6 through 17.

Equity Compensation Plans

The following table reflects information relating to equity compensation plans as of June 30, 2011.

	Number of securities to be issued upon exercise of outstanding options, warrants and rights	Weighted-average exercise price of outstanding options, warrants and rights	Number of securities remaining available for future issuance under equity compensation plans
Stock Option plans approved by security holders	11,348,314 ⁽¹⁾	\$0.78	14,643,289 ⁽²⁾
Equity compensation plans not approved by security holders	--	--	--
Total.....	11,348,314 ⁽¹⁾	\$0.78	14,643,289 ⁽²⁾

(1) Issued pursuant to our 1998 Stock Plan and 2008 Stock Plan.

(2) Available for future issuance pursuant to our 2008 Stock Plan.

Item 13. Certain Relationships and Related Transactions, and Director Independence.

Contractual Relationships

Service Agreements

Christopher Forbes, our director, is Vice Chairman of Forbes Media LLC, Vice Chairman of Forbes Family Holdings, Inc. and Vice President of Forbes Management Co., Inc. Mr. Forbes was also Vice Chairman of Forbes Inc. Forbes, Inc. and Forbes Management Company, Inc. have provided and will continue to provide us with introductions to strategic alliance partners and, from time to time, use of its office space. In recognition of these services, during Fiscal 2010, we granted to Forbes, Inc. a warrant to purchase shares of our common stock, and during Fiscal 2011, we granted to Forbes Management Company, Inc. an option to purchase shares of our common stock. The awards to the Forbes entities are described in the table below.

<u>Date of Grant</u>	<u># of Warrant / Option Shares</u>	<u>Exercise Price</u>	<u>Value of Services on Date of Grant</u>	<u># of Warrant Shares Vested</u>
November 17, 2010	5,000	\$0.26	\$1,300	1,667
September 30, 2011	10,000	\$0.23	\$1,780	3,333

The exercise price of the warrant granted to Forbes, Inc. and option granted to Forbes Management Company, Inc. represented the fair market value of our common stock on the respective dates of grant.

Research and Development Agreements

Effective September 1, 1998, we entered into a three-year research and development agreement, which has been extended for successive periods through August 31, 2012, with John E. Thompson, Ph.D. and the University of Waterloo in Waterloo, Ontario, Canada, referred to as the University. Dr. Thompson is our director and officer and beneficially owns approximately 1.3% of our common stock. Dr. Thompson is the Associate Vice President, Research and former Dean of Science of the University. Dr. Thompson and the University will provide research and development under our direction. Research and development expenses under this agreement for the years ended June 30, 2011 and 2010 aggregated US \$622,872 and US \$672,693, respectively. Effective September 1, 2011, we, Dr. Thompson and the University extended the agreement for an additional one-year period through August 31, 2012 in the amount of CAN \$555,900. As of October 15, 2011, such amount represented approximately US \$577,000.

Consulting Agreement

Effective May 1, 1999, we entered into a three-year consulting agreement, which has been extended for successive periods through June 30, 2013, for research and development with Dr. Thompson. This agreement provided for monthly payments of \$3,000 through June 2004. However, effective January 1, 2003, 2006, 2007 and 2011, the agreement was amended to increase the monthly payments from \$3,000 to \$5,000, from \$5,000 to \$5,200, from \$5,200 to \$5,417, and from \$5,417 to \$5,625, respectively.

Review and Approval of Related Person Transactions

Our Audit Committee Charter requires that our Audit Committee review and approve or ratify transactions involving us and any executive officer, director, director nominee, 5%

stockholder and certain of their immediate family members, also referred to herein as a related person. The policy and procedures cover any transaction involving a related person, also referred to herein as a related person transaction, in which the related person has a material interest and which does not fall under an explicitly stated exception set forth in the applicable disclosure rules of the SEC.

A related person transaction will be considered approved or ratified if it is authorized by the Audit Committee after full disclosure of the related person's interest in the transaction. In considering related person transactions, the Audit Committee will consider any information considered material to investors and the following factors:

- the related person's interest in the transaction;
- the approximate dollar value of the transaction;
- whether the transaction was undertaken in the ordinary course of our business;
- whether the terms of the transaction are no less favorable to us than terms that we could have reached with an unrelated third party; and
- the purpose and potential benefit to us of the transaction.

Item 14. Principal Accounting Fees and Services.

The aggregate fees billed by McGladrey & Pullen, LLP and RSM McGladrey, Inc. for services performed for the years ended June 30, 2011 and 2010 are as follows:

	<u>2011</u>	<u>2010</u>
Audit Fees	\$ 98,500	\$ 91,000
Audit Related Fees	38,500	8,500
Tax Fees	-	-
All Other Fees	-	-
Total Fees	<u>\$ 137,000</u>	<u>\$ 99,500</u>

AUDIT FEES

The aggregate audit fees for the years ended June 30, 2011 and 2010 were primarily related to the audit of the our annual financial statements and review of those financial statements included in our quarterly reports on Form 10-Q and fees for professional services rendered in connection with documents filed with the Securities and Exchange Commission.

AUDIT RELATED FEES

Audit related fees for the years ended June 30, 2011 and 2010 were primarily incurred in connection with our equity offerings and registration statements.

Pre-Approval Policies and Procedures

In accordance with its charter, the Audit Committee is required to approve all audit and non-audit services provided by the independent auditors and shall not engage the independent auditors to perform the specific non-audit services prescribed by law or regulation.

The Audit Committee has adopted policies and procedures relating to the pre-approval of all audit and non-audit services that are to be performed by our independent registered public accounting firm. This policy generally provides that we will not engage our independent registered public accounting firm to render audit or non-audit services unless the service is specifically approved in advance by the Audit Committee or the engagement is entered into pursuant to one of the pre-approval procedures described below.

From time to time, the Audit Committee may pre-approve specified types of services that are expected to be provided to us by our independent registered public accounting firm during the next 12 months. Any such pre-approval is detailed as to the particular service or type of services to be provided and is also generally subject to a maximum dollar amount.

The Audit Committee has also delegated to the chairman of the Audit Committee the authority to approve any audit or non-audit services to be provided to us by our independent registered public accounting firm. Any approval of services by a member of the Audit Committee pursuant to this delegated authority is reported on at the next meeting of the Audit Committee.

**CERTIFICATION PURSUANT TO SECTION 302
OF THE SARBANES-OXLEY ACT OF 2002**

I, Leslie J. Browne, Ph.D., certify that:

1. I have reviewed this Annual Report on Form 10-K/A of Senesco Technologies, Inc.
2. Based on my knowledge, this report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this report;
3. Based on my knowledge, the financial statements, and other financial information included in this report, fairly present in all material respects the financial condition, results of operations and cash flows of the registrant as of, and for, the periods presented in this report;
4. The registrant's other certifying officer and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(e)) and internal control over financial reporting (as defined in Exchange Act Rules 13a-15(f) and 15d-15(f)) for the registrant and have:
 - a) Designed such disclosure controls and procedures, or caused such disclosure controls and procedures to be designed under our supervision, to ensure that material information relating to the registrant, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period in which this report is being prepared;
 - b) Designed such internal control over financial reporting, or caused such internal control over financial reporting to be designed under our supervision, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles;
 - c) Evaluated the effectiveness of the registrant's disclosure controls and procedures and presented in this report our conclusions about the effectiveness of the disclosure controls and procedures, as of the end of the period covered by this report based on such evaluation; and
 - d) Disclosed in this report any change in the registrant's internal control over financial reporting that occurred during the registrant's most recent fiscal quarter (the registrant's fourth fiscal quarter in the case of an annual report) that has materially affected, or is reasonably likely to materially affect, the registrant's internal control over financial reporting; and
5. The registrant's other certifying officer and I have disclosed, based on our most recent evaluation of internal control over financial reporting, to the registrant's auditors and the

audit committee of the registrant's board of directors (or persons performing the equivalent functions):

- a) All significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting which are reasonably likely to adversely affect the registrant's ability to record, process, summarize and report financial information; and
- b) Any fraud, whether or not material, that involves management or other employees who have a significant role in the registrant's internal control over financial reporting.
